

An industry-leading manufacturer of **building products** and **innovative solutions**.

For more than 115 years, we have expanded the boundaries of building science with products and systems that are safer, lighter, stronger and more sustainable.

Our products have been used to build some of the world's most iconic structures, such as the Freedom Tower in New York, Burj Khalifa in Dubai, and Lotte Tower in Seoul.

2018

WHAT WE MAKE

Our wall, ceiling, flooring, sheathing and roofing products enable our customers to build the outstanding spaces where people live, work and play.

Wallboard and Surfaces

Our Gypsum Division is home to the iconic products like **Sheetrock® brand drywall** and joint treatment that made us synonymous with high-quality building materials and solutions, as well as innovative products and systems simplify work, speed up the construction process and reduce the number of people required on job sites.

Ceilings

Our Ceilings Division includes products from traditional grid suspension ceiling systems, the industry's first integrated acoustical drywall system and specialty products that inspire thoughtful designs.

OUR VALUES

SAFETY

QUALITY

EFFICIENCY

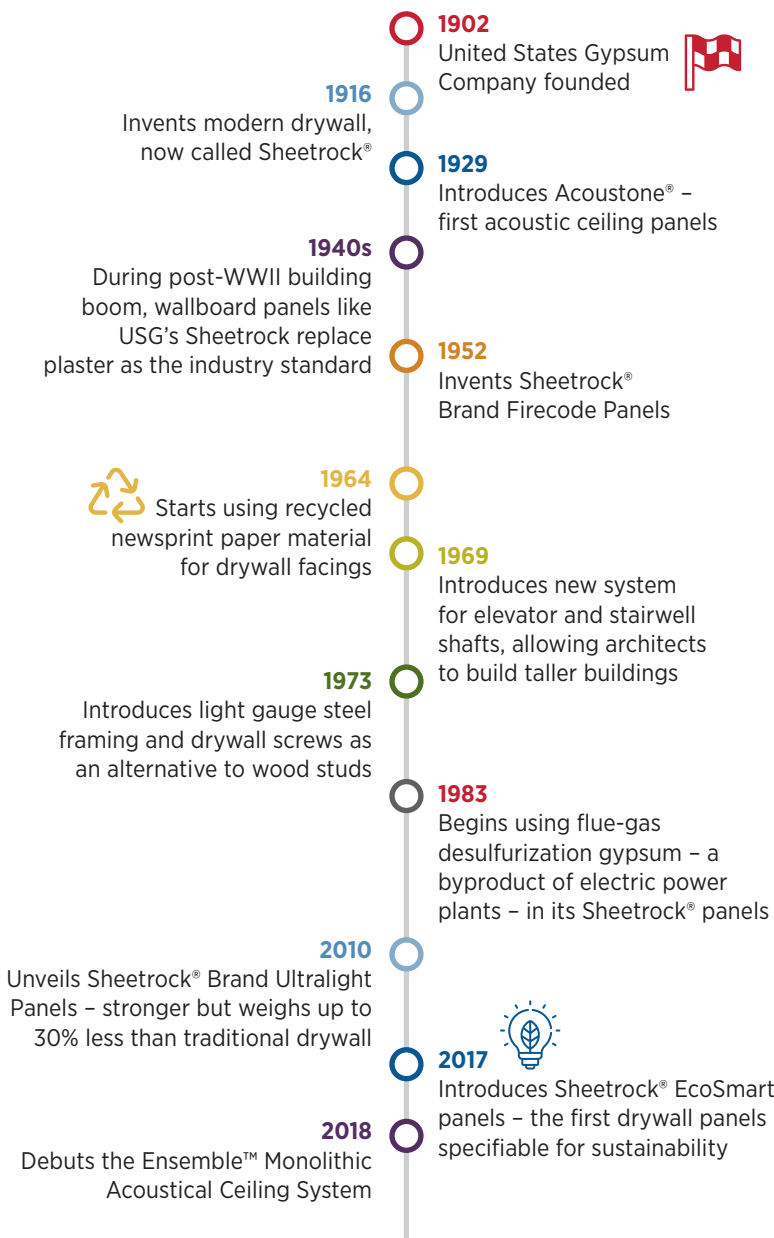

INTEGRITY

DIVERSITY

INNOVATION

As the inventor of drywall, the drive to innovate is part of our fabric across all levels of the company. Over the last 115 years, **USG has invented some of the most important advancements in the building materials space**, and the innovations we have brought to market have helped millions of people and transformed the industry. Our 200,000 ft² Corporate Innovation Center (CIC) in Libertyville, Illinois, where we create, test and perfect our products, is a testament to our dedication to innovation.

SUSTAINABILITY

Sustainable practices have been core to USG's business and choices for more than 100 years. It's how we build a better world for our customers, employees and communities while caring for our business and the world around us.

USG is the only wallboard manufacturer to join in the **Architecture 2030 Challenge for Products**, where we voluntarily work to lower, by half, our carbon footprint in sourcing, manufacturing and transportation by 2030. This is part of a larger effort to design, build and operate carbon-neutral buildings by 2050.

One example is **USG Sheetrock® Brand EcoSmart Panels**, which are manufactured with up to:

 **25%**
less water

 **20%**
less CO₂

SAFETY

The safety and well-being of our people has always been our top priority. We engage employees at all levels of the organization to create a safety-first culture that is dedicated to preventing injuries and we are proud that our manufacturing facilities' lost time incident rate is **93% better than the industry average**.

In 2016, our commitment to safety excellence was recognized by the National Safety Council, and we were awarded the prestigious Robert W. Campbell Award, the preeminent honor of excellence in integrating environmental, health and safety management into business operations.
