

RETAIL CEILINGS PRODUCT CATALOGUE

cgcinc.com

IT'S YOUR WORLD. BUILD IT.™

The background of the advertisement is a photograph of a modern office interior. The ceiling is a grid of square acoustic tiles, some of which are recessed, creating a complex geometric pattern of light and shadow. In the foreground, there are several thick, blue-painted metal beams that form a structural frame, extending from the bottom and sides towards the center. The lighting is bright and even, highlighting the textures of the ceiling and the metallic surfaces.

REACH HIGHER WITH USG CEILING SOLUTIONS

From a simple white plane to a bold design highlighted with texture, colour and pattern, a USG ceiling provides the crowning touch, connecting and completing the many elements that make a space comfortable and beautiful. The great style and performance our ceilings offer can help you take the look of your room to new heights.

TABLE OF CONTENTS

USG is the global leader in the manufacturing of ceiling suspension systems and a recognized innovator in the development of acoustical and gypsum panels as well as specialty ceiling systems. We believe that USG Ceiling products should not only bring visions to life, but they should also enhance and inspire those visions while reducing the building industry’s impact on the environment.

USG Ceiling Solutions offers an extensive line of acoustical panels, suspension systems, integrated ceiling systems and specialty ceiling systems, and all USG Ceiling products are built to provide design freedom, easy installation and outstanding performance. USG. It’s Your World. Build It.®

GUIDE TO CEILING SELECTION

PERFORMANCE CONSIDERATIONS

AESTHETICS

As one of the most visible features of a space, the ceiling plays a critical role in the overall aesthetic of any project. USG Ceiling products are built to provide design freedom and ease of installation to help you balance performance, aesthetics and value.

Designer Ceilings: Available in textures ranging from fine to bold, several contemporary patterns, and a choice of materials for specialized performance, from enhanced durability to cleanability and sag resistance.

Classic Ceilings: Fissured panels with good sound control, providing smart value for a variety of retail and commercial environments. Many available with Firecode® formulation for use in fire-rated assemblies.

Fiberglass Ceilings: Fiberglass Vinyl Panels offer superior sound absorption (NRC) that are ideal in open-plan areas. Panels are lightweight and feature a washable surface.

In addition, panels are available in an assortment of sizes and in various edge profiles, which further enhance ceiling design.

SOUND CONTROL

Many USG ceilings offer enhanced sound control to help improve privacy and comfort, as well as productivity in commercial environments. Look for these performance attributes:

NRC (sound absorption): Noise Reduction Coefficient (NRC) measures the amount of sound a panel can absorb. For example, a panel with an NRC of 0.55 will absorb 55 percent of sound reaching it. An NRC of 0.70 and above is important in environments such as open-plan offices and schools.

CAC (sound containment): Ceiling Attenuation Class (CAC) measures a panel's ability to prevent sound from passing into adjacent spaces. For example, a panel with 33 CAC reduces transmitted sound by 33 decibels (dB). High CAC (40) is ideal for private offices and activity areas such as media rooms.

LIGHT REFLECTANCE

Light Reflectance (LR) value represents the percentage of light reflected from the surface of a material. Ceilings with an LR above 0.75 help prevent eyestrain and conserve energy by reducing the number of lighting fixtures needed to properly illuminate a space. High-LR panels enhance all lighting schemes, especially those that include indirect lighting. Values above LR 0.85 are considered high.

FIRE RESISTANCE

All USG acoustical ceiling panels are rated Class A (the highest possible) as tested to CAN/ULC-S102. These materials do not sustain a fire when flame is removed (result <25 FSI) and do not generate significant amounts of visibility-obscuring smoke (result <50 SDI).

Panels identified with the fire icon (🔥) are available with Firecode® formulation for use in fire-rated assemblies.

MOULD, MILDEW AND SAG RESISTANCE

USG Acoustical Ceiling panels with ClimaPlus™ Performance are covered by a limited warranty to be free from the growth of mould and mildew for 30 years from the date of installation when used with USG Donn® Brand Suspension Systems. These panels include an antimicrobial treatment on the painted surface containing a mould-inhibiting agent that provides broad-spectrum control for the growth of mould and mildew over the warranty period. ClimaPlus fiberglass panels are also covered by a limited warranty to be free from the growth of mould and mildew for 30 years from the date of installation due to the inherent characteristics of the products when installed and maintained in accordance with current CGC written instructions.

LOW EMISSIONS (VOC)

Third party (GREENGUARD Gold) certified for low-emitting performance, meets California Department of Public Health's (CDPH) Standard Method V1.2-2017. 'Certificates of Compliance' for Low VOC Emissions are available on [usg.com](https://www.usg.com) and at spot.ul.com

RECYCLED CONTENT

High Recycled Content: Contains over 50% recycled content.

PERFORMANCE CONSIDERATIONS

THERMAL RESISTANCE

R-value as measured at an average temperature of 75°F.

**CGC DONN® BRAND
ACOUSTICAL
SUSPENSION SYSTEM**

USG ceiling panels are designed for use with the CGC Donn® Brand Acoustical Suspension System to offer the fastest-installing ceiling systems in the industry. Tees feature a hot-dipped galvanized steel body to prevent rust and ensure paint adhesion and are available in several colours to coordinate with ceiling panels. The CGC main-tee splice and patented Quick-Release™ cross tee make installation easy, sturdy and square.

When used with USG ceiling panels, the CGC Donn® Brand Acoustical Suspension System provides a 30-year limited system warranty protecting against manufacturing defects and the occurrence of 50% red rust.

HIGH-PERFORMANCE CRITERIA

Products indicated with these icons meet high-performance criteria:

	Firecode® Formulation	
	NRC	≥ 0.70
	CAC	≥ 40
	LR	≥ 0.85
	Abuse Resistant	
	High Recycled Content	≥ 50%
	ClimaPlus™ Warranty Performance

Low Emissions (VOC)
 Third party (GREENGUARD Gold) certified for low-emitting performance, meets California Department of Public Health's (CDPH) Standard Method V1.2-2017. 'Certificates of Compliance' for Low VOC Emissions are available on usg.com and at spot.ul.com

ClimaPlus™ Warranty Performance
 Contains a broad-spectrum antimicrobial additive on the face and back of the panel that provides resistance against the growth of mould and mildew. Includes sag-resistance performance.

High Recycled Content
 Classified as containing greater than 50% total recycled content. Total recycled content is based on product composition of postconsumer and preconsumer (postindustrial) recycled content per FTC guidelines.

This product has achieved both BioPreferred initiatives: Federal Procurement Preference and Certified Product Labeling. See the complete list of all USG ceiling panels on biopreferred.gov website.

GREENGUARD Gold Certification offers stricter certification criteria, considers safety factors to account for sensitive individuals and ensures a product is acceptable for use in environments such as schools and healthcare facilities. It is referenced by both The Collaborative for High Performance Schools (CHPS) and the Leadership in Energy and Environmental Design (LEED) Building Rating System.

SUSPENSION SYSTEMS ACCESSORIES

MOULDING

FEATURES

- Proprietary overlap detail provides an "extra hand" for easier, more accurate installation.
- Ensures that trim faces are level.
- Eliminates an unsightly gap at butt joints.
- Installs faster than standard perimeter trim.

HANGER WIRE

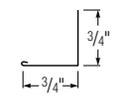

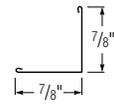

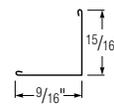

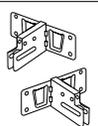

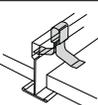

DESCRIPTION

Support suspension system main tees. To install, secure to lag screws or tie-wire nails, thread through hanger-wire holes on main tee, and twist to secure.

COMMERCIAL/ RESIDENTIAL PROJECTS

18-gauge hanger wire is adequate for home use but should not be used on commercial projects, where 12-gauge hanger wire is normally required. USG recommends 12-gauge hanger wire, even in home use, when using any cast ceiling panels: USG Arctic™, USG Cheyenne™ and USG Sandrift™. For fire resistance rated assemblies, consult the specific UL/ULC Design for requirements.

NOTE

Products described here may not be available
in all geographic markets. Consult your CGC
Company sales office or representative for
information. The information in this document
is subject to change without notice. CGC Inc.
assumes no responsibility for any errors that may
inadvertently appear in this document.

NOTICE

We shall not be liable for incidental and
consequential damages, directly or indirectly
sustained, nor for any loss caused by application
of these goods not in accordance with current
printed instructions or for other than the
intended use. Our liability is expressly limited
to replacement of defective goods. Any claim
shall be deemed waived unless made in writing
to us within thirty (30) days from date it was or
reasonably should have been discovered.

SAFETY FIRST!

Follow good safety and industrial hygiene
practices during handling and installation
of all products and systems. Take necessary
precautions and wear the appropriate
personal protective equipment as needed.
Read Safety Data Sheets and related
literature on products before specification
and/or installation.
