**SHEETROCK® Gypsum Panels**

**1/4" Flexible**

**Flexible gypsum board for curved walls, archways, and staircases.**
- More flexible than standard 1/4" SHEETROCK Panels
- Designed to construct curved surfaces easily
- Quick installation and decoration
- Lightweight, fire-resistant dry construction

### Description

SHEETROCK Brand 1/4" Flexible Gypsum Panels have a non-combustible gypsum core that is encased in a 100 percent recycled face and back paper. The panels are UL classified for fire resistance (type R) and feature tapered edges for easy installation.

### Advantages

- **Dry construction.** Factory-fabricated gypsum panels eliminate excessive moisture in construction.
- **Low in-place cost.** The easily cut gypsum panels apply quickly, permit painting or other decoration, and allow installation of metal or wood trim almost immediately.
- **Fire protection.** The gypsum core will not support combustion or transmit temperatures greatly in excess of 212 °F (100 °C) until completely calcined—a slow process.
- **Crack resistance.** With joints reinforced by one of U.S. Gypsum’s joint systems, SHEETROCK Brand 1/4" Flexible Gypsum Panels form walls and ceilings that are exceptionally resistant to cracks caused by structural, thermal, and hygrometric changes.
- **Nonwarping.** Expansion or contraction under normal atmospheric changes is negligible—won’t cause harmful warping or buckling.

### Limitations

1. Avoid exposure to temperatures exceeding 125 °F (52 °C).
2. Avoid exposure to excessive or continuous moisture before, during and after installation. Eliminate sources of moisture immediately.
3. Non-load bearing
4. Application of gypsum panels over an insulating blanket, installed continuously across the face of the framing members, is not recommended. Blankets should be recessed and blanket flanges attached to sides of studs or joists.
5. Painting Systems—for satisfactory results, painting products and systems should be used which comply with recommendations and requirements in Appendices of ASTM C840.

For priming and decorating with paint, texture, or wallcovering, follow manufacturer’s directions for materials used. All surfaces, including applied joint compound, must be thoroughly dry, dust-free, and not glossy. A prime coat of SHEETROCK® First Coat or a good quality interior latex flat wall paint (undiluted) with high solids content should be applied and allowed to dry before decorating. To improve fastener concealment, where gypsum panel walls and ceilings will be subjected to strong artificial or natural side lighting and/or decorated with a gloss paint (eggshell, semigloss, or gloss), the gypsum panel surface should be skim-coated with joint compound or primed with SHEETROCK First Coat to equalize suction before painting.

### Product and Test Data

The test results listed below ensure that products will perform as intended when designed, specified, installed and maintained according to our printed recommendations.

<table>
<thead>
<tr>
<th>Compliance with Standards</th>
</tr>
</thead>
<tbody>
<tr>
<td>SHEETROCK Brand 1/4&quot; Flexible Gypsum Panels comply with ASTM C36 and C1396.</td>
</tr>
<tr>
<td>Per ASTM E136, gypsum core UL-classified as non-combustible.</td>
</tr>
<tr>
<td>Per ASTM E84, flame spread is 15; smoke developed is 0.</td>
</tr>
</tbody>
</table>
## Thermal Coefficient of Expansion—Unrestrained

40-100 °F (4-38 °C)

\[9.0 \times 10^{-6} \text{ in./in./°F} (16.2 \times 10^{-6} \text{ mm/mm/°C}) (16.2 \mu\text{m/m/°C}).\]

## Hygrometric Coefficient of Expansion—Unrestrained

5-90% r.h.

\[7.2 \times 10^{-6} \text{ in./in./% r.h.} (7.2 \times 10^{-6} \text{ mm/mm/% r.h.}) (7.22 \mu\text{m/m/% r.h.}).\]

## Thermal Resistance “R”

\[0.22 \text{ °F x ft.}^2 \times \text{hr./Btu} (0.04 \times \text{m}^2/\text{W}).\]

### Labeling

Each panel is stamped with an Underwriters Laboratories, Inc. label documenting UL classifications for fire resistant, surface burning characteristics and non combustibility.

### Notice

We shall not be liable for incidental and consequential damages, directly or indirectly sustained, nor for any loss caused by application of these goods not in accordance with current printed instructions or for other than the intended use. Our liability is expressly limited to replacement of defective goods. Any claim shall be deemed waived unless made in writing to us within thirty (30) days from date it was or reasonably should have been discovered.

### SAFETY FIRST!

Follow good safety and industrial hygiene practices during handling and installation of all products and systems. Take necessary precautions and wear the appropriate personal protective equipment as needed. Read material safety data sheets and related literature on products before specification and/or installation.
