Re: Securock Glass-Mat Sheathing and GreatSeal PE-150 and LT-100

Mr. Collins:

We have tested the application of both our GreatSeal PE-150 and LT-100 on the Securock Glass-Mat Sheathing board. Both had excellent adhesion to the USG board and the products are compatible. We would highly recommend the use of GreatSeal PE-150 and LT-100 with the Securock sheathing board.

If there is any other information we can provide, please let me know.

Sincerely,

Cayce D. Kovacs  
President
