CGC SHEETROCK® BRAND ULTRALIGHT PANELS FIRECODE® X

GREATER PERFORMANCE WITH NONE OF THE WEIGHT.

CGC Sheetrock® Brand UltraLight Panels Firecode® X are the industry's first wallboard that's both lightweight and Type X. They now offer you one solution for fire-rated wall, floor-ceiling and roof-ceiling assemblies.

- Weigh up to 28% less than standard 15.9 mm (5/8 in.) Type C and 22% less than Type X panels, resulting in reduced worker fatigue and greater job site productivity

- Less weight also means reduced wear and tear on delivery and stocking equipment

- Feature superior score and snap for cleaner edge and faster installation

- Assemblies which meet the National Building Code sound performance requirement of a Sound Transmission Class (STC) of 50 and an Apparent Sound Transmission Class (ASTC) of 47 for wall partitions and floor-ceilings

- Reduce material cost and installation time by requiring 25% fewer resilient channels spaced at 406 mm (16 in.) OC on Open-Web wood trusses

- Listed in the most widely specified UL Designs for wall, floor-ceiling and roof-ceiling assemblies, including U419, L521, L528, M521, M522, M525, M532 and P522 (refer to specific UL Designs for complete details)
