## CELEBRATION™ Metal Ceiling Panels

**Application/Building Type:**

Retail Store Environments

**Project Name:**

The GAP

**Featured Products:**

CELEBRATION™ Metal Ceiling Panels

COMPASSO™ Suspension Trim

usg.com

### Custom Made

A sophisticated metal ceiling panel with an integral hinge to accommodate one-person installation and access, as well as an extruded oblong opening for recessed track lights was the answer.

Since the panels of the [CELEBRATION™ metal ceiling system](#) are installed from below, the clearance for installation and removal of the panels are minimal. The snap-up installation with downward access was excellent for shallow plenum areas and ideal for quick installations. Panels were supplied in seven stocked configurations to meet the requirements of various store layout designs. [COMPASSO™ suspension trim](#) framed the system and was pre-engineered and manufactured to support the varied perimeter conditions of the retail space.

A USG Specialty Solutions group project manager worked closely with the client to coordinate all facets of the project, including the architect, contractor and USG manufacturing. The result was a ceiling system that provided the client with a unique ceiling statement and minimized trade interference during fast-track installation.
