

IDENTITEE™ Breaks the Boundaries of Bolt-Slot Grid

IDENTITEE™ suspension system gives designers an open palette when it comes to ceiling design.

- Refined 9/16" dual-reveal profile adds an elegant appeal to Class A spaces
- Optimized modular flexibility delivers design freedom by allowing the easy installation of a variety of sizes, patterns and linear channels
- DOWN® cross tee clips ensure tight intersections and connections for a virtually seamless appearance and easy tile drop-in
- Patented cap lance detail offers a range of finish and color options designed to match any vision
- Over 50% post-consumer recycled content means more sustainable spaces

Introducing True™ Wood Planks

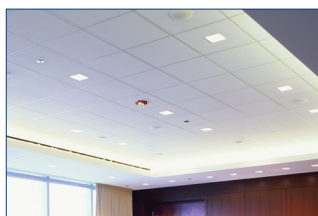

FSC-certified True™ Wood panels are now available in plank sizes, allowing you to combine the majesty of true wood with the design freedom of USG.

- Create dramatic and sleek modular layouts with plank sizes 1 x 4, 1 x 5, 2 x 6, 2 x 8, 20 x 60 and 30 x 60
- Available in FL and SL edges in all six species, perforation and channel options for enhanced flexibility
- New stabilizer bar/safety clip speeds installation while maintaining grid modularity
- Designed to impress, especially when used in conjunction with the refined profile of IDENTITEE ceiling grid
- Correspond to plank sizes in acoustical panels, as well as CELEBRATION™ and PANZ™ metal ceiling panels, making them easy to combine
- Class A fire rating per ASTM E1264 delivers performance and peace of mind

USG Extends Standard Color Palette

Mist 053

Silvertone 052

USG has added Mist (053) and Silvertone (052) to an already wide range of standard colors, giving designers even more freedom when selecting standard colors for ceiling panels and suspension systems.

- All Standard colors are available for quick delivery
- Builds on an extensive Standard color palette that includes Parchment (103), Manila (246), Beige (142), Straw (143), Sandstone (090), Taupe (107), Charcoal (534) and Flat Black (205)
