CGC SECUROCK® BRAND GLASS-MAT SHEATHING

IMPROVED COATED FIBERGLASS FACER MAT
TO MAXIMIZE COVERAGE OF AIR/WATER
BARRIER SYSTEMS

CGC 
IT'S YOUR WORLD. BUILD IT.™

CGC has a long history of bringing new and innovative products to market. Our solutions are designed to be safe during manufacturing, delivery, handling and installation, and to perform well when installed and maintained using good construction practices. This commitment continues to be the cornerstone of our product development process with our new and improved **CGC Securock® Brand Glass-Mat Sheathing, now with an improved coated facer mat.**

Widely recognized by its green colour, CGC Securock Glass-Mat Sheathing is the ideal choice for the high-performance built environment.

- Improved coated fiberglass facer mat to maximize coverage of air/water barrier systems
- High resistance to mould and mildew and scores a 10 (highest) when tested in accordance with ASTM D3273*
- Meets or exceeds the requirements of ASTM C1177
- Up to 12 months weather exposure warranty

CGC Securock Glass-Mat Sheathing was tested with the major manufacturers of liquid/fluid-applied air/water barrier systems as well as primers for sheet membrane systems, and results were verified by an independent, third-party study conducted by Progressive Engineering, Inc., PEI Project No. 2014-1296.

NOTICE
We shall not be liable for incidental or consequential damages, directly or indirectly sustained, nor for any loss caused by application of these goods not in accordance with current printed instruction or for other than the intended use. Our liability is expressly limited to replacement of defective goods. Any claim shall be deemed waived unless made in writing to us within thirty (30) days from date it was or reasonably should have been discovered.

SAFETY FIRST!
Follow good safety/industrial hygiene practices during installation. Wear appropriate personal protective equipment. Read MSDS and literature before specification and installation.

***MOISTURE AND MOULD RESISTANCE**
CGC Securock Glass-Mat Sheathing resists moisture and mould and comply with ASTM C1177 for water resistance. In independent lab tests conducted on CGC Securock Glass-Mat Sheathing at the time of manufacture per ASTM D3273, *Standard Test Method for Resistance to Growth of Mold on the Surface of Interior Coatings in an Environmental Chamber*, the panel score was 10.

This ASTM lab test may not accurately represent the mould performance of building materials in actual use. Given unsuitable project conditions during storage, installation or after completion, any building material can be overwhelmed by mould. To manage the growth of mould, the best and most cost-effective strategy is to protect building products from water exposure during storage and installation and after completion of the building. This can be accomplished by using good design and construction practices.
