

United States Gypsum Company  
Industrial Products Division  
P.O. Box 803871  
Chicago, IL 60680-3871

April 22, 2004

**Re: Lot Number Coding**

To Whom it May Concern:

U.S. Gypsum Company manufactures the following products at its Southard, Oklahoma plant:

Terra Alba, Food & Pharmaceutical Grade (Dihydrate calcium sulfate)

SNOW WHITE® Filler, Food & Pharmaceutical Grade (anhydrous calcium sulfate)

The lot number coding for these products indicates the date and location of manufacture. The code contains six digits indicating the date (mmddyy) followed by the letter "S" which stands for the Southard, Oklahoma plant. For example, material manufactured on April 22, 2004 would carry the code: 042204S.

Sincerely,  
**UNITED STATES GYPSUM COMPANY**
