

DUROCK™ Tile Membrane

DUROCK™ Tile Membrane Adhesive

DUROCK™ tile membrane is a thin, waterproof, vapor-permeable membrane used under tile in residential and light-commercial floor, wall and countertop applications. Easy to install, with a patented cementitious surface for outstanding tile bond, DUROCK tile membrane also provides a high-performance crack-isolation solution when used with DUROCK tile membrane adhesive.

Outstanding performance.

Easy to Install

DUROCK tile membrane can be easily cut with scissors. There's no dust, no mess, and no need for special tools.

Water Protection

Waterproof DUROCK tile membrane protects wood subfloors from water damage, while its breathability ensures that moisture in the substrate can escape. It is also mold and mildew resistant, scoring a perfect "10" on ASTM D 3273.

Crack Isolation

When installed with DUROCK tile membrane adhesive, the membrane creates a high-performance crack-isolation system. Type 1 organic adhesive or latex-modified thin-set mortar may be used instead, but these products do not provide crack isolation.

Outstanding Tile Bond

Covered on one side with a cementitious coating, DUROCK tile membrane provides excellent adhesion for ceramic tile.

Thin and Lightweight

Just 0.022" thick, DUROCK tile membrane won't raise the level of the floor or interfere with continuity between rooms. Rolls are light and easy to carry and store.

- A. Ceramic tile
- B. Latex-modified mortar or tile mastic
- C. DUROCK tile membrane
- D. DUROCK tile membrane adhesive
- E. Wood subfloor

- A. Ceramic tile
- B. Latex-modified mortar or tile mastic
- C. Durock tile membrane
- D. Durock tile membrane adhesive
(latex-modified mortar or tile mastic may be used
but will not provide crack isolation)
- E. Concrete subfloor
