paper faced
metal bead
and trim

For the most beautiful, cost-effective, problem-free corners, the logical choice is BEADEX paper faced metal bead and trim. Fast, easy installation means reduced labor costs, while superior product performance eliminates costly job callbacks, saving money and ensuring customer satisfaction. With the tape-on versions, nailing is not required, so installation and corner alignment are easier, and there are no nails to pop when wood framing shrinks. The paper tape covering ensures excellent adhesion of joint compounds, textures and paints for a strong, smooth finish.

BEADEX paper faced metal bead and trim provides superior resistance to edge cracking and chipping for a look that stays beautiful despite the stresses of normal building movement and everyday wear and tear. In fact, USG warrants that BEADEX paper faced metal tape-on bead and trim will not edge crack for the lifetime of the structure using recommended application techniques (refer to warranties J1713 (tape-on bead) or J1720 (nail-on bead) for full warranty details). The unique “nose coating” on the paper tape covering resists scuffing and fuzzing from knives and sanding.

Nail-on versions of the bead and trim are designed for applications where nailing or other mechanical fastening is desired. They use the same paper faced metal technology to provide excellent bond adhesion qualities for joint compounds, textures and paints.

For technical product information, refer to BEADEX paper faced metal bead and trim submittal sheet (J1646).

BEADEX® Paper Faced Metal Outside Corner, Tape-On Bead (MICRO BEAD™)

Designed with a wider 1" by 1" profile that's easier to install on all cut edges. Reduced bead height results in less use of joint compound. In most cases, reduces the amount of compound needed by one coat. Standard lengths: 8', 10'.

Style	Dimensions			
	A	B	C	D
MICRO BEAD	3/4"	15/16"	15/16"	3/4"

BEADEX® Paper Faced Metal Offset Outside Corner, Tape-On Bead (B1 OS)

Designed for 135° corners. Offset bead is designed to give a true offset corner with a smaller bead height requiring less compound to finish. Can be used on any thickness of wallboard. Standard lengths: 8', 9', 10'.

Style	Dimensions			
	A	B	C	D
B1 OS	5/8"	3/4"	1/2"	5/8"

Note: OS = Offset

BEADEX® Paper Faced Metal Outside Corner, Nail-On Bead (ULTRA BEAD™)

Use for applications where nailing or other mechanical fastening is required. Has wider flanges for easier nailing and maximum corner coverage. Can be fastened to 1/2" or 5/8" drywall with nails, staples, or screws. Does not meet ASTM C1047. Standard lengths: 8', 9', 10'.

Reveal Trims

BEADEX Paper Faced Metal Reveal, Tape-On Trim (Reveal NB)

This modified tape-on "L" trim solves a variety of problems associated with reveal details on soffits, wall areas, ceilings, light boxes and other interior architectural components. Reveal NB features a paper flange on both trim legs. The additional paper flange eliminates the need to caulk the edge of reveal details, providing a cleaner and straighter line. Available only in No Bead. Standard lengths: 8', 10'.
