WALLBOARD AS POWERFUL AS YOU ARE.

CGC Sheetrock® Brand offers a complete portfolio of high-performance glass-mat and paper-faced wallboard panels that improve the resilience, durability and speed of construction for your buildings—helping to ensure you remain a hero in the eyes of building owners and occupants.

Our league of performance wallboard panels has the power to:

REPEL WATER

Mold Tough® paper-faced and glass-mat panels are designed to provide superior moisture and mould protection.

Interior glass-mat panels, such as **CGC Sheetrock® Brand Glass-Mat Panels Mold Tough® Firecode® X**, can speed up construction because they are ideal for pre-dry-in (aka "pre-rock") and similar applications of wallboard before the building envelope is fully enclosed.

SHAKE OFF IMPACTS

The CGC abuse-resistant portfolio includes enhanced paper-faced and glass-mat panels that have up to five times the impact resistance of regular wallboard.

CGC Sheetrock® Brand Glass-Mat Panels Mold Tough® VHI Firecode® X offer very high impact protection and can withstand the blunt force impact of up to 150 pounds.

DEFY GRAVITY

The lightest wallboard panels on the market, CGC Sheetrock® Brand UltraLight panels are made with proprietary core and paper technologies, making them easier to lift and transport.

The lighter weight of **CGC Sheetrock® Brand UltraLight Panels Firecode® X (UL Type ULIX)** compared to standard Type X panels helps to reduce installation times, safety issues and environment impacts.

RESIST FIRE

CGC's fire-resistant panels help to ensure the safety of a building's occupants thanks to noncombustible gypsum cores that can provide 1-, 2-, 3- and 4-hour fire ratings.

CGC Sheetrock® Brand Firecode® Type X and Type C are cUL Classified as to fire resistance, surface-burning characteristics and noncombustibility. Trusted performance and specified in a large number of UL/ULC Designs.
