USG SHEETROCK® BRAND
MOLD TOUGH®
GYPSUM LINER PANELS

1 in. (25.4 mm) Type X gypsum liner panels with moisture and mold resistance for use in shaft wall and area separation wall systems

- Feature a noncombustible, moisture-resistant gypsum core encased in moisture- and mold-resistant, 100% recycled blue face and back papers
- Comprehensive product and system testing assures long-term performance and safety
- Double-beveled edges for easy installation
- Comply with ASTM C1396, Standard Specification for Gypsum Board, for 1 in. (25.4 mm), Type X and water-resistant gypsum shaftliner board
- Underwriters Laboratories Inc. (UL) Classification as to fire resistance, surface burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)

USG Sheetrock® Brand Mold Tough® Gypsum Liner Panels (UL Type SLX) are 1 in. (25.4 mm) Type X gypsum liner panels with moisture and mold resistance for use in shaft wall and area separation wall systems. The panels feature a noncombustible, moisture-resistant gypsum core that is encased in moisture- and mold-resistant, 100% recycled blue face and back papers. When tested in accordance with ASTM D3273, Standard Test Method for Resistance to Growth of Mold on the Surface of Interior Coatings in an Environmental Chamber, the panels meet or exceed ASTM C1396 specifications. The face paper is folded around the double-beveled long edges to reinforce and protect the core, and the ends are cut square and even. The panels are UL Classified for fire resistance and can be used in any UL Design in which Type SLX panels are listed.

Note: USG Sheetrock® Brand Mold Tough® Gypsum Liner Panels have been comprehensively tested for fire resistance, structural performance and sound control only when used with USG Sheetrock® Brand Shaft Wall and Area Separation Wall framing components. If alternative framing components are used, the manufacturer(s) of the substituted component(s) shall be consulted to confirm system performance.

INTENDED FOR
- Commercial or residential applications where 1 in. (25.4 mm) moisture- and mold-resistant Type X shaftliner panels are required
- Load-bearing and nonload-bearing wood- or steel-framed fire-rated walls and ceilings
- Elevator, stair, mechanical, solid and horizontal stud shafts
- Shaftwall ceiling membranes
- Unlined air return ducts
- Fire-resistive protection in common walls for townhouse construction

LIMITATIONS
1. Avoid sustained exposure to temperatures exceeding 125°F (52°C).
2. Avoid exposure to excessive, repetitive or continuous moisture before, during and after installation. Eliminate sources of moisture immediately.
3. Must be stored off the ground and under cover in accordance with Gypsum Association's GA-801, Handling and Storage of Gypsum Panel Products.

INTERIOR INSTALLATION, FINISHING AND DECORATING

For installation and finishing recommendations, refer to:
- ASTM C840, Standard Specification for Application and Finishing of Gypsum Board
- Gypsum Association's GA-216, Specifications for the Application and Finishing of Gypsum Panel Products and GA-620, Gypsum Area Separation Firewalls
- Published UL Design or GA File Number
- USG literature USG Area Separation Wall Systems Brochure (SA925) and USG Shaftwall Systems Catalog (SA926)

**Note:**

1. Per ASTM C1396 for 1 in. (25.4 mm) gypsum shaftliner board.

In independent lab tests conducted per ASTM D3273 at the time of manufacture, the panels meet or exceed ASTM C1396 specifications. This ASTM lab test may not accurately represent the mold performance of building materials in actual use. Given unsuitable project conditions during storage, installation or after completion, any building material can be overwhelmed by mold. To manage the growth of mold, the best and most cost-effective strategy is to protect building products from water exposure during storage and installation and after completion of the building. This can be accomplished by using good design and construction practices.

PRODUCT INFORMATION
See usg.com for the most up-to-date product information.

GREENGUARD Certified products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit ul.com/gg.

CAUTION
Dust may cause irritation to eyes, skin, nose, throat, and upper respiratory tract. Cut and trim with a utility knife or hand saw to minimize dust levels. Power tools must be equipped with a dust collection system. Wear eye, skin, and respiratory protection if necessary. If eye contact occurs, flush thoroughly with water for 15 minutes. If irritation persists, call a physician. Do not swallow. If swallowed, call a physician. For more information call Product Safety: 800 507-8899 or see the SDS at usg.com

KEEP OUT OF REACH OF CHILDREN.

TRADEMARKS

NOTE
Products described here may not be available in all geographic markets. Consult your USG Company sales office or representative for information. The information in this document is subject to change without notice. USG Corporation assumes no responsibility for any errors that may inadvertently appear in this document.

NOTICE
We shall not be liable for incidental and consequential damages, directly or indirectly sustained, nor for any loss caused by application of these goods not in accordance with current printed instructions or for other than the intended use. Our liability is expressly limited to replacement of defective goods. Any claim shall be deemed waived unless made in writing to us within thirty (30) days from date it was or reasonably should have been discovered.

SAFETY FIRST!
Follow good safety and industrial hygiene practices during handling and installation of all products and systems. Take necessary precautions and wear the appropriate personal protective equipment as needed. Read Safety Data Sheets and related literature on products before specification and/or installation.

• Comply with ASTM C1396 for 1 in. (25.4 mm), Type X and water-resistant gypsum shaftliner board
• Classified as a Class A Interior Finish Material per Section 803.1 of the International Building Code® (IBC®)
• UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
• Comply with IBC® for non-axial load-bearing wall, transverse load capacity, fire resistance and abuse resistance per Progressive Engineering Inc. (PEI) AER-09038
• Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
