USG Securock™ Brand Gypsum-Concrete Patch
(FORMERLY PYROFILL®)

Great for repairing poured-in-place roof decks such as gypsum roof decks and lightweight insulating concrete surfaces.

• Durable: over 500 psi compressive strength
• Fast installation
• Noncombustible
• Feather-edge where needed

USG Securock™ Brand Gypsum-Concrete Patch is mill formulated and composed of specially calcined gypsum and wood chips or shavings. It is mixed at the job site with clean water only and poured in place as a patch for existing gypsum decks. USG Securock Gypsum-Concrete Patch is noncombustible and used in several UL-approved roof deck systems.

Exceptional Strength: Engineered to provide over 500 psi of compressive strength that will accept foot traffic and fasteners within four hours of application.

Fire Performance: USG Securock Gypsum-Concrete Patch is a noncombustible material that provides excellent fire performance and is used in several UL-approved roof deck systems.

Versatile: Can be used as a patch in many roof decks such as gypsum, vermiculite concrete, perlite concrete and cellular foam concrete.

• Protect from moisture in storage and on the job.
• Close open bags as tightly as possible; discard compromised or old open bags.
• Not to be applied over moist or wet surfaces.
• Must be protected from direct exposure to moisture after installed.
• Shelf life of six months under protected storage conditions.

INSTALLATION

• Keep all equipment clean.
• Use only clean water for mixing; do not add sand, aggregate or any other material.
• Deck must be structurally sound and free from debris or contaminants that might prevent proper bonding of USG Securock Gypsum-Concrete Patch. Weak or deteriorated material must be removed from the deck to provide a solid base.
• Add USG Securock Gypsum-Concrete Patch to water.
• Spread slurry at once after mixing and screed to desired thickness.
• DO NOT retemper USG Securock Gypsum-Concrete Patch.
• Machine mixing: Use 5–5.6 gal. (18.9–21.2 L) of clean water per 50 lb. (22.6 kg) of USG Securock Gypsum-Concrete Patch; do not overwater.
• Mixing can be accomplished with mortar mixer or pail and drill with a mortar mixer attachment.
• This product provides a minimum dry density of 50 lb./cu. ft. (801 kg/m³).
• Sets in 30–60 minutes.
• Use a spread of 6 sq. ft. per bag for a 2” slab.
• Mechanically attach base sheet to surface after material has set.
• Recommended formboard is: 5/8” USG Securock® Brand Glass-Mat Roof Board or 5/8” USG Securock® Brand Gypsum-Fiber Roof Board.
• If retarder is needed, use USG Gypsum Plaster Retarder (Standard Strength). See USG Gypsum Plaster Retarder (P783) for more information.
USG Securock Gypsum-Concrete Patch is manufactured to conform to ASTM C317, “Standard Specification for Gypsum Concrete.”

- Noncombustibility in accordance with ASTM E136.
