# SAFETY DATA SHEET

### 1. Identification

**Product identifier** CGC Synko® Brand Redi-Filler™ All Purpose Drywall Compound

Other means of identification

SDS number 61001010017

**Synonyms** Joint Compound (Ready-Mixed), Taping Compound, Mud, Finishing Compound

Recommended use Interior use.

**Recommended restrictions** Use in accordance with manufacturer's recommendations.

Manufacturer/Importer/Supplier/Distributor information

CGC Inc. Company name

Address 735 Fourth Line

Oakville, ON L6L 5B7

A Subsidiary of USG Corporation

(English) 1-800-387-2690 (Français) 1-800-361-1310 **Telephone** 

Website www.cgcinc.com 1-800-507-8899 **Emergency phone number** 

# 2. Hazard(s) identification

Physical hazards Not classified. **Health hazards** Not classified. **Environmental hazards** Not classified.

Label elements

None. Hazard symbol Signal word None. Hazard statement None.

**Precautionary statements** 

Observe good industrial hygiene practices. Prevention Get medical attention/advice if you feel unwell. Response

Store as indicated in Section 7. Storage

Dispose of in accordance with federal, provincial and local regulations. Disposal

Other hazards None known. Supplemental information Not applicable.

# 3. Composition/information on ingredients

#### **Mixtures**

Chemical name	CAS number	%
Perlite	93763-70-3	< 10
Attapulgite	12174-11-7	< 5
Kaolin	1332-58-7	< 1

#### All concentrations are in percent by weight unless ingredient is a gas. Raw materials in this product **Composition comments**

contain respirable crystalline silica as an impurity. Independent, third party industrial hygiene testing of this product and its constituents suggests that under normal conditions the expected use of this product will not result in exposure to respirable crystalline silica that exceeds the OSHA PEL (which is equivalent to the Quebec OEL of 0.05 mg/m3). However, actual exposures to respirable

crystalline silica on a given jobsite must be determined by workplace hygiene testing.

# 4. First-aid measures

Dust irritates the respiratory system, and may cause coughing and difficulties in breathing. Move injured person into fresh air and keep person calm under observation. Get medical attention if Inhalation symptoms persist.

CGC Synko® Brand Redi-Filler™ All Purpose Drywall Compound

932268 Version #: 02 Revision date: 23-May-2024 Issue date: 14-March-2016 1/7 **Skin contact**Contact with dust: Rinse area with plenty of water. Get medical attention if irritation develops or

persists.

Eye contact Dust in the eyes: Do not rub eyes. Flush thoroughly with water. If irritation occurs, get medical

assistance.

**Ingestion** Rinse mouth. Get medical attention if symptoms occur.

Most important

symptoms/effects, acute and

delayed

Under normal conditions of intended use, this material does not pose a risk to health. Dust may

irritate throat and respiratory system and cause coughing.

Indication of immediate medical attention and special

treatment needed

**General information** 

Provide general supportive measures and treat symptomatically.

Ensure that medical personnel are aware of the material(s) involved.

5. Fire-fighting measures

Suitable extinguishing media

Unsuitable extinguishing

media

Use fire-extinguishing media appropriate for surrounding materials.

Not applicable.

Specific hazards arising from

the chemical

Not a fire hazard.

Special protective equipment and precautions for firefighters

Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Self-contained breathing apparatus and full protective clothing must be worn in

case of fire.

Fire fighting

equipment/instructions

Use standard firefighting procedures and consider the hazards of other involved materials.

Specific methods

Cool material exposed to heat with water spray and remove it if no risk is involved.

**General fire hazards** No unusual fire or explosion hazards noted.

#### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

See Section 8 of the SDS for Personal Protective Equipment.

Methods and materials for containment and cleaning up

Large Spills: Scoop spilled materials and recover as much of the product as possible for use. If spillage is unrecoverable dispose according to local, provincial, and federal regulations.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

**Environmental precautions** 

Avoid discharge to drains, sewers, and other water systems.

7. Handling and storage

Precautions for safe handling Avoid inhalation of dust and contact with skin and eyes. Minimise dust generation and

accumulation. In case of insufficient ventilation, wear suitable respiratory equipment. Observe

good industrial hygiene practices. Use proper lifting techniques.

Conditions for safe storage, including any incompatibilities

Store in a cool, dry, well-ventilated place. Store in a closed container away from incompatible materials. Protect from moisture. Keep away from heat. Do not use if material has spoiled, i.e., there is a mouldy appearance or an unpleasant odour. Keep containers closed when not in use.

Filled cartons and pails of joint compound may be stacked a maximum of 3 layers high on a pallet. Pallets may only be stacked a maximum of two high.

# 8. Exposure controls/personal protection

Occupational exposure limits

**US. ACGIH Threshold Limit Values** 

Components	Туре	Value	Form
Kaolin (CAS 1332-58-7)	TWA	2 mg/m3	Respirable fraction.
0 1 111 1 0 0 1			

Canada. Alberta OELs (Occupational Health & Safety Code, Schedule 1, Table 2)

Components	Туре	Value	Form
Kaolin (CAS 1332-58-7)	TWA	2 mg/m3	Respirable.

Kaolin (CAS 1332-58-7)	TWA	5 mg/m3	Respirable dust.	

Biological limit values No biological exposure limits noted for the ingredient(s).

**Appropriate engineering controls**Provide sufficient ventilation for operations causing dust formation. Observe occupational exposure limits and minimise the risk of exposure.

Individual protection measures, such as personal protective equipment

**Eye/face protection** Wear approved safety goggles.

Skin protection

Hand protection It is a good industrial hygiene practice to minimise skin contact. For prolonged or repeated skin

contact use suitable protective gloves.

Other Normal work clothing (long sleeved shirts and long pants) is recommended.

**Respiratory protection** If engineering controls do not maintain airborne concentrations below recommended exposure

limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Use a NIOSH/MSHA approved air purifying respirator as needed to control exposure. Consult with respirator manufacturer to determine respirator selection, use, and limitations. Use positive pressure air supplied respirator for uncontrolled releases or when air purifying respirator limitations may be exceeded. Follow respirator protection program requirements (OSHA 1910.134 and ANSI Z88.2) for all respirator use.

Thermal hazards None.

General hygiene considerations

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment separately from regular wash. Observe any medical surveillance requirements.

# 9. Physical and chemical properties

**Appearance** 

Physical stateSemi-solid.FormPaste.ColourOff-white.

Odour Low to no odour.

Odour threshold Not applicable.

**pH** 7.5 - 10

# 11. Toxicological information

# Information on likely routes of exposure

Airborne dust may irritate throat and upper respiratory system causing coughing. Inhalation

Skin contact May cause allergic skin reactions especially in individuals with pre-existing skin disease such as

eczema. (See Section 16).

Eye contact Airborne dust may cause mechanical eye irritation.

May cause discomfort if swallowed. Ingestion

Symptoms related to the physical, chemical and toxicological characteristics

Dust may irritate eyes and mucous membranes of the nose, throat and upper respiratory system

causing sneezing and/or coughing

# Information on toxicological effects

**Acute toxicity** Not expected to be a hazard under normal conditions of intended use.

Components **Species Test results** 

Kaolin (CAS 1332-58-7)

Acute

Inhalation

LC50 Rat > 2 mg/l, 4 Hours

Oral

LD50 Rat > 5000 mg/kg

SDS Canada

932268 Version #: 02 Revision date: 23-May-2024 Issue date: 14-March-2016 Skin corrosion/irritation Prolonged or repeated skin contact may cause drying, cracking, or irritation.

Serious eye damage/eye

irritation

Direct contact with eyes may cause temporary irritation.

Respiratory or skin sensitisation

Respiratory sensitisation Not a respiratory sensitiser.

The product contains a small amount of sensitising substance which may provoke an allergic Skin sensitisation

reaction among sensitive individuals after repeated contact.

For detailed information, see section 16.

Germ cell mutagenicity Data does not suggest that this product or any components present at greater than 0.1% are

mutagenic or genotoxic.

This product is not expected to increase the risk of cancer. Carcinogenicity

**ACGIH Carcinogens** 

Kaolin (CAS 1332-58-7) A4 Not classifiable as a human carcinogen.

Canada - Manitoba OELs: carcinogenicity

KAOLIN, RESPIRABLE FRACTION (CAS 1332-58-7) Not classifiable as a human carcinogen.

Canada - Quebec OELs: Carcinogen category

Attapulgite (CAS 12174-11-7) Detected carcinogenic effect in humans.

IARC Monographs. Overall Evaluation of Carcinogenicity

Attapulgite (CAS 12174-11-7) 2B Possibly carcinogenic to humans.

3 Not classifiable as to its carcinogenicity to humans.

Reproductive toxicity Not expected to be a reproductive hazard.

Specific target organ toxicity -

single exposure

No data available, but none expected.

Specific target organ toxicity -

repeated exposure

Not classified.

Not an aspiration hazard. **Aspiration hazard** 

**Chronic effects** Prolonged exposure may cause chronic effects. For detailed information, see section 16.

No additional adverse health effects noted. **Further information** 

12. Ecological information

**Ecotoxicity** The product is not classified as environmentally hazardous. However, this does not exclude the

possibility that large or frequent spills can have a harmful or damaging effect on the environment.

**Test results** Components **Species** 

Kaolin (CAS 1332-58-7)

Aquatic Acute

Crustacea LC50 Daphnia magna > 1.1 g/l, 48 Hours

Persistence and degradability

No data available.

Bioaccumulative potential Bioaccumulation is not expected.

Mobility in soil No data available. Other adverse effects None expected.

13. Disposal considerations

**Disposal instructions** Dispose of in accordance with federal, provincial and local regulations. Recycle responsibly.

Local disposal regulations Dispose of in accordance with local regulations.

Hazardous waste code Not regulated.

Waste from residues / unused

products

Dispose of in accordance with local regulations.

Contaminated packaging Dispose of in accordance with local regulations.

14. Transport information

TDG

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

CGC Synko® Brand Redi-Filler™ All Purpose Drywall Compound 932268 Version #: 02 Revision date: 23-May-2024 Issue date: 14-March-2016

#### **IMDG**

Not regulated as dangerous goods.

Transport in bulk according to No Annex II of MARPOL 73/78 and

Not applicable.

# 15. Regulatory information

Canadian regulations

the IBC Code

This product has been classified in accordance with the hazard criteria of the HPR and the SDS contains all the information required by the HPR.

#### **Controlled Drugs and Substances Act**

Not regulated.

Export Control List (CEPA 1999, Schedule 3)

Not listed.

**Greenhouse Gases** 

Not listed.

**Precursor Control Regulations** 

Not regulated.

International regulations

**Stockholm Convention** 

Not applicable.

**Rotterdam Convention** 

Not applicable.

**Kyoto protocol** 

Not applicable.

**Montreal Protocol** 

Not applicable.

**Basel Convention** 

Not applicable.

Issue date14-March-2016Revision date23-May-2024

Version No. 02

**Further information** 

Attapulgite: Carcinogenic to experimental animals via a route of exposure not relevant to human exposure per ACGIH.

Skin Sensitization Potential: This product contains an amount of Triazinetriethanol (THT) (CAS No. 4719-04-4) that is within the approved EPA regulated limits. THT can act as a sensitizer. Numerous human studies with concentrations up to 1% yielded negative (no sensitization) results. However, some results showed positive reactions in concentrations <0.5% mostly in persons with eczema.

Crystalline silica: Raw materials in this product contain respirable crystalline silica as an impurity. Independent, third party industrial hygiene testing of this product and its constituents suggests that under normal conditions the expected use of this product will not result in exposure to respirable crystalline silica that exceeds the OSHA PEL (which is equivalent to the Quebec OEL of 0.05 mg/m3). However, actual exposures to respirable crystalline silica on a given jobsite must be determined by workplace hygiene testing.
