USG DUROCK™ BRAND ULTRADRY™
SELF-LEVELING UNDERLAYMENT

• Fast-track solution for commercial and institutional repair and renovation
• Allows for application of ceramic tiles in 4 hours and most floor coverings in 12 hours; wood in 24 hours
• Featheredge to 5 in. (127 mm) neat
• No mechanical preparation required for most applications
• Fast and easy to mix
USG Durock™ Brand UltraDry™ Self-Leveling Underlayment

New construction, major renovation or minor repairs – USG has a solution for every flooring demand. USG Durock™ Fast Track Products offer quick return to service – saving you time and money.

DESCRIPTION

USG Durock™ Brand UltraDry™ Self-Leveling Underlayment is a proprietary next-generation calcium aluminate cement product with an innovative quick-drying technology developed by USG for interior use in commercial, institutional and rehab construction. USG Durock™ UltraDry Self-Leveling Underlayment is the ideal product for fast-track renovation when the space needs to return to use as early as 24 hours. Its innovative quick, self-drying technology allows for the application of most floor coverings in as little as 12 hours after the underlayment application. USG Durock™ UltraDry Self-Leveling Underlayment requires minimal subfloor preparation and provides a smooth, hard surface.

USG Durock™ UltraDry Self-Leveling Underlayment is suitable for a variety of floor coverings and exceeds commercial resilient floor-covering requirements for underlayments with compressive strengths exceeding 4,000 psi (27.5 MPa). USG Durock™ UltraDry Self-Leveling Underlayment is specially designed to have exceptional surface hardness, resistance to indentation and floor damage from other trades in addition to minimizing the need for repair patching.

USG Durock™ UltraDry Self-Leveling Underlayment can be stained, or when used with an appropriate clear coating system, can be used as a finished floor and provides a concrete look for industrial, commercial or loft style units.

APPLICATIONS

Concrete slabs, pre-stressed concrete and concrete planks; APA-rated exterior glue plywood or oriented strand board (OSB).

PRODUCT DATA

<table>
<thead>
<tr>
<th>Thickness Range</th>
<th>Featheredge – 5 in. (127 mm)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approximate Compressive Strength ASTM C1708 (Modified)</td>
<td>4,200 psi (29.0 MPa)²</td>
</tr>
<tr>
<td>Approximate Flow Time at 70 °F (21 °C)</td>
<td>20–30 minutes</td>
</tr>
<tr>
<td>Approximate Coverage Rate</td>
<td>22 sq. ft. (2.04 m²) per bag at 1/4 in. (6 mm) thickness</td>
</tr>
<tr>
<td>Approximate Final Set ASTM C1708</td>
<td>60–100 minutes²</td>
</tr>
<tr>
<td>Approximate Light Foot Traffic</td>
<td>120–180 minutes</td>
</tr>
<tr>
<td>Time to Floor Covering</td>
<td>12 hours (4 hours for ceramic tile, 24 hours for wood)</td>
</tr>
<tr>
<td>Approximate Dry Density</td>
<td>125–152 lbs./cu. ft. (2002-2114 kg/m³)²</td>
</tr>
<tr>
<td>Packaging</td>
<td>50 lb. (22.7 kg) multiwall paper bags</td>
</tr>
</tbody>
</table>

Notes

1. ASTM C1708 modified refers to air drying as opposed to damp curing.
2. Results published herein were achieved under controlled laboratory conditions. Actual field results may differ due to environmental conditions, inconsistent proportioning of field-applied water and USG Durock™ Quik-Cover Self-Leveling Underlayment, as well as differences in mixing/pumping equipment.
