

# USG 500 LANDPLASTER AGRICULTURAL GYPSUM

## SAVANNAH, GA

### DESCRIPTION

- USG 500 Landplaster Agricultural Gypsum is manufactured from high purity, natural gypsum rock, resulting in a product that is uniformly high in analysis and solubility.
- USG 500 Landplaster Agricultural Gypsum is a multisized product, delivering the benefits of consistent flow, even coverage during application, and continuing release of calcium and sulfur across the important growth stage of your crop. Calcium and sulfur—where you need it, when you need it.
- USG 500 Landplaster Agricultural Gypsum has been developed to provide high levels of performance that save time and return a value to both the dealer and farmer. When you weigh your landplaster purchasing decision, please consider the benefits of USG 500 Landplaster—one man spreader operations, fewer trips to the field, less time in the field, and fewer truck deliveries from the source. All these benefits add up to less of your time spent on landplaster and more time to earn a profit on other projects. USG 500 Landplaster will help buy you time, not just better yields.
- Certified as organic by the Organic Materials Review Institute (OMRI®).

### GUARANTEED ANALYSIS
