A WALLBOARD PORTFOLIO
THAT WORKS AS HARD AS YOU

SHEETROCK® BRAND
SECUROCK® BRAND
DUROCK® BRAND
FIBEROCK® BRAND
For over 100 years, we have led the building industry in drywall innovation. In that time, our Sheetrock®, Securock®, Durock® and Fiberock® Brands have become the standard for highest-quality and best-performing walls and ceilings.

Offering the nation’s largest-selling, broadest line of interior and exterior panels, all of our products exceed the essential requirements of performance, safety, efficiency, workability, strength and ease of decoration that are characteristic of quality construction.

Beyond outstanding products, we also offer expertise, technical support and nationwide distribution. All driven by a dedication to finding solutions for you.

We do all of this because we believe that our reputation is built on yours. When you succeed, we succeed. And your exceptional work—combined with our solutions—brings new levels of performance, enabling you to create the spaces where people live, work and play.
Gypsum products are manufactured from a mineral rock (gypsum) that is gray to white in color and is found in abundant deposits around the world or from recaptured gypsum. Basic gypsum consists of calcium sulfate chemically combined with water of crystallization (CaSO₄ + 2H₂O). The combined water makes up about 20% of gypsum rock’s weight (50% by volume) and gives the material its characteristic fire-resistant qualities and high adaptability to varied construction use.

The gypsum that ends up in gypsum wallboard can come from two sources. Gypsum rock can be mined from the ground, as sources are abundant. This mineral is the second most plentiful one found on earth. Recaptured gypsum is a byproduct that can be obtained from several processes, including flue gas desulfurization (FGD). Recaptured gypsum has the exact same chemical composition as gypsum mined from the earth. Wallboard made from recaptured gypsum is the same as wallboard made from mined gypsum rock.

USG and CGC gypsum boards are produced using a highly automated, continuous process. After the paper-sandwiched gypsum core has set, the boards are cut to length, dried and packaged for shipment. Rigorous quality control measures are applied throughout the manufacturing process.

The constant desire to improve our product line is representative of our many efforts to be a leader in the manufacture of the industry’s most specified and used gypsum panels.

THE MANUFACTURE OF GYPSUM PRODUCTS

NORTH AMERICAN MANUFACTURING LOCATIONS

GYPSUM PANELS
Aliquippa, PA
Baltimore, MD
Bridgeport, AL
East Chicago, IN
Galena Park, TX
Hagersville, Ontario, Canada
Jacksonville, FL

Detroit, MI
Monterrey, Mexico
New Orleans, LA

GYPSUM FIBER PANELS
Gypsum, OH
SUSTAINABILITY BEST PRACTICES

For over 100 years, USG and CGC has led the building sector’s effort in developing and supplying sustainable construction materials. Today, sustainability is integrated into the design and manufacture of every wall, ceiling and flooring product.

Sustainable Supply Chain

We use recaptured gypsum, a byproduct of flue gas desulfurization (FGD)—a scrubbing technology utilized by many coal-fired power plants to reduce sulfur dioxide, which is the main cause of “acid rain.” Recaptured gypsum is chemically produced and recovered in processes that we helped to pioneer for its use as an alternative to naturally occurring gypsum. Recaptured gypsum provides the same chemical (calcium sulfate dihydrate) and physical properties as natural gypsum and diverts this material from overburdened landfills. Raw materials used in our products are carefully selected and go through a rigorous screening procedure. Incoming raw materials are tested for contaminants by internal and third-party labs for consideration of worker, environmental and end-user exposure.

In addition to the selection of raw materials, we are mindful of product transport. Freight transportation can be a large contributor to air pollution, which is why we continually consider the environmental footprint of our transportation activities and do our part to reduce environmental impact.

Carbon Reduction

Every product has an impact on the environment. Raw material extraction, manufacturing and use may contribute towards resource depletion, pollution and climate change. Part of creating more sustainable products is understanding the product’s embodied carbon, which is the quantity of greenhouse gas (GHG) emissions that are produced during the life cycle of the product. In our efforts to reduce these negative impacts and make products for a more sustainable future, Sheetrock® Brand EcoSmart Panels revolutionized wallboard manufacturing, significantly reducing the product’s global warming potential.

Product Transparency

USG and CGC lead the building industry in the development of high-performance products designed to meet specifications, construction and sustainability requirements. As a manufacturer, we have a responsibility to be transparent about the building materials that make up the indoor environment. Most USG and CGC gypsum panels have Health Product Declarations (HPDs) that disclose at least 1000 ppm of the chemical formulation. Other transparency tools include Declare Labels, Environmental Product Declarations (EPDs) and GREENGUARD Gold certification. Our products contribute to USGBC® LEED® v4.1 credits, contribute to multiple features found in the WELL Building Standard™ v3.0, and most products are free of Living Building Challenge™ v4.0 Red-List chemicals and can be used on Living Building Challenge Petal Certification projects. For more information on the sustainability attributes of USG and CGC gypsum panels, visit usg.ecomedes.com.

NOTE:
GREENGUARD Certified products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit ul.com/gg.
TYPICAL GYPSUM PANEL APPLICATIONS FOR COMMERCIAL SPACES

A ABUSE-RESISTANT PANELS
Any Sheetrock® Brand gypsum panel labeled as "Abuse-Resistant (AR)"

B SHEATHING PANELS
Any Securock® or Sheetrock® Brand gypsum panel labeled as "Sheathing"

C FIRE-RESISTANT PANELS
Any Sheetrock® Brand gypsum panel labeled as "Firecode®" or "Ultracode®"

D IMPACT-RESISTANT PANELS
Any Sheetrock® Brand gypsum panel labeled as "Very High Impact-Resistant (VHR)"

E MOISTURE- AND MOLD-RESISTANT PANELS
Any Sheetrock® Brand gypsum panel labeled as "Mold Tough®"

F SHAFTLINER PANELS
Any Sheetrock® Brand gypsum panel labeled as "Liner"

G TILE BACKERBOARD
Any Durock® or Fiberock® Brand panel labeled as "Tile Backerboard" or "Underlayment"

TYPICAL GYPSUM PANEL APPLICATIONS FOR RESIDENTIAL SPACES

H ABUSE-RESISTANT PANELS
Any Sheetrock® Brand gypsum panel labeled as "Abuse-Resistant (AR)"

I SAG-RESISTANT PANELS
Any Sheetrock® Brand gypsum panel labeled as "Sag-Resistant", or has an accompanying ICC® ESR report

J SHEATHING PANELS
Any Securock® or Sheetrock® Brand gypsum panel labeled as "Sheathing"

K FIRE-RESISTANT PANELS
Any Sheetrock® Brand gypsum panel labeled as "Firecode®"

L LIGHTWEIGHT PANELS
Any Sheetrock® Brand gypsum panel labeled as "UltraLight" or "EcoSmart"

M MOISTURE- AND MOLD-RESISTANT PANELS
Any Sheetrock® Brand gypsum panel labeled as "Mold Tough®"

N TILE BACKERBOARD
Any Durock® or Fiberock® Brand panel labeled as "Tile Backerboard" or "Underlayment"

**LIGHTWEIGHT AND SUSTAINABLE PANELS**

For more than 100 years, we have remained committed to manufacturing products that are in sync with the environment. As a leading manufacturer of gypsum panels the world over, we have a responsibility to produce products that not only perform on the job site, but also perform with the planet.

**SHEETROCK® BRAND ECOSMART PANELS MOLD TOUGH**

- The lightest and most sustainable 5/8 in. (15.9 mm) enhanced proprietary Type X wall and ceiling panels
- Meets Architecture 2030 Challenge for Products
- Living Building Challenge™ Red List Free
- Contains 100% USDA certified biobased content
- Achieved EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- UL Classifi cation as fi re resistance 30 min. and 1-hr. fi re-rated walls
- Strength and impact resistance comparable to standard 5/8 in. (15.9 mm) Type X
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and non-Type X gypsum wallboard
- Refer to product submittal sheet WB2858 (U.S.) for more information

**SHEETROCK® BRAND ULTRALIGHT PANELS FIRECODE 30®**

- Highly sustainable and ultralightweight 5/8 in. (15.9 mm) wall and ceiling panels
- Meet Architecture 2030 Challenge for Products
- Living Building Challenge™ Red List Free
- Contains 100% USDA certified biobased content
- Achieved EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- UL Classifi cation as fi re resistance 30 min. and 1-hr. fi re-rated walls
- Strength and impact resistance comparable to standard 5/8 in. (15.9 mm) Type X
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and non-Type X gypsum wallboard
- Refer to product submittal sheet WB2059 (U.S.) for more information

**SHEETROCK® BRAND ULTRALIGHT PANELS FIRECODE 30®**

- The first and lightest 1/2 in. (12.7 mm) sag-resistant interior ceiling panels
- Support sprayed textures and insulation better than 5/8 in. (15.9 mm) gypsum panels
- Superior sag resistance under tensile testing materials
- Achieved EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- UL Classifi cation as fi re resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm) and Type X gypsum wallboard
- Offer comparable sound, strength, sag and impact resistance to standard 1/2 in. (12.7 mm) Type X
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm) Type X
- Refer to product submittal sheet WB2101 (Canada) for more information

**SHEETROCK® BRAND ULTRALIGHT PANELS FIRECODE 30®**

- •  When tested in accordance with ASTM D3273 2, the panels meet
- •  Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm),
- •   Contains 100% USDA certified biobased content
- •  Meet Architecture 2030 Challenge for Products
- •   Non-Type X gypsum wallboard
- •   Building Code® (ICC®) Evaluation Service compliant
- •  The first lightweight 1/2 in. (12.7 mm) wall and ceiling panels
- •  Easier to fi t, carry and install
- •  International Code Council® (ICC®) Evaluation Service compliant for ceiling installations, E38-5655
- •  ACHIEVED EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- •  Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm) gypsum wallboard and 1/2 in. (12.7 mm) gypsum ceiling board
- •  Refer to product submittal sheet WB2850 (U.S.) or EW3250 (Canada) for more information

**SHEETROCK® BRAND ULTRALIGHT GYPSUM BASE IMPERIAL®**

- The fi rst and lightest 1/2 in. (12.7 mm) gypsum base for veneer plaster
- Special layered laminated face paper controls water absorption, provides maximum plaster bond and resists sag
- Achieved EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- UL Classifi cation as fi re resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm) and gypsum base for veneer plaster
- Use with veneer plaster systems
- Intended for new residential or repair and remodel construction
- Refer to product submittal sheet WB2713 (U.S.) for more information

**SHEETROCK® BRAND ULTRALIGHT PANELS FIRECODE 15®**

- Up to 30% lighter than standard 5/8 in. (15.9 mm) Type X panels
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and non-Type X gypsum wallboard
- UL Classifi cation as fi re resistance – 30 min. and 1-hr. fi re-rated walls
- Single-layer metal- or steel-framed 30-min. fi re-rated walls
- Double-layer gypsum panel steel-framed (VOC 4.0) ceiling applications
- New residential or repair and remodel construction
- Non-fire-rated single-layer wall and ceiling applications
- Parallel or perpendicular installation on ceilings with up to 24 in. (610 mm) OC framing when water-based texture is applied
- Wood or steel framing
- New residential or repair and remodel construction
- Non-fire-rated single-layer wall and ceiling applications
- Parallel or perpendicular installation on ceilings with up to 24 in. (610 mm) OC framing when water-based texture is applied
- Wood or steel framing

**SHEETROCK® BRAND ULTRALIGHT ULTRALIGHT SAG-RESISTANT INTERIOR CEILING BOARD**

- Intended for new or repair and remodel applications
- •  New residential or repair and remodel construction
- •  Non-fire-rated single-layer wall and ceiling applications
- •  Parallel or perpendicular installation on ceilings with up to 24 in. (610 mm) OC framing when water-based texture is applied
- •  Wood or steel framing

**NOTES:**

1. Measurements approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or GC representative, or call the Customer Service Center.

**USG and Gypsum Ceiling & Wall Systems**

**UL TYPE DESIGNATION**

**PRODUCT DATA**

**INTENDED FOR**

- • Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels are not required
- • New or repair and remodel construction
- • Load-bearing and nonload-bearing wood- or steel-framed fi re-rated walls
- • Wall, column, fi re-ceiling and roof-ceiling assemblies (refer to specifi c US designs for complete data)
- • Any US design in which lightweight Innovation Type X ULITM panels are listed

- • Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels are not required
- • New or repair and remodel construction
- • Load-bearing and nonload-bearing wood- or steel-framed fi re-rated walls
- • Wall, column, fi re-ceiling and roof-ceiling assemblies (refer to specifi c US designs for complete data)
- • Any US design in which lightweight Innovation Type X ULITM panels are listed

- • Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels are not required
- • New or repair and remodel construction
- • Load-bearing and nonload-bearing wood- or steel-framed fi re-rated walls
- • Wall, column, fi re-ceiling and roof-ceiling assemblies (refer to specifi c US designs for complete data)
- • Any US design in which lightweight Innovation Type X ULITM panels are listed

- • Commercial or residential applications where 5/8 in. (15.9 mm) moisture- and mold-resistant, enhanced proprietary Type X wall and ceiling panels
- • Meet Architecture 2030 Challenge for Products
- • Contains 100% USDA certified biobased content
- • Living Building Challenge™ Red List Free
- • Achieved EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- • UL Classifi cation as fi re resistance, surface-burning characteristics and noncombustibility
- • Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm), Type X, water-resistant gypsum wallboard and exterior gypsum sofl t board
- • When tested in accordance with ASTM D2273, the panels meet or exceed ASTM C618 specifications
- • Refer to product submittal sheet WB2859 (U.S.) for more information

- • New or repair and remodel construction
- • Non-fi re-rated steel- or wood-framed wall and ceiling assemblies
- • Achieved EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- • Double-layer gypsum panel steel-framed (VOC 4.0) ceiling applications
- • Any US design in which UL Type FC10 panels are listed

- • New or repair and remodel construction
- • Non-fi re-rated steel- or wood-framed wall and ceiling assemblies
- • Parallel or perpendicular installation on ceilings with up to 24 in. (610 mm) OC framing when water-based texture is applied
- • Wood or steel framing
- • Any US design in which UL Type FC30 panels are listed

- • New or repair and remodel construction
- • Non-fi re-rated steel- or wood-framed wall and ceiling assemblies
- • Parallel or perpendicular installation on ceilings with up to 24 in. (610 mm) OC framing when water-based texture is applied
- • Wood or steel framing

- • New or repair and remodel construction
- • Non-fi re-rated steel- or wood-framed wall and ceiling assemblies
- • Parallel or perpendicular installation on ceilings with up to 24 in. (610 mm) OC framing when water-based texture is applied
- • Wood or steel framing

**SURFACE-BURNING CHARACTERISTICS**

- • Ambient temperature 73°F (23°C) and 50% RH
- • 1-hr. fire-rated wall assemblies
- • Non-fire-rated steel- or wood-framed 30-min. fire-rated walls
- • Single-layer metal- or steel-framed 30-min. fire-rated walls
- • Double-layer gypsum panel steel-framed (VOC 4.0) ceiling applications
- • Any US design in which UL Type FC30 panels are listed

- • New or repair and remodel construction
- • Non-fi re-rated steel- or wood-framed wall and ceiling assemblies
- • Parallel or perpendicular installation on ceilings with up to 24 in. (610 mm) OC framing when water-based texture is applied
- • Wood or steel framing

**LIGHTWEIGHT PANELS**

The SHEETROCK® Brand has long stood for innovative, groundbreaking building solutions that set industry standards for productivity, efficiency and life safety. We’ve remained committed to the construction industry by making our wallboard lighter, easier, faster and safer to install.
LIGHTWEIGHT PANELS

- **REGIONAL AVAILABILITY**
  - The first lightweight 5/8 in. (15.9 mm) Type X panels
  - UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and Type X gypsum wallboard
  - Other comparable sound, strength and impact resistance to standard 5/8 in. (15.9 mm) Type X
  - An upgradable, this panel is available in a 5/8 in. (15.9 mm) lightweight and sustainable version: Sheetrock® Brand EcoSmart Panels Flexicore® X (U.S. only)
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
  - Refer to product submittal sheet WB2598 (U.S.) or EWB2598 (Canada) for more information

**PRODUCT DATA**

| WEIGHT 1: 1.9 lb./sq. ft. (9.3 kg/sq. m.) | WIDTH: 5/8 in. (15.9 mm) | THICKNESS: 5/8 in. (15.9 mm) | ULX
| WEIGHT: 48 lb. (2219 mm) | Width: 54 in. (1372 mm) | EDGE PROFILE: Tapered |

- **REGIONAL AVAILABILITY**
  - The original 1/4 in. (6.4 mm) and 5/8 in. (15.9 mm) panels
  - Quick installation and decoration
  - Resistant to cracking and warping
  - The original 1/4 in. (6.4 mm) and 3/8 in. (9.5 mm) gypsum wallboard
  - Designed to construct curved surfaces easily
  - Quick installation and decoration
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
  - Refer to product submittal sheet WB1473 (U.S.) or EWB1473 (Canada) for more information

**PRODUCT DATA**

| WEIGHT 1: 1.3 lb./sq. ft. (6.5 kg/sq. m.) | WIDTH: 1/2 in. (12.7 mm) | THICKNESS: 1/2 in. (12.7 mm) | ULX™
| WEIGHT: 48 lb. (2219 mm) | Width: 54 in. (1372 mm) | EDGE PROFILE: Tapered |

- **REGIONAL AVAILABILITY**
  - The lightweight 1/2 in. (12.7 mm) moisture- and mold-resistant panels
  - Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm), water-resistant gypsum wallboard and exterior gypsum soffit board
  - Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
  - When tested in accordance with ASTM D3273® the panels meet or exceed ASTM C1396 specifications
  - Scour, score, install and finish just like standard drywall
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
  - Refer to product submittal sheet WB2660 (U.S.) or EWB2660 (Canada) for more information

**PRODUCT DATA**

| WEIGHT 1: 1.9 lb./sq. ft. (9.3 kg/sq. m.) | WIDTH: 5/8 in. (15.9 mm) | THICKNESS: 5/8 in. (15.9 mm) | ULX™
| WEIGHT: 48 lb. (2219 mm) | Width: 54 in. (1372 mm) | EDGE PROFILE: Tapered |

- **REGIONAL AVAILABILITY**
  - The first lightweight 5/8 in. (15.9 mm) moisture- and mold-resistant Type X panels available
  - Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
  - Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm), Type X, water resistant gypsum wallboard and exterior gypsum soffit board
  - When tested in accordance with ASTM D3273®, the panels meet or exceed ASTM C1396 specifications
  - UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - As an upgrade, this panel is available in a 5/8 in. (15.9 mm) lightweight and sustainable version: Sheetrock® Brand EcoSmart Panels Lightweight Plus Mold Tough® Flexicore® X
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
  - Refer to product submittal sheet WB2764 (U.S.) or EWB2764 (Canada) for more information

**PRODUCT DATA**

| WEIGHT 1: 1.2 lb./sq. ft. (5.9 kg/sq. m.) | WIDTH: 48 in. (1219 mm) | THICKNESS: 5/8 in. (15.9 mm) | ULX
| WEIGHT: 48 lb. (2219 mm) | Width: 54 in. (1372 mm) | EDGE PROFILE: Tapered |

- **REGIONAL AVAILABILITY**
  - The lightweight panels for curved walls, archways and staircases
  - Comply with ASTM C1396 specifications for 1/4 in. (6.4 mm) gypsum wallboard
  - Designed to construct curved surfaces easily
  - Quick installation and decoration
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
  - Refer to product submittal sheet WB2128 (U.S.) or EWB2128 (Canada) for more information

**PRODUCT DATA**

| WEIGHT 1: 1.2 lb./sq. ft. (5.9 kg/sq. m.) | WIDTH: 48 in. (1219 mm) | THICKNESS: 5/8 in. (15.9 mm) | ULX
| WEIGHT: 48 lb. (2219 mm) | Width: 54 in. (1372 mm) | EDGE PROFILE: Tapered |

REGULAR PANELS

Sheetrock® Brand is the most preferred and widely used brand of gypsum panels. When paired with other components, these gypsum panels provide the highest performing interior walls and ceilings.

- **PRODUCT DATA**
  - The new residential or repair and remodel construction
  - Comply with ASTM C1396 specifications for 1/4 in. (6.4 mm) panels are recommended as a base layer for improving sound control in double-layer steel- and wood-framed partitions and for use over old wall and ceiling surfaces with short radii
  - 3/8 in. (9.5 mm) panels are recommended in double-wall system over wood framing, and in repair and remodeling

**PRODUCT DATA**

| WEIGHT 1: 1.2 lb./sq. ft. (5.9 kg/sq. m.) | WIDTH: 48 in. (1219 mm) | THICKNESS: 5/8 in. (15.9 mm) | ULX
| WEIGHT: 48 lb. (2219 mm) | Width: 54 in. (1372 mm) | EDGE PROFILE: Tapered |

NOTES:

- Manufacturers approximate weights for design and shipping purposes. For specific product weight in your area, contact your local sales or VOC representative, or call the Customer Service Center.
- ULX and UL TYPE MOLD TOUGH® are registered trademarks or trademarks of the United States. This ULX label does not necessarily represent the highest performance of building materials in a building. Some building materials are not tested or labeled with any ULX label. There are limitations to the use of this label, which are outlined in ULX standards. This label is intended to protect building products from water exposure during storage and installation and other conditions which may impair their performance.
- VOC emitting material (meets CA 01350) - VOC emission levels are for reference purposes only and are determined under specific laboratory conditions which may not be consistent with the conditions under which this product will be used. This may affect the effectiveness of this product as a low VOC emitting material.
**FIRE-RESISTANT PANELS**

The overriding goal of all fire-resistant assembly design is to mitigate risk in the event of a fire. Therefore, it’s imperative to match products and systems to the end performance desired. Having an understanding of proper product applications and the latest technologies can avoid costly rework and delays, as well as minimize any safety risks.

When it comes to fire, USG and CGC have established all of the fire testing procedures currently used by Underwriters Laboratories Inc. (UL). USG and CGC are the undisputed leaders among building material manufacturers in providing products and systems designed to keep a structure safe and its occupants safer.

When risk of moisture exposure is present, choose products and systems that offer adequate resistance against mold growth. When tested in accordance with ASTM D3273, Standard Test Method for Resistance to Growth of Mold on the Surface of Interior Coatings in an Environmental Chamber, all USG and CGC moisture- and mold-resistant panels meet or exceed ASTM specifications.

### SHEETROCK® BRAND MOULD TOUGHÆ FIRECODE® X PANELS

- 5/8 in. (15.9 mm) Type X moisture- and mold-resistant panels for use on walls and ceilings
- Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
- Comply with ASTM C309 specifications for 5/8 in. (15.9 mm), Type X, water-resistant gypsum wallboard and exterior gypsum softboard
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- As an upgrade, this panel is available in a 5/8 in. (15.9 mm) Type X, lightweight and sustainable version: SHEETROCK® Brand EcoSmart Panels MOLD TOUGH® Firecode® X (U.S. only)
- As an upgrade, this panel is available in a 5/8 in. (15.9 mm) moisture- and mold-resistant version with a fiberglass facer and back: SHEETROCK® Brand Glass-Mat Panel MOLD TOUGH® Firecode® X

- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2390 (U.S.) or EWB2390 (Canada) for more information

### SHEETROCK® BRAND MOULD TOUGHÆ FIRECODE® X Panels

- 1/2 in. (12.7 mm) enhanced proprietary Type X, moisture- and mold-resistant panels for use on walls and ceilings
- Specially formulated mineral core that provides superior fire resistance for ceiling applications
- Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C309 specifications for 1/2 in. (12.7 mm), Type X, water-resistant gypsum wallboard and exterior gypsum softboard
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm) Type X, glass mat water-resistant gypsum panel
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2504 (U.S.) or EWB2504 (Canada) for more information

### ULTRACODE PANELS

- 5/8 in. (15.9 mm) enhanced fire-, moisture- and mold-resistant panels that can achieve a 2-h fire rating in a single-layer assembly, or a 4-h fire rating in a double-layer assembly when used with mineral wool insulation in steel-framed walls
- Reduce labor and material costs by using less panels
- Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
- Comply with ASTM C309 specifications for 5/8 in. (15.9 mm), Type X and water-resistant gypsum wallboard
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2388 (U.S.) for more information

### INTENDED FOR

- Commercial or residential applications where 5/8 in. (15.9 mm) moisture- and mold-resistant Type X panels are required
- Areas where additional moisture and mold resistance is desired
- New or remodel construction
- Load-bearing and non-load-bearing wood- or steel-frame fire-rated walls
- Protected exterior soffit and ceiling applications
- Any UL design in which UL Type SCX panels are listed

### INTENDED FOR

- Commercial or residential applications where 1/2 in. (12.7 mm) Regular or 5/8 in. (15.9 mm) Type X, water-resistant gypsum core with water-shedding glass-mat on both sides
- Engineered to be resistant to moisture and mold in wall applications
- Suitable for use in pre dry-in (fast track or pre-rock) and similar applications of wallboard before the building envelope is fully enclosed
- Guaranteed for three years against manufacturing defects and have a 30-month limited-exposure warranty
- Comply with ASTM C1368 specifications for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and glass mat water-resistant gypsum panel
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2560 (U.S.) or EWB2560 (Canada) for more information

### MOISTURE- AND MOLD-RESISTANT PANELS

16 USG and CGC Interior & Exterior Panels

17

**NOTES:**

2. This chart reflects any UL design in which UL Type C panels are listed

3. Noncombustible, moisture- and mold-resistant Type X panels are required

4. Refer to local USG or CGC representative, or call the Customer Service Center.
ABUSE-RESISTANT PANELS

All commercial and institutional buildings have high-traffic areas prone to scraping and bumping. If the materials used aren’t more durable, building owners may be faced with under-performing surfaces, increased maintenance costs and potential safety issues. USG and CGC can help with our comprehensive portfolio of abuse-resistant solutions.

Before selecting materials for your project, be sure to check with your local building code authority. Many municipalities are now adopting International Building Code® (IBC®) standards that require greater levels of abuse resistance in a number of critical areas (such as exit and elevator hoistway enclosures), which ensures the safety of the property and its occupants.

**USG & CGC® BRAND AR INTERIOR PANELS (REGULAR & TYPE X)**

- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X gypsum fiber panels engineered to provide increased resistance to abrasion, indentation and penetration
- No face paper to scratch or tear
- Certified 97% recycled content
- Economical and aesthetically pleasing alternative to concrete block and plaster construction
- Tested to ASTM C1629 for surface abrasion and indentation resistance, and soft- and hard-body impact
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Tested to ASTM C2492 for surface abrasion and indentation damage and soft- and hard-body impact
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1629 specifications for 1/2 in. (12.7 mm) and Type X gypsum wallboard
- Acheived GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet F102 (U.S.) for more information

**USG & CGC® BRAND AR FIRECODE® X PANELS**

- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X gypsum fiber panels engineered to provide increased resistance to abrasion, indentation and penetration
- No face paper to scratch or tear
- Certified 97% recycled content
- Economical and aesthetically pleasing alternative to concrete block and plaster construction
- Tested to ASTM C1629 for surface abrasion and indentation resistance, and soft- and hard-body impact
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Tested to ASTM C2492 for surface abrasion and indentation damage and soft- and hard-body impact
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1629 specifications for 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) moisture-and-mildew-resistant version
- USG, Fibercore® Brand Aqua-Tough® AR Interior Panels (Regular and Type X)
- Refer to product submittal sheet F102 (U.S.) for more information

**USG & CGC® BRAND AR FIRECODE® INTERIOR PANELS**

- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X panel with greater resistance to indentation and impact damage is required
- Areas where additional abuse resistance is desired
- New or repair and remolded construction
- Tapered or Steel-framed fire-resistant walls
- Any UL design in which UL Type AR panels are listed
- Certified 97% recycled content
- Economical and aesthetically pleasing alternative to concrete block and plaster construction
- Tested to ASTM C1629 for surface abrasion and indentation damage and soft- and hard-body impact
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Tested to ASTM C2492 for surface abrasion and indentation damage and soft- and hard-body impact
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1629 specifications for 1/2 in. (12.7 mm) and Type X gypsum wallboard
- Acheived GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet W82133 (U.S.) or EW82133 (Canada) for more information

**USG & CGC® BRAND AR FIRECODE® C PANELS**

- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X panel with greater resistance to indentation and impact damage is required
- Areas where additional abuse resistance is desired
- New or repair and remolded construction
- Tapered or Steel-framed fire-resistant walls
- Any UL design in which UL Type AR panels are listed
- Certified 97% recycled content
- Economical and aesthetically pleasing alternative to concrete block and plaster construction
- Tested to ASTM C1629 for surface abrasion and indentation damage and soft- and hard-body impact
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Tested to ASTM C2492 for surface abrasion and indentation damage and soft- and hard-body impact
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1629 specifications for 1/2 in. (12.7 mm) and Type X gypsum wallboard
- Acheived GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet F102 (U.S.) for more information

**FIBERCORE® BRAND AR INTERIOR PANELS**

- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X panels with greater resistance to indentation and impact damage is required
- Areas where moisture and mildew resistance is desired
- 5/8 in. (15.9 mm) Type X can be used in any UL design in which UL Type FX-G panels are listed
- Refer to product submittal sheet F102 (U.S.) for more information

**FIBERCORE® BRAND AQUA-TOUGH® AR INTERIOR PANELS**

- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X panels with greater resistance to indentation and impact damage is required
- Areas where moisture and mildew resistance is desired
- 5/8 in. (15.9 mm) Type X can be used in any UL design in which UL Type FX-G panels are listed
- Refer to product submittal sheet F102 (U.S.) for more information

**MOISTURE AND MOLD RESISTANCE**

- Panel scores are representative of independent lab tests at the time of manufacture per ASTM D3273, Standard Test Method for Resistance to Growth of Mold on the Surface of Interior Coatings in an Environmental Chamber.
- USG Fiberock® Brand Aqua-Tough™ AR Interior Panels
- Certified 97% recycled content
- No face paper to scratch or tear
- Aqua-Tough™ formulation provides additional moisture and mold resistance over Regular and Type X Fiberock® Brand AR Interior Panels
- Refer to product submittal sheet F102 (U.S.) for more information

**WEIGHT**

- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X panels
- Tapered EDGE PROFILE:
  - 2.8 lb./sq. ft. (12.7 kg/m²)
- 5/8 in. (15.9 mm) Type X panels
- Tapered EDGE PROFILE:
  - 3.1 lb./sq. ft. (14.9 kg/m²)

**NOTES:**

1. Specifications approximate weight for design and display purposes. For specific product weight, check with your local USG or CGC representative, or visit Customer Service Center.
2. Moisture and Mold Resistant. Final users are responsible for independent testing at the time of manufacture per ASTM D3273, Standard Test Method for Resistance of Mold to the Surface of Interior Coatings in an Environmental Chamber.

This USG ACP test was not necessarily representative of the overall performance of building materials in actual use. Given unobstructed project conditions during storage, installation or after completion, any building material can be permanently damaged or ruined by mold. To manage the growth of mold, the user will need cost-effective strategies to protect building components from water exposure during storage and installation and during completion of the building. This can be accomplished by using good design and construction practices.

3. Solar/UV testing demonstrates that when painted with one coat of primer and two coats of latex paint, the abrasion resistance increases to Level 5.
ABUSE-RESISTANT PANELS

**ABSETROCK® BRAND GLASS MAT PANELS MOLD TOUGH® FIRECODE® X PANELS**

- **5/8 in. (15.9 mm) glass mat Type X panels with abuse, moisture and mold resistance**
  - **Intended For:**
    - Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels with greater resistance to indentation and impact damage are required
  - **Product Data:**
    - **Thickness:** 5/8 in. (15.9 mm)
    - **Weight:** 48 lb. (219 kg)
    - **Edge Profile:** Tapered
    - **Independent Rating:** Tapered
    - **UL Type:** AR
  - **Abuse Resistance**
    - **AR Designation:** UL Type AR

**ABSETROCK® Brand MOLD TOUGH® FIRECODE® X Panels**

- **5/8 in. (15.9 mm) paper-faced Type X panels with abuse, moisture and mold resistance**
  - **Intended For:**
    - Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels with greater resistance to indentation and impact damage are required
  - **Product Data:**
    - **Thickness:** 5/8 in. (15.9 mm)
    - **Weight:** 40 lb. (182 kg)
    - **Edge Profile:** Tapered
    - **UL Type:** AR

**ENSTROCK® BRAND MOLD TOUGH® AIR FIRECODE® X PANELS**

- **5/8 in. (15.9 mm) paper-faced Type X panels with abuse, moisture and mold resistance**
  - **Intended For:**
    - Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels with greater resistance to indentation and impact damage are required
  - **Product Data:**
    - **Thickness:** 5/8 in. (15.9 mm)
    - **Weight:** 40 lb. (182 kg)
    - **Edge Profile:** Tapered
    - **UL Type:** AR

**NOTES:**

1. Represents approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or call the Customer Service Center.
2. Full thickness is 0.051 in. (1.29 mm) per ASTM D3273-2.
3. Complies with ASTM C1658 specifications for 5/8 in. (15.9 mm) Type X panels with greater resistance to indentation and impact damage is required.
4. UL Classification as to fire resistance, surface-burning characteristics and noncombustibility.
5. Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA O1350).
6. Refer to product submittal sheet WB2259 (U.S.) and EWB2291 (Canada) for more information.
USG and CGC offer the most extensive portfolio of backerboard and underlayment panel technologies in the industry. No matter the product or material choice, all of our products are backed by the reputation of the Durock® and Fibercore® Brands, and will provide you with a durable moisture- and mold-resistant substrate for your tile project for years to come.  

**PRODUCT DATA**

- **USG and CGC Interior & Exterior Panels**
  - When tested in accordance with ASTM D3273-2, the panels meet or exceed ASTM C1278 specifications.
  - Lightweight, easy to score, snap and fasten.
  - 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) moisture- and mold-resistant gypsum-backing panels can be used in any UL design in which UL Type Durock® Type DCB panels are listed.
  - ***Noncombustible***
  - *Lifetime* (30-year) limited warranty, 10-year limited exterior warranty.

- **FIBERCORE® BRAND UNDERLAYMENT**
  - Areas where moisture and mold resistance is desired.
  - Interior floors and countertops, including kitchens and bathrooms.
  - Underlayment, stone, vinyl, hardwood, laminate and carpet flooring.
  - Areas where moisture and mold resistance is desired.
  - Under and/or behind tile, resilient flooring, carpeting, hardwood flooring, and laminate flooring in new construction and/or remote locations.
  - Substrate for painted walls, surfaces, when transitioning from tile to paint.
  - 5/8 in. (15.9 mm) Type X can be used in any UL design in which UL Type FRX-G Panels are listed.

- **FIBERCORE® BRAND TILE BACKERBOARD**
  - 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) Type X gypsum fiber panels that offer durability and exceptional tile bond.
  - Made from 97% recycled material.
  - Comply with ASTM C1278 for 1/4 in. (6.4 mm) Regular, 5/8 in. (15.9 mm) Type X and water-resistant fiber-reinforced gypsum backing panels.
  - When tested in accordance with ASTM D2373-2, the panels meet or exceed ASTM C1278 specifications.
  - Seamless construction provides strength plus moisture and mold resistance.
  - Monolithic core, will not delaminate.
  - Provides a smooth, flat, paintable surface for wall applications.
  - For use in dry and limited wet areas throughout the home.
  - Superior tile bond.
  - Free of resins, adhesives and solvents that might stain a vinyl floor.
  - Easy to cut, fasten, and install.
  - 20-year limited warranty.
  - Refer to product submittal sheet F033 (U.S.) or F031 (Canada) for more information.

- **FIBERCORE® BRAND GLASS-MAINTILE BACKERBOARD**
  - Areas where moisture and mold resistance is desired.
  - tile, showers, and countertops, including kitchens and bathrooms.
  - Underlayment, stone, vinyl, hardwood, laminate, and carpet flooring.
  - Made from 97% recycled material.
  - When tested in accordance with ASTM D2373-2, the panels meet or exceed ASTM C1278 specifications.
  - 20-year limited warranty.
  - Refer to product submittal sheet F035 (U.S.) or F036 (Canada) for more information.

- **DUROC® BRAND LAY-ON TREATMENTS**
  - Areas where moisture and mold resistance is desired.
  - Made of 97% recycled material.
  - Comply with ASTM C1278 for 1/4 in. (6.4 mm) Regular, 5/8 in. (15.9 mm) Type X and water-resistant panels.
  - When tested in accordance with ASTM D2373-2, the panels meet or exceed ASTM C1278 specifications.
  - Seamless construction provides strength plus moisture and mold resistance.
  - Monolithic core, will not delaminate.
  - Provides a smooth, flat, paintable surface for wall applications.
  - For use in dry and limited wet areas throughout the home.
  - Superior tile bond.
  - Free of resins, adhesives and solvents that might stain a vinyl floor.
  - Easy to cut, fasten, and install.
  - 20-year limited warranty.
  - Refer to product submittal sheet F033 (U.S.) or F031 (Canada) for more information.

- **DUROC® BRAND GLASS-MAINTILE BACKERBOARD**
  - Areas where moisture and mold resistance is desired.
  - Interior floors and countertops, including kitchens and bathrooms.
  - Underlayment, stone, vinyl, hardwood, laminate, and carpet flooring.
  - Made from 97% recycled material.
  - When tested in accordance with ASTM D2373-2, the panels meet or exceed ASTM C1278 specifications.
  - 20-year limited warranty.
  - Refer to product submittal sheet F035 (U.S.) or F036 (Canada) for more information.

**NOTE**

1. Represents approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or visit the Customer Service Center.
2. Pictures and Model Descriptions are representations of independent lab tests at the time of manufacturing per ASTM C1278, Standard Test Method for Resistance to Growth of Mold on Building Materials. This test is not intended to accurately represent the mold performance of building materials in actual use. Given variable project conditions during storage, installation or other conditions, any building material can be overwhelmed by mold. To manage the growth of mold, the best and most cost-effective strategy is to protect building products from water exposure during storage and installation and other operation of this building. This can be accomplished by using good design and construction practices.

**USG and CGC Interior & Exterior Panels**

- **FIBERCORE® BRAND TILE BACKERBOARD**
  - 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X gypsum fiber panels that offer durability and exceptional tile bond.
  - Made from 97% recycled material.
  - Comply with ASTM C1278 for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and water-resistant fiber-reinforced gypsum backing panels.
  - When tested in accordance with ASTM D2373-2, the panels meet or exceed ASTM C1278 specifications.
  - Seamless construction provides strength plus moisture and mold resistance.
  - Monolithic core, will not delaminate.
  - Provides a smooth, flat, paintable surface for wall applications.
  - For use in dry and limited wet areas throughout the home.
  - Superior tile bond.
  - Free of resins, adhesives and solvents that might stain a vinyl floor.
  - Easy to cut, fasten, and install.
  - 20-year limited warranty.
  - Refer to product submittal sheet F033 (U.S.) or F031 (Canada) for more information.

- **FIBERCORE® BRAND GLASS-MAINTILE BACKERBOARD**
  - 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) moisture- and mold-resistant panels with a glass mat face and back.
  - Proprietary coating provides exceptional tile bond performance.
  - Lightweight, easy to score, snap and fasten.
  - Comply with ASTM C1278 specifications for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and coated glass mat water-resistant gypsum backing panels.
  - When tested in accordance with ASTM D2373-2, the panels meet or exceed ASTM C1278 specifications.
  - 25-year limited warranty.
  - Refer to product submittal sheet CB399 (U.S.), CB250 (U.S.) or CB399EG (Canada) for more information.

- **DUROC® BRAND LAY-ON TREATMENTS**
  - Areas where moisture and mold resistance is desired.
  - Under tile, resilient flooring, carpeting, hardwood flooring, and laminate flooring in new construction and/or remote locations.
  - Substrate for painted walls, surfaces, when transitioning from tile to paint.
  - 5/8 in. (15.9 mm) Type X can be used in any UL design in which UL Type FRX-G Panels are listed.

- **DUROC® BRAND GLASS-MAINTILE BACKERBOARD**
  - 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) panels
  - **BASE** For directly applied finishes, tile, stone and thin-bond building in building exteriors.
  - **1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) panels** can be used in any UL design in which UL Type FRX-G Panels are listed.
  - **Lifetime** (30-year) limited warranty, 10-year limited exterior warranty.
  - Refer to product submittal sheet CB399 (U.S.), CB250 (U.S.) or CB399EG (Canada) for more information.

---

**TILE BACKERBOARD**

- **Regular, 5/8 in. (15.9 mm) Type X and water-resistant fiber-reinforced gypsum backing panels**
  - when tested in accordance with ASTM D2373-2, the panels meet or exceed ASTM C1278 specifications.
  - Enhanced proprietary edge performance prevents spinout and crumbling.
  - Comply with ASTM C1278 specifications for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) and fire-resistant cementitious backer board.
  - Lightweight, easy to score, snap and fasten.
  - **1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) panels** can be used in any UL design in which UL Type DCB panels are listed.

- **Durock® Brand Tile Backerboard**
  - 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) moisture- and mold-resistant panels with a glass mat face and back.
  - Proprietary coating provides exceptional tile bond performance.
  - Lightweight, easy to score, snap and fasten.
  - Comply with ASTM C1278 specifications for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and coated glass mat water-resistant gypsum backing panels.
  - When tested in accordance with ASTM D2373-2, the panels meet or exceed ASTM C1278 specifications.
  - 20-year limited warranty.
  - Refer to product submittal sheet CB399 (U.S.) or CB250 (U.S.) or CB399EG (Canada) for more information.

**NOTES**

1. Represents approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or visit the Customer Service Center.
2. Pictures and Model Descriptions are representations of independent lab tests at the time of manufacturing per ASTM C1278, Standard Test Method for Resistance to Growth of Mold on Building Materials. This test is not intended to accurately represent the mold performance of building materials in actual use. Given variable project conditions during storage, installation or other conditions, any building material can be overwhelmed by mold. To manage the growth of mold, the best and most cost-effective strategy is to protect building products from water exposure during storage and installation and other operation of this building. This can be accomplished by using good design and construction practices.
USG was the first to innovate and commercialize shaftliner panels, which allowed for cost-efficient and flexible shafts in tall buildings—and ultimately the construction of taller buildings. Walls that enclose elevator shafts, stairwells and other vertical shafts are the lifeline of a structure. Should a fire occur, firefighters control the use of elevators, leaving stairwells as the only means for occupants to escape. Since these walls are an important component, they must have the strength to withstand lateral loads and provide needed fire protection. High-performing Sheetrock® Brand shaftliner panels are tested and exceed even the most stringent standards, ensuring the safety of the property and its occupants.

### SHEATHLINER PANELS

**SHEETROCK® BRAND GYPSUM LINER PANELS**

- **Intended For:** Shaftwall ceiling membranes
- **Product Data**
  - **Thickness:** 1 in. (25.4 mm)
  - **Width:** 48 in. (1219 mm)
  - **Edge Profile:** Square
  - **Weight 1:** 2.0 lb./sq. ft. (9.8 kg/sq. m.)

- **Us Type Designation:** SLX

**SHEETROCK® BRAND MOULD TOUGH® GYPSUM LINER PANELS**

- **Intended For:** Areas where moisture and mold resistance is desired
- **Product Data**
  - **Thickness:** 1 in. (25.4 mm)
  - **Width:** 48 in. (1219 mm)
  - **Edge Profile:** Square
  - **Weight 1:** 4.0 lb./sq. ft. (19.3 kg/sq. m.)

- **Us Type Designation:** SLX

**SHEETROCK® BRAND GLASS-MAT LINER PANELS MOULD TOUGH®**

- **Intended For:** Areas where moisture and mold resistance is desired
- **Product Data**
  - **Thickness:** 1 in. (25.4 mm)
  - **Width:** 48 in. (1219 mm)
  - **Edge Profile:** Square
  - **Weight 1:** 4.0 lb./sq. ft. (19.3 kg/sq. m.)

- **Us Type Designation:** SLX

### SHEETING PANELS

Focusing on the performance of the building enclosure means reducing building operating energy, improving indoor environmental control and extending the life of the structure via improved durability. USG and CGC offers a variety of high-performing exterior sheathing products, from an economical paper-faced panel to one with a fiberglass faceboard featuring extended moisture and mold resistance. For the greatest level of protection, choose a glass-mat-faced, moisture- and mold-resistant gypsum panel with a noncombustible core integrated with a factory-applied synthetic vapor permeable air barrier membrane.
**SHEATHING PANELS** Continued

**SHEETROCK® BRAND STRAIGHT GLASS-MAT SHEATHING REGULAR & FIRECODE®**

- The lightest 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X glass-mat sheathing with moisture and mild resistance available—up to 52% lighter
- Direct substitue for Sheetrock® Brand Gypsum Sheathing (Regular and Firecode®) when prolonged weather exposure is anticipated
- Cooled fiberglass face to maximize coverage of air/air barrier systems
- Treated air barrier core with glass-mat face and back offers exceptional water resistance

**Comply with ASTM C757 specifications for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and glass-mat gypsum sheathing**

- When tested in accordance with ASTM D3273, the panels meet or exceed ASTM C757 specifications
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Can be exposed to weather for up to 12 months and are guaranteed five years against manufacturing defects
- Refer to product submittal sheet WB29862 (U.S.) and EWS29862 (Canada) for more information

**SHEETROCK® EXAC2® 40 A PANEL**

- 1/2 in. (12.7 mm)Regular and 5/8 in. (15.9 mm) Type X glass-mat-faced, moisture- and mold-resistant gypsum panel with a non-combustible core integrated with a factory-applied synthetic vapor permeable/air/water barrier membrane
- Comply with ASTM C757 specifications for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and glass-mat gypsum sheathing
- When tested in accordance with ASTM D3273, the panels meet or exceed ASTM C757 specifications
- In-plant application provides a uniform membrane with superior bond resulting in predictable air and water barrier performance and adhesion to the base panel
- The component is a composite of the Securock® Exac2® 40 A Barrier System to be installed using Tremco® sealants and transition membranes to achieve air barrier continuity
- Membrane is not climate-dependent and not susceptible to washout
- Panel eliminates air barrier installation in the field
- UV and weather resistance allows the panels to be installed, sealed and left exposed while interior construction begins
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Refer to product submittal sheet BETDO (U.S.) or BETDO (Canada) for more information

**PRODUCT DATA**

**INTENDED FOR**

- Commercial or residential applications where 1/2 in. (12.7 mm)Regular or 5/8 in. (15.9 mm) Type X sheathing panels with moisture and mild resistance are required
- Areas where additional moisture and mild resistance is desired
- Areas where glass-mat panels are desired
- Uses in most exterior systems where generally delayed by exterior finish manufacturer
- Under exterior cladings where conventional gypsum sheathing products have traditionally been used, such as brick veneer, properly detailed Exterior Insulation Finish Systems (EIFS), cladding siding, panel siding, single siding, shake siding, shingled siding and conventional stucco
- 5/8 in. (15.9 mm) Type X can be used in any US design in which US Type USG panels are listed

**PRODUCT DATA**

**MANUFACTURED HOUSING PANELS**

USG offers a complete line of Sheetrock® Brand MH panels designed to meet the stringent needs of the Manufactured Housing Industry. Our solutions, however, are just one part of a time-tested family that includes wallboard, trims and finishing products. All of our MH products are backed by USG’s reputation and experience to ensure the highest performance required by the demanding environment of the assembly line.

**SHEETROCK® BRAND STRAIGHT GLASS-MAT SHEATHING ULTRA-_BASE®**

- The lightest 1/2 in. (12.7 mm) ceiling panels for industrialized construction
- Curing assembly independently tested by Progressive Engineering Inc. to ensure compliance with HUD Manufactured Home Construction and Safety Standards (see Product Evaluation Report PER-01146 for rated designs)
- Beadless with even water-based texture and overlaid insulation
- Noncombustible gypsum core. Class A building material
- ICC Evaluation Service certified for ceiling installations, ESIR-3563
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA C0530)
- Refer to product submittal sheet MH1751 (U.S.) for more information

**INTENDED FOR**

- Industrialized construction
- Panel or perpendicular installation on ceilings with up to 24 in. (610 mm) DC framing when water-based texture is applied
- May be fastened with a two-part polyurethane adhesive or mechanical fasteners

**PRODUCT DATA**

- The lightest 1/2 in. (12.7 mm) ceiling panels for manufactured housing construction
- System tested to ensure compliance with HUD Manufactured Home Construction Standard
- Classified as to shear resistance by Progressive Engineering Inc., Product Evaluation Report PER-01146
- Composition provides low expansion and contraction to resist buckling and warping
- Noncombustible gypsum core. Class A building material
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA C0530)
- Refer to product submittal sheet MH1754 (U.S.) for more information

**INTENDED FOR**

- Industrialized construction
- Installation on walls and ceilings
- May be fastened with a two-part polyurethane adhesive, a one-part polyurethane adhesive, PVC adhesives, mechanical fasteners or a combination of adhesives and mechanical fasteners

**PRODUCT DATA**

- The lightest 1/2 in. (12.7 mm) MH panels for manufactured housing construction
- System tested to ensure compliance with HUD Manufactured Home Construction Standard
- Classified as to shear resistance by Progressive Engineering Inc., Product Evaluation Report PER-01146
- Composition provides low expansion and contraction to resist buckling and warping
- Noncombustible gypsum core. Class A building material
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA C0530)
- Refer to product submittal sheet MH1754 (U.S.) for more information

**SHEETROCK® BRAND MH-5/GYPSUM BASE BOARD**

- 5/16 in. (7.9 mm), 1/2 in. (12.7 mm) and 1/2 in. (12.7 mm) base boards designed to meet the need for time sensitivity and structural integrity
- Third-party system-tested to ensure compliance with HUD Manufactured Home Construction Standard
- Classified as to shear resistance by Progressive Engineering Inc., Product Evaluation Report PER-01146
- Designed to accept laminated vinyl film
- Composition provides low expansion and contraction to resist buckling and warping
- Square edges for tight-fitting panels to minimize water loss
- Noncombustible gypsum core. Class A building material
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA C0530)
- Refer to product submittal sheet MH1754 (U.S.) for more information

**INTENDED FOR**

- Industrialized construction
- Shear and non-shear walls
- May be fastened with a two-part polyurethane adhesive, a one-part polyurethane adhesive, PVC adhesives, mechanical fasteners or a combination of adhesives and mechanical fasteners
- Walls lined with KBC home fume escape and water heater rooms

**PRODUCT DATA**

- The lightest 1/2 in. (12.7 mm) ceiling panels for industrialized construction
- Curing assembly independently tested by Progressive Engineering Inc. to ensure compliance with HUD Manufactured Home Construction and Safety Standards (see Product Evaluation Report PER-01146 for rated designs)
- Beadless with even water-based texture and overlaid insulation
- Noncombustible gypsum core. Class A building material
- ICC Evaluation Service certified for ceiling installations, ESIR-3563
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA C0530)
- Refer to product submittal sheet MH1751 (U.S.) for more information

**INTENDED FOR**

- Industrialized construction
- Panel or perpendicular installation on ceilings with up to 24 in. (610 mm) DC framing when water-based texture is applied
- May be fastened with a two-part polyurethane adhesive or mechanical fasteners

**PRODUCT DATA**

**NOTES:**

1. Represented approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or visit the Customer Service Center.

2. Refer to Section 17.10 of the USG Safety Data Sheet and the California Proposition 65 warning statement for information on VOC emitting material (meets CA 01350).

3. Class A—Noncombustible Gypsum Core. Meets ASTM E84 for noncombustibility. Backed by USG’s reputation and experience to ensure the highest performance required by the demanding environment of the assembly line.
MANUFACTURED HOUSING PANELS  

**SHEETROCK® BRAND MH GYPSUM BASE BOARD FIRECODE® X**

- 5/8 in. (15.9 mm) Type X baseboard designed to meet the need for time sensitivity and structural integrity
- Provide additional fire resistance over Sheetrock® Brand MH Gypsum Base Board
- Third-party system-tested to ensure compliance with HUD Manufactured Home Construction Standard
- Classified as to shear resistance by Progressive Engineering Inc., Product Evaluation Report FEB-0146
- Designed to accept laminated vinyl film
- Composition provides low expansion and contraction to resist buckling and warping
- Square edges for tight-fitting panels to minimize batten width
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet MH1174 (U.S.) for more information

**INTENDED FOR**

- Industrialized construction where 5/8 in. (15.9 mm) Type X panels are required
- Shear and nonshear walls
- May be fastened with a two-part polyurethane adhesive, one-part polyurethane adhesive, PVA adhesive, mechanical fasteners or a combination of adhesive and mechanical fasteners
- Wall liners in HUD Code home furnace and water heater rooms
- Any UL design in which UL Type SCX panels are listed

**PRODUCT DATA**

- THICKNESS: 5/8 in. (15.9 mm)
- WIDTH: 48 in. (1219 mm)
- EDGE PROFILE: Square
- WEIGHT: 2.2 lb./sq. ft. (10.7 kg/sq. m.)

**UL TYPE DESIGNATION**: SCX

**SHEETROCK® BRAND PATCH & REPAIR PANELS**

- Available in 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thicknesses, 2 ft. (610 mm) wide x 2 ft. (610 mm) long
- 5/8 in. (15.9 mm) panel not available in Canada
- Ideal for repairing damaged drywall
- For interior use only
- Easy to carry, transport and store
- Less waste than a full-size panel

**INTENDED FOR**

- Industrialized construction where 5/8 in. (15.9 mm) Type X panels are required
- Shear and nonshear walls
- May be fastened with a two-part polyurethane adhesive, one-part polyurethane adhesive, PVA adhesive, mechanical fasteners or a combination of adhesive and mechanical fasteners
- Wall liners in HUD Code home furnace and water heater rooms
- Any UL design in which UL Type SCX panels are listed

**PRODUCT DATA**

- THICKNESS: 1/2 in. (12.7 mm)
- WIDTH: 48 in. (1219 mm)
- EDGE PROFILE: Square
- WEIGHT: 2.0 lb./sq. ft. (9.8 kg/sq. m.)

**UL TYPE DESIGNATION**: C

**NOTE:**
- Available in 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thicknesses, 2 ft. (610 mm) wide x 2 ft. (610 mm) long
- 5/8 in. (15.9 mm) panel not available in Canada
- Designed to accept laminated vinyl film
- Composition provides low expansion and contraction to resist buckling and warping
- Square edges for tight-fitting panels to minimize batten width
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet MH1174 (U.S.) for more information

**SHEETROCK® BRAND MH GYPSUM BASE BOARD FIRECODE® C**

- 1/2 in. (12.7 mm) enhanced proprietary Type X baseboard designed to meet the need for time sensitivity and structural integrity
- Specially formulated mineral core that provides fire resistance superior to that offered by 5/8 in. (15.9 mm) Sheetrock® Brand MH Gypsum Base Board Firecode® X
- Third-party system-tested to ensure compliance with HUD Manufactured Home Construction Standard
- Classified as to shear resistance by Progressive Engineering Inc., Product Evaluation Report FEB-0146
- Designed to accept laminated vinyl film
- Composition provides low expansion and contraction to resist buckling and warping
- Square edges for tight-fitting panels to minimize batten width
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet MH1174 (U.S.) for more information

**INTENDED FOR**

- Industrialized construction where 5/8 in. (15.9 mm) Type X panels are required
- Shear and nonshear walls
- May be fastened with a two-part polyurethane adhesive, one-part polyurethane adhesive, PVA adhesive, mechanical fasteners or a combination of adhesive and mechanical fasteners
- Wall liners in HUD Code home furnace and water heater rooms
- Any UL design in which UL Type SCX panels are listed

**PRODUCT DATA**

- THICKNESS: 1/2 in. (12.7 mm)
- WIDTH: 48 in. (1219 mm)
- EDGE PROFILE: Square
- WEIGHT: 2.0 lb./sq. ft. (9.8 kg/sq. m.)

**UL TYPE DESIGNATION**: C

**NOTE:**
- Available in 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thicknesses, 2 ft. (610 mm) wide x 2 ft. (610 mm) long
- 5/8 in. (15.9 mm) panel not available in Canada
- Ideal for repairing damaged drywall
- For interior use only
- Easy to carry, transport and store
- Less waste than a full-size panel

**SHEETROCK® BRAND PATCH & REPAIR PANELS**

- For fast, easy drywall repair of large holes (over 2 in. [51 mm]) and areas damaged by water
- When used with fire-rated drywall, meet building code requirements for repairing 1-hour fire-rated drywall partitions
- Suitable for both 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thick panels
- 4 clips, 12 drywall screws

**PATCH & REPAIR SOLUTIONS**

Finished interior walls are subject to abuse from time to time. USG and CGC offer a line of easy-to-install patch & repair products to deal with damage.
