

USG LEVELROCK™ BRAND NO-GO™ HYDRATION INHIBITOR

Superior set-time retardation liquid

- Effectively slows setting time/lengthens working time of floor underlayments
 - For use with USG Levelrock® Brand engineered cementitious underlayments
 - Applied by USG Levelrock authorized applicators
-

DESCRIPTION

USG Levelrock™ Brand No-Go™ Hydration Inhibitor is an extremely effective set-time retardation liquid sold exclusively to USG Levelrock authorized applicators as a means to slow down the set time or to lengthen the working time of all USG Levelrock® Floor Underlayments and certain USG Durock™ Brand Self-Leveling Underlayments (contact your USG/Alcorp Technical Representative for product viability). USG Levelrock No-Go hydration inhibitor is a very powerful retarder and should be used only after consulting with your USG/Alcorp Technical Representative.

USG Levelrock No-Go hydration inhibitor is also recommended for use during the initial and final rinsing of hoses. Hoses conditioned with USG Levelrock No-Go hydration inhibitor perform better with little or no build-up of hydrated gypsum.

LIMITATIONS

1. Do not use in exterior applications.
-

APPLICATION

A USG/Alcorp Technical Representative will determine the actual dose per batch based on the specific USG Levelrock product and the retardation effect needed.

Always add USG Levelrock No-Go hydration inhibitor directly to the mixing water before adding USG Levelrock engineered cementitious underlayment and sand.

When USG Levelrock No-Go hydration inhibitor is used as an additive to the initial or final washout of mixing equipment and hoses, add 2 ounces (56.7 g) per 10 gallons (37.9 L) of rinse water and then introduce to the mixer/pump and flush through the hose.

STORAGE

Protect USG Levelrock No-Go hydration inhibitor from freezing. USG Levelrock No-Go hydration inhibitor has a shelf life of one year from date of manufacture.
