USG DUROCK™ BRAND MULTI-USE
SELF-LEVELING UNDERLAYMENT

- No mechanical preparation required for most applications
- Fast application and fast setting allow for return of light traffic within hours
- Ideal topping for radiant heat installations
- Meets resilient floor industry specifications for underlayment under commercial goods
- Exceptionally smooth, crack-resistant surface
- Helps maximize sound isolation between floors/units
USG DUROCK™ BRAND MULTI-USE
SELF-LEVELING UNDERLayment

At USG, we know how important it is to get the floor right. Rework is expensive, and delays are costly. That’s where USG Performance Flooring comes in. We offer the most innovative products and systems, ensuring you get the right floor the first time.

DESCRIPTION

USG Durock™ Brand Multi-Use Self-Leveling Underlayment is a high-quality, presanded, versatile cementitious floor underlayment. It can be easily applied at thicknesses of up to 3 in. (76 mm). Its high compressive strength at low thicknesses provides superior underlayment performance for higher traffic areas. USG Durock™ Multi-Use self-leveling underlayment is the ideal substrate for a variety of floor coverings, ranging from vinyl to wood to tile. High production rates, light weight with high compressive strength, and exceptional sound and fire resistance make USG Durock™ Multi-Use self-leveling underlayment an ideal underlayment alternative.

USG poured cementitious floor underlayment systems provide an economical way to achieve lightweight, fire-resistant, sound-rated, smooth and monolithic floors in residential and light-commercial construction. Typical applications are less labor-intensive than many other types of construction and provide high fire ratings characteristic of gypsum systems. Designed sound systems provide for improved STC and IIC ratings when used with sound attenuation products. Contact USG for more information.

APPLICATIONS

Concrete slabs, prestressed concrete, concrete planks, wood subfloors, thin cutback adhesive, non-water-soluble adhesive residues and well-bonded existing floor coverings such as ceramic tile, vinyl composition tile (VCT), cement terrazzo, epoxy coatings and radiant heat installations.

VOC EMISSIONS

USG Durock™ Multi-Use self-leveling underlayment is defined as a “Low Emitting” material per California Department of Public Health CDPH/EHLB/Standard Method Version 1.1, 2010 (CA Section 01350) for school classroom, single-family residence and private-office modeling scenarios, and meets USGBC’s LEED® v4 emission requirements.

EXCLUSIVE 10-YEAR LIMITED SYSTEM WARRANTY

A 10-year limited system warranty applies when using USG Durock™ Multi-Use self-leveling underlayment sealed with USG Durock™ Brand X2 Primer-Sealer and an XL Brands® manufactured adhesive. Please contact USG for further details.

PRODUCT DATA

| Approximate Compressive Strength ASTM C109 (modified) | 4,100 psi (28.3 MPa) |
| Approximate Dry Density | 118-124 lbs./cu. ft. (1,890-1,986 kg/m³) |
| Mixing Ratio | 4.0–4.8 qt. (3.75 - 4.5 L) of water per 50 lb. (22.7 kg) bag |
| Approximate Coverage | 7 sq. ft. (.7 m²) per bag at 3/4 in. (19 mm) thickness |
| Approximate Flow Time | 15–20 minutes at 70 °F (21 °C) |
| Approximate Final Set ASTM C191 | 60–90 minutes |
| Approximate Walkable (light foot traffic) | 2 hours (after set) |
| Thickness Range—Over Wood Subfloor Without Wire Lath | 3/4 in. (19 mm)–3 in. (76 mm) |
| Thickness Range—Over Wood With Wire Lath | 1/2 in. (12.7 mm)–3 in. (76 mm) |
| Thickness Range—Over Concrete Subfloor | 3/8 in. (9.5 mm)–3 in. (76 mm) |
| Surface pH Range ASTM F710 | 11 |
| Packaging | 50 lb. (22.7 kg) multiwall paper bags |

Notes:

1. ASTM C109 modified refers to air drying as opposed to damp curing.
2. Results published herein were achieved under controlled laboratory conditions. Actual field results may differ due to environmental conditions, inconsistent proportioning of field-applied water and USG Durock™ Multi-Use self-leveling underlayment, as well as differences in mixing/pumping equipment.
