

# AGILI-TEE™ USG DONN® BRAND DX24 MAIN TEE

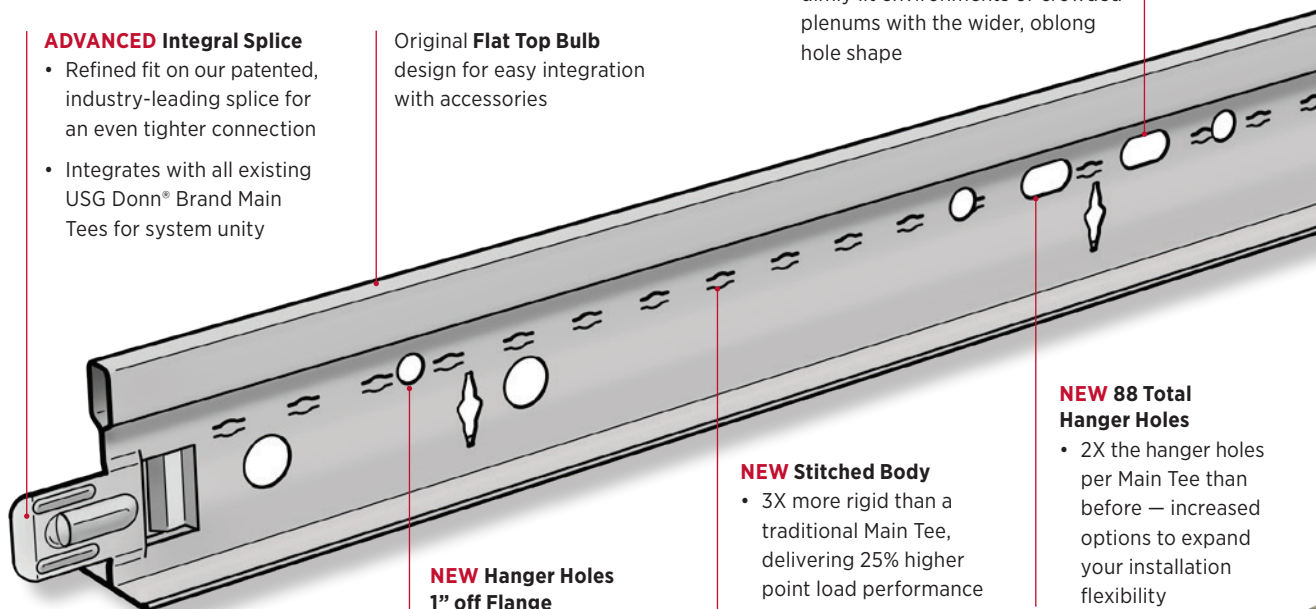

## ADVANCED Integral Splice

- Refined fit on our patented, industry-leading splice for an even tighter connection
- Integrates with all existing USG Donn® Brand Main Tees for system unity

Original **Flat Top Bulb** design for easy integration with accessories

## NEW Oblong Hole Shape

- Easier threading of hanger wires in dimly lit environments or crowded plenums with the wider, oblong hole shape

## NEW Hanger Holes 1" off Flange

- Increased hanger hole height for less hanger wire interference when seating acoustical tile

## NEW Stitched Body

- 3X more rigid than a traditional Main Tee, delivering 25% higher point load performance
- Strong torsional rigidity allows the Main Tees to lie flat, and makes fluid left-hand stabs from a distance possible

## NEW 88 Total Hanger Holes

- 2X the hanger holes per Main Tee than before — increased options to expand your installation flexibility

## NEW Easy Cuts

- Easy-to-cut Main Tee sections with 18% less force required per snip, cutting through completely with just one snip

Today's acoustical ceiling installations are complex and demand increased agility from tradesman. In response to this evolving scene, the design features of our re-engineered USG Donn® Brand DX24 Intermediate Duty Main Tee can put your crew ahead — it's time to work with AGILI-TEE™.
