

The USG logo is located at the top center of the page. It consists of the letters "USG" in a bold, sans-serif font, followed by a stylized graphic of two overlapping squares, one red and one grey, with a small "TM" trademark symbol.

PROJECT PROFILE

VFW POST 3679
ROSSVILLE, GA

PARTNERING TO REVIVE A VETERAN COMMUNITY: THE VFW RESTORATION

For over a century, The Veterans of Foreign Wars (VFW) organization has worked tirelessly to build a community for veterans and their families in America. From fundraisers to bingo nights, local VFW hall events are at the heart of that effort. Both USG and Shaw Industries are proud supporters of the veteran community. When it was discovered that the VFW hall in Rossville, Georgia was in need of a new floor, USG and Shaw joined forces to help.

The floor of VFW Post 3679 was in a state of disrepair. Large cracks and broken tiles made it impossible to hold community events or rent the facility out to raise funds. In addition, the state of the building was turning new members away and the community was shrinking as a result. With no budget for repairs, Shaw Industries and USG donated materials, time and labor to resurface the floor and restore the VFW hall.

Shaw chose USG Durock™ Brand Quik-Top™ Underlayment for the job. It has the highest compressive strength in the industry (10,000 psi), and with no mechanical preparation needed, the subfloor was ready for flooring (Patcraft's® Timber Grove II 20 mil LVT) the next day. The teams came together and delivered a high-performance flooring solution in just two days.

COMMITMENT TO VETERANS

“Anytime you can partner with a company that has similar values and help veterans, it’s very rewarding.”

STEPHEN MORTON
Director of Corporate Quality,
Shaw Industries

“We’re happy to partner with Shaw to donate material and time and give back to veterans for all they’ve sacrificed for us.”

RANDY MULLET
Director of Technical Sales,
USG Performance Flooring

PRODUCT HIGHLIGHT

USG Durock™ Brand Quik-Top™ Underlayment is a presanded cementitious underlayment that provides a smooth, hard surface over concrete, wood, gypsum and well-bonded existing floor coverings. It's ideal for use in commercial, institutional and rehab construction.
