Up to 5 minutes

15 - 30

**Notes**

d. May be retempered multiple times without addition of water.

e. For thicknesses exceeding 3 in. (76 mm), aggregate is required.

For detailed instructions including application restrictions and how to prepare the subfloor, see the corresponding product submittal sheets and SDSs at usgperformanceflooring.com.

**USG Durock™ Matrix Bond Enhancer**

USG Durock™ Matrix Bond Enhancer is a liquid additive that improves flexibility and adhesion, as well as impact resistance and coverage rates. When mixed with these patching compounds, the material can be applied over most interior floor coverings, including ceramic and quarry tile, terrazzo, wood and interior concrete, as well as properly prepared residues of cutback and other non-water-soluble adhesives on concrete and epoxy coatings.

**PRODUCT**

**MIX DESIGN**

**USG Durock™ MATRIX™ BOND ENHANCER**

**COVERAGE AT 1/32 IN. (.8 MM)**
