Dan:

Momentive's Sealants Lab has completed the requested tests pertaining to the above referenced project. This testing was performed to determine the adhesive characteristics of several GE silicone products in contact with **USG Securock Glass-Mat Sheathing**. The following GE sealants are appropriate for use with the **Securock** sheathing.

**SilPruf SCS2000**  
**SilPruf NB SCS9000**  
**SilPruf LM SCS2700**  
**UltraGlaze SSG4000**  
**UltraGlaze SSG4000AC**  
**SilGlaze II SCS2800**  
**Paintable SCS7000**

It is advised that testing be conducted on a project basis when any GE sealant is applied to the Securock sheathing product. This is required if a sealant warranty is desired. And, other GE sealants may be used provided appropriate testing is conducted.

Feel free to contact me if you have any questions.

Regards,

David M. French  
Applications Engineer
