DESCRIPTION
USG Levelrock™ Brand Crack Suppression Mat (CSM) is a 3/16 in. (5 mm)-thick random filament, non-geometrically-patterned mat used during the renovation of old buildings. Designed for interior use directly over concrete, plywood or OSB subfloors, USG Levelrock CSM is a Class A fire-rated product.

EXTENDED WARRANTY
An extended warranty may apply when using USG Levelrock® Crack Suppression Mat in a system application. Please contact USG for further details.

LIMITATIONS
1. Do not use in exterior applications.
2. Do not install where continuous exposure to moisture is a possibility.
3. Structure shall be designed so that deflection does not exceed L/240 from combined dead and live loads and L/360 from live loads. Certain floor coverings such as marble, limestone, travertine and wood may have more restrictive deflection limits. Consult the appropriate floor-covering manufacturer.
4. For wood subfloors, do not install on plywood/OSB subfloors lacking tongue and groove edges without back-blocking.

INSTALLATION
USG Levelrock Crack Suppression Mat (CSM) can be used over concrete, plywood or OSB subfloors. For plywood or OSB subfloors, the edges must be tongue and groove or the use of back blocking is required. The subfloor must be clean and free of construction debris and dirt. The building temperature should be maintained at a 50 °F (10 °F) minimum.

Protect USG Levelrock® underlayment floors poured over USG Levelrock Crack Suppression Mat from heavy trade traffic loads (i.e. loaded drywall carts, heavy tool cabinets, etc.) with plywood.
