USG Agricultural Gypsums

USG Agricultural Gypsums are an excellent source of calcium and sulfur for promoting crop growth in an environmentally safe and non-toxic manner. Due to agricultural gypsums' high solubility (100 times as soluble as limestone), gypsum is quickly available to plants, providing nutrition and enabling higher crop yields. Heavy soil structures also benefit from agricultural gypsum with improved water penetration.

BENEFITS

- Manufactured from high purity gypsum
- Uniformly high in analysis and solubility
- Provides calcium and sulfur for plant nutrition
- Sulfur is in a sulfate form that is readily available for plant uptake
- Improves soil structure by helping to flocculate (loosen) clay soils, allowing air and water to penetrate the soil
- Counteracts salt damage by leaching salt out of the root zone; helps to leach out toxic aluminums from the root zone; can also improve soils with alkalinity problems
- Does not appreciably alter soil pH
- USG Ben Franklin® Agricultural Gypsum, USG Ben Franklin® No. 1 Agri Gypsum, USG Landplaster Agri Gypsum, USG 500 Landplaster and USG Ben Franklin® Aquacal™ Gypsum are certified as organic by the Organic Materials Review Institute (OMRI®)
- USG Agricultural Gypsum Products are available in various sizes ranging from solution grade to granular

PRODUCT LOCATIONS

PRODUCT	LOCATIONS
USG Ben Franklin® Agricultural Gypsum	Baltimore, MD Southard, OK
USG Ben Franklin® Agricultural Gypsum – Regular Grind and Coarse	Detroit, MI
USG Ben Franklin® No. 1 Agri Gypsum	Alabaster, MI Empire, NV Ocotillo Wells (Plaster City), CA
USG Landplaster Agri Gypsum	Ocotillo Wells (Plaster City), CA
USG 500 Landplaster	Metro Ports Terminal, Savannah, GA Chesapeake Terminal, White Marsh, Baltimore, MD
USG EcoGypsum™	Contact your local representative for location details.
USG Ben Franklin® Aquacal® Gypsum	Southard, OK
