A WALLBOARD PORTFOLIO
THAT WORKS AS HARD AS YOU

SHEETROCK® BRAND
SECUROCK® BRAND
DUROCK® BRAND
FIBEROCK® BRAND
For over 100 years, we have led the building industry in drywall innovation. In that time, our Sheetrock®, Securock®, Durock® and Fiberock® Brands have become the standard for highest-quality and best-performing walls and ceilings.

Offering the nation’s largest-selling, broadest line of interior and exterior panels, all of our products exceed the essential requirements of performance, safety, efficiency, workability, strength and ease of decoration that are characteristic of quality construction.

Beyond outstanding products, we also offer expertise, technical support and nationwide distribution. All driven by a dedication to finding solutions for you.

We do all of this because we believe that our reputation is built on yours. When you succeed, we succeed. And your exceptional work—combined with our solutions—brings new levels of performance, enabling you to create the spaces where people live, work and play.

Gypsum products are manufactured from a mineral rock (gypsum) that is gray to white in color and is found in abundant deposits around the world or from recaptured gypsum. Basic gypsum consists of calcium sulfate chemically combined with water of crystallization (CaSO₄ + 2H₂O). The combined water makes up about 20% of gypsum rock’s weight (50% by volume) and gives the material its characteristic fire-resistant qualities and high adaptability to varied construction use.

The gypsum that ends up in gypsum wallboard can come from two sources. Gypsum rock can be mined from the ground, as sources are abundant. This mineral is the second most plentiful one found on earth. Recaptured gypsum is a byproduct that can be obtained from several processes, including flue gas desulfurization (FGD). Recaptured gypsum has the exact same chemical composition as gypsum mined from the earth. Wallboard made from recaptured gypsum is the same as wallboard made from mined gypsum rock.

USG and CGC gypsum panel products are produced using a highly automated, continuous process. After the gypsum core that’s sandwiched in paper or fiberglass has set, the boards are cut to length, dried and packaged for shipment. Rigorous quality control measures are applied throughout the manufacturing process.

The constant desire to improve our product line is representative of our many efforts to be a leader in the manufacture of the industry’s most specified and used gypsum panels.
SUSTAINABILITY BEST PRACTICES

For over 100 years, USG and CGC has led the building sector’s effort in developing and supplying sustainable construction materials. Today, sustainability is integrated into the design and manufacture of every wall, ceiling and flooring product.

Sustainable Supply Chain

We use recaptured gypsum, a byproduct of flue gas desulfurization (FGD)—a scrubbing technology utilized by many coal-fired power plants to reduce sulfur dioxide, which is the main cause of “acid rain.” Recaptured gypsum is chemically produced and recovered in processes that we helped to pioneer for its use as an alternative to naturally occurring gypsum. Recaptured gypsum provides the same chemical (calcium sulfate dihydrate) and physical properties as natural gypsum and diverts this material from overburdened landfills. Raw materials used in our products are carefully selected and go through a rigorous screening procedure. Incoming raw materials are tested for contaminants by internal and third-party labs for consideration of worker, environmental, and end-user exposure.

In addition to the selection of raw materials, we are mindful of product transport. Freight transportation can be a large contributor to air pollution, which is why we continually consider the environmental footprint of our transportation activities and do our part to reduce environmental impact.

Carbon Reduction

Every product has an impact on the environment. Raw material extraction, manufacturing and use may contribute towards resource depletion, pollution and climate change. Part of creating more sustainable products is understanding the product’s embodied carbon, which is the quantity of greenhouse gas (GHG) emissions that are produced during the life cycle of the product. In our efforts to reduce these negative impacts and make products for a more sustainable future, Sheetrock® Brand EcoSmart Panels revolutionized wallboard manufacturing, significantly reducing the product’s global warming potential.

Product Transparency

USG and CGC lead the building industry in the development of high-performance products designed to meet specifications, construction and sustainability requirements. As a manufacturer, we have a responsibility to be transparent about the building materials that make up the indoor environment. Most USG and CGC gypsum panels have Health Product Declarations (HPDs) that disclose at least 1000 ppm of the chemical formulation. Other transparency tools include Declare Labels, Environmental Product Declarations (EPDs) and GREENGUARD Gold certification. Our products contribute to USGBC® LEED® v4/v4.1 credits, contribute to multiple features found in the WELL Building Standard™ v3.0, and most products are free of Living Building Challenge™ v4.0 Red-List chemicals and can be used on Living Building Challenge Petal Certification projects. For more information on the sustainability attributes of USG and CGC gypsum panels, visit usg.ecomedes.com.
TYPICAL GYPSUM PANEL APPLICATIONS FOR COMMERCIAL SPACES

A. ABUSE-RESISTANT PANELS: Any Sheetrock® Brand gypsum panel labeled as “Abuse-Resistant (AR)”

B. SHEATHING PANELS: Any Securock® Brand gypsum panel labeled as “Sheathing”

C. FIRE-RESISTANT PANELS: Any Sheetrock® Brand gypsum panel labeled as “Firecode®” or “Ultracode®”

D. IMPACT-RESISTANT PANELS: Any Sheetrock® Brand gypsum panel labeled as “Very High Impact-Resistant (VHR)”

E. MOISTURE- AND MOLD-RESISTANT PANELS: Any Sheetrock® Brand gypsum panel labeled as “Mold Tough®”

F. SHAFTLINER PANELS: Any Sheetrock® Brand gypsum panel labeled as “Liner”

G. TILE BACKERBOARD: Any Durock® or Fiberock® Brand panel labeled as “Tile Backerboard” or “Underlayment”

TYPICAL GYPSUM PANEL APPLICATIONS FOR RESIDENTIAL SPACES

H. ABUSE-RESISTANT PANELS: Any Sheetrock® Brand gypsum panel labeled as “Abuse-Resistant (AR)”

I. SAG-RESISTANT PANELS: Any Sheetrock® Brand gypsum panel labeled as “Sag-Resistant”, or has an accompanying ICC® ESR report

J. SHEATHING PANELS: Any Securock® Brand gypsum panel labeled as “Sheathing”

K. FIRE-RESISTANT PANELS: Any Sheetrock® Brand gypsum panel labeled as “Firecode®”

L. LIGHTWEIGHT PANELS: Any Sheetrock® Brand gypsum panel labeled as “UltraLight” or “EcoSmart”

M. MOISTURE- AND MOLD-RESISTANT PANELS: Any Sheetrock® Brand gypsum panel labeled as “Mold Tough®”

N. TILE BACKERBOARD: Any Durock® or Fiberock® Brand panel labeled as “Tile Backerboard” or “Underlayment”

LIGHTEST AND SUSTAINABLE PANELS

For more than 100 years, we have remained committed to manufacturing products that are in sync with the environment. As a leading manufacturer of gypsum panels, the world over, we have a responsibility to produce products that not only perform on the job site, but also perform with the planet.

**LIGHTWEIGHT AND SUSTAINABLE PANELS**

- Ultralightweight and sustainable 5/8 in. (15.9 mm) panels
- Meet Architecture 2030 Challenge for Products
- Living Building Challenge™ Red List Free
- Complies with ASTM C1396 specifications for 5/8 in. (15.9 mm), non-ordinary use and non-combustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA O1350)
- UL Classification as to fire resistance — 30-min. and 1-hr. fire-rated walls
- Comply with USDA C1396 specifications for 5/8 in. (15.9 mm) and non-ordinary use and non-combustibility
- Comply with UL Type X specifications for 5/8 in. (15.9 mm) Type X panels
- Offer comparable strength and sag resistance to standard 5/8 in. (15.9 mm) Type X gypsum wallboard
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA O1350)
- UL Classification as to fire resistance — 30-min. and 1-hr. fire-rated walls
- Any UL Design in which UL Type FC50 panels are listed
- Any UL Design in which UL Type X panels are listed
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm), non-ordinary use and non-combustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA O1350)
- UL Classification as to surface-burning characteristics and noncombustibility
- Refer to product submittal sheet WB2501 (U.S.) for more information
- Commercial or residential applications where 5/8 in. (15.9 mm) panels are required
- New or remodel and remodel construction
- Single-layer wood- or steel-framed 10-min. fire-rated walls
- Double-layer steel-framed 1-hr. fire-rated walls
- Any UL Design in which UL Type FC50 panels are listed
- Refer to product submittal sheet WB2501 (U.S.) for more information

**LB3 BRAND ECOSMART PANELS FIRECODE X**

**INTENDED FOR**

- Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels are required
- New or remodel and remodel construction
- Single-layer wood- or steel-framed fire-rated walls, ceilings and columns
- Wall, column, floor- and roof-ceiling applications and horizontal membranes
- Any UL Design in which UltraLight Innovation Type X (ULIX™) panels are listed

**PRODUCT DATA**

- **THICKNESS:** 5/8 in. (15.9 mm)
- **WEIGHT:** 48 lb. (219 kg)
- **EDGE PROFILE:** Tapered
- **WEIGHT:** 1.8 lb./sq. ft. (8.3 kg/sq. m.)

**NOTES:**

- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA O1350)
- UL Classification as to surface-burning characteristics and noncombustibility
- Refer to product submittal sheet WB2501 (U.S.) for more information
- Commercial or residential applications where 5/8 in. (15.9 mm) panels are desired
- New or repair and remodel construction
- Non-fire-rated wood- or steel-framed walls and ceilings
- Parallel or perpendicular installation on ceilings with 24 in. (610 mm) OC framing when water-based texture is applied

**LB3 BRAND ULTRALIGHT ULTRALIGHT GYPSUM BASE IMPERIAL**

**INTENDED FOR**

- Commercial or residential applications where 5/8 in. (15.9 mm) panels are desired
- New or repair and remodel construction
- Non-fire-rated wood- or steel-framed walls and ceilings
- Parallel or perpendicular installation on ceilings with 24 in. (610 mm) OC framing when water-based texture is applied

**PRODUCT DATA**

- **THICKNESS:** 1/2 in. (12.7 mm)
- **WEIGHT:** 48 lb. (219 kg)
- **EDGE PROFILE:** Tapered
- **WEIGHT:** 1.8 lb./sq. ft. (8.3 kg/sq. m.)

**NOTES:**

- Commercial or residential applications where 5/8 in. (15.9 mm) panels are desired
- New or repair and remodel construction
- Non-fire-rated wood- or steel-framed walls and ceilings
- Parallel or perpendicular installation on ceilings with 24 in. (610 mm) OC framing when water-based texture is applied

**LB3 BRAND ULTRALIGHT ULTRALIGHT SUPPLEMENTAL BASE IMPERIAL**

**INTENDED FOR**

- Commercial or residential applications where 5/8 in. (15.9 mm) panels are desired
- New or repair and remodel construction
- Non-fire-rated wood- or steel-framed walls and ceilings
- Planner or perpendicular installation on ceilings

**PRODUCT DATA**

- **THICKNESS:** 1/2 in. (12.7 mm)
- **WEIGHT:** 48 lb. (219 kg)
- **EDGE PROFILE:** Tapered
- **WEIGHT:** 1.8 lb./sq. ft. (8.3 kg/sq. m.)
**LIGHTWEIGHT PANELS**

**Sheetrock® Brand Ultralight Panels Firecode SX®**
- Up to 35% lighter than standard 5/8 in. (15.9 mm) Type X panels
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and non-Type X gypsum wallboard
- UL Classification as to fire resistance — 30-min. and 1 hr. fire-rated walls
- Offer comparable strength and sag resistance to standard 5/8 in. (15.9 mm) Type X panels
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet EWB2857 (Canada) for more information

**Sheetrock® Brand Ultralight Panels Firecode X**
- The first lightweight 5/8 in. (15.9 mm) Type X panel
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and Type X gypsum wallboard
- Offer comparable sound, strength and sag resistance to standard 5/8 in. (15.9 mm) Type X panels
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet EWB2506 (Canada) for more information

**Sheetrock® Brand Ultralight Panels Pole Tough™**
- The first and thinnest 1/2 in. (12.7 mm) panels with moisture and mold resistance
- Noncombustible, moisture-resistant gypsum core encased in moisture- and mold-resistant paper
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm), water-resistant gypsum wallboard and exterior gypsum soffit board
- UL Classification as to surface-burning characteristics and noncombustibility
- When tested in accordance with ASTM D2327, the panels meet or exceed ASTM C1396 specifications
- Score, snap, instal and finish just like standard drywall
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2660 (U.S.) or EWB2660 (Canada) for more information

**REGULAR PANELS**

Sheetrock® Brand is the most preferred and widely used brand of gypsum panels. When paired with other components, these gypsum panels provide the highest performing interior walls and ceilings.

**Sheetrock® Brand Gypsum Panels**
- The original 1/4 in. (6.4 mm) and 2/8 in. (5.5 mm) panels
- Resistant to cracking and warping
- Comply with ASTM C1396 specifications for 1/4 in. (6.4 mm) and 2/8 in. (5.5 mm) gypsum wallboard
- UL Classification as to surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB1473 (U.S.) or EWB1473 (Canada) for more information

**Sheetrock® Brand Flexible Gypsum Panels**
- 1/4 in. (6.4 mm) flexible panels for curved walls, archways and cornices
- Comply with ASTM C1396 specifications for 1/4 in. (6.4 mm) gypsum wallboard
- UL Classification as to surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2128 (U.S.) or EWB2128 (Canada) for more information

**Sheetrock® Brand Ultralight Panels Firecode®**
- INTENDED FOR
  - New residential or repair and remodel construction
  - 1/4 in. (6.4 mm) panels are recommended as an additional layer for improving sound control in double-layer wood- or steel-framed partitions, and as a face layer for use over old wall and ceiling surfaces
  - 5/8 in. (15.9 mm) panels are recommended in single- or double-layer wood- or steel-framed wall and ceilings, as an additional layer for improving sound control, and as a face layer for use over old wall and ceiling surfaces
- PRODUCT DATA
  - Tapered
  - WEIGHT: 1.2 lb./sq. ft. (5.9 kg/sq. m.)
  - THICKNESS: 1/4 in. (6.4 mm)

**Sheetrock® Brand Ultralight Panels Firecode X**
- INTENDED FOR
  - New residential or repair and remodel construction
  - 1/4 in. (6.4 mm) panels are recommended as an additional layer for improving sound control in double-layer wood- or steel-framed partitions, and as a face layer for use over old wall and ceiling surfaces
- PRODUCT DATA
  - Tapered
  - WEIGHT: 1.1 lb./sq. ft. (5.3 kg/sq. m.)
  - THICKNESS: 5/8 in. (15.9 mm)

**Sheetrock® Brand Ultralight Panels Pole Tough™**
- INTENDED FOR
  - New residential or repair and remodel construction
  - An additional layer for improving sound control in double-layer wood- or steel-framed partitions, and as a face layer over old walls and ceilings
- PRODUCT DATA
  - Tapered
  - WEIGHT: 1.4 lb./sq. ft. (6.8 kg/sq. m.)
  - THICKNESS: 3/8 in. (9.5 mm)

**NOTES:**
1. Representatives approximate weight for design and shipping purposes. For specific product weight in your area, contact your local ULT or GCP representative, or call the Customer Service Center.  
3. GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350).
4. UL Classification as to fire resistance, surface-burning characteristics and noncombustibility.
5. Additional laboratory testing may be conducted to verify the performance of building materials in actual use.
6. Tapered Edge Profile: 1/2 in. (12.7 mm) x 48 in. (1219 mm) x 2.00 in. (50.8 mm) Tapered Edge Profile.  
7. England: 1.3 lb./sq. ft. (6.2 kg/sq. m.)  
8. Scotland: 1.4 lb./sq. ft. (6.8 kg/sq. m.)  
9. Not available in Canada  
10. US Code uses the metric system of measurement.  
11. This ASTM lab test may not accurately represent the mold performance of building materials in actual use.  
12. Given unsuitable project conditions during storage, installation or after completion, any building material may be overwhelmed by mold. To manage the growth of mold, the best and most cost-effective strategy is to protect building products from water exposure during storage and installation and after completion of interior sheathing. The use can be accomplished using standard drywall construction practices.
FIRE-RESISTANT PANELS

The overriding goal of all fire-resistant assembly design is to mitigate risk in the event of a fire. Therefore, it’s imperative to match products and systems to the end performance desired. Having an understanding of proper product applications and the latest technologies can avoid costly job rework and delays, as well as minimize any safety risks.

When it comes to fire, USG and CGC have established most of the fire testing procedures currently used by Underwriters Laboratories Inc. (UL), USG and CGC are the undisputed leaders among building material manufacturers in providing products and systems designed to keep a structure safe and its occupants safe.

PLASTER-BASE PANELS

The proper use of plaster bases with plaster provides a secure bond that is essential to surface strength and resistance to abuse and cracking. USG plaster-base panels ensure durability and strength in your walls and ceilings by featuring specially treated face paper for conventional and veneer plaster system applications that controls water absorption, provides a strong plaster bond and resists plaster slide.

SHEETROCK® BRAND FIRECODE® X PANELS

1. INTENDED FOR: Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels are required. New or repair and remodel construction. Load-bearing and non-load-bearing wood- or steel-framed fire-rated walls, ceilings and columns. Any UL Design in which UL Type SCX panels are listed.

2. PRODUCT DATA:
   - TYPICAL DESIGNATION: SCX
   - THICKNESS: 5/8 in. (15.9 mm)
   - WEIGHT: 2.2 lb./sq. ft. (10.7 kg/sq. m.)

3. UL TYPE DESIGNATION: SCX

- The original, most trusted 5/8 in. (15.9 mm) Type X panels that provide superior fire resistance for ceiling applications. Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and Type X gypsum wallboard. UL Classification as to fire resistance, surface burning characteristics and noncombustibility. As an upgrade, this panel is available in a 5/8 in. (15.9 mm) lightweight and sustainable version: SHEETROCK® Brand EcoSmart Panels Firecode® X (Canada). Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350). Refer to product submittal sheet WB2964 (U.S.) or EWB2964 (Canada) for more information.

SHEETROCK® BRAND FIRECODE® C PANELS

1. INTENDED FOR: Commercial or residential applications where 1/2 in. (12.7 mm) or 5/8 in. (15.9 mm) Type X panels are required. New or repair and remodel construction. Load-bearing and non-load-bearing wood- or steel-framed fire-rated walls, ceilings and columns. Any UL Design in which UL Type C panels are listed.

2. PRODUCT DATA:
   - TYPICAL DESIGNATION: C
   - THICKNESS: 1/2 in. (12.7 mm)
   - WEIGHT: 2.2 lb./sq. ft. (10.7 kg/sq. m.)

3. UL TYPE DESIGNATION: C

- 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) enhanced proprietary Type X panels that provide superior fire resistance for ceiling applications. Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm), 5/8 in. (15.9 mm) and Type T gypsum wallboard. As an alternative, the 5/8 in. (15.9 mm) panel is available in a lightweight and sustainable version: SHEETROCK® Brand EcoSmart Panels Firecode® C (U.S.) and SHEETROCK® Brand UltraLight Panels Firecode® X (Canada). UL Classification as to fire resistance, surface burning characteristics and noncombustibility. Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350). Refer to product submittal sheet WB2965 (U.S.) or EWB2965 (Canada) for more information.

SHEETROCK® BRAND ULTRACODE® CORE PANELS

1. INTENDED FOR: Commercial applications where 3/4 in. (19.1 mm) Type X or enhanced proprietary Type X panels are required. New or repair and remodel construction. Load-bearing and non-load-bearing wood- or steel-framed fire-rated walls, ceilings and columns. Applications where space is limited (such as mechanical rooms). Any UL Design in which UL Type ULTRACODE panels are listed.

2. PRODUCT DATA:
   - TYPICAL DESIGNATION: ULTRACODE
   - THICKNESS: 3/4 in. (19.1 mm)
   - WEIGHT: 2.8 lb./sq. ft. (13.7 kg/sq. m.)

3. UL TYPE DESIGNATION: ULTRACODE

- 3/4 in. (19.1 mm) enhanced proprietary Type X panels that can provide 1-4 hr. fire ratings with fewer layers of gypsum panels, then are typically required when used in approved applications. Reduce labor and material costs by using less panels. Comply with ASTM C1396 specifications for 3/4 in. (19.1 mm) and Type X gypsum wallboard. UL Classification as to fire resistance, surface burning characteristics and noncombustibility. Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350). Refer to product submittal sheet WB12678 (U.S.) for more information.
MOISTURE- AND MOLD-RESISTANT PANELS

When risk of moisture exposure is present, choose products and systems that offer adequate resistance against mold growth. When tested in accordance with ASTM D3273, Standard Test Method for Resistance to Growth of Mold on the Surface of Interior Coatings in an Environmental Chamber, all USG and CGC moisture- and mold-resistant panels meet or exceed ASTM specifications.

**SHEETROCK® BRAND MOLD TOUGH® FIRECODE® X PANELS**

- 5/8 in. (15.9 mm) Type X panels with moisture and mold resistance
- Noncombustible, moisture-resistant gypsum core encased in moisture- and mold-resistant paper
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm), Type X, water-resistant gypsum wallboard and exterior gypsum soffit board
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- As an upgrade, this panel is available in a 5/8 in. (15.9 mm) lightweight and sustainable version: SHEETROCK® Brand Glass-Mat Mold Tough® Firecode® X (U.S.)
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2390 (U.S.) or EWB2390 (Canada) for more information

**SHEETROCK® BRAND MOLD TOUGH® ULTRACODE® DESIGNATION PANELS**

- 5/8 in. (15.9 mm) enhanced proprietary Type X panels with moisture and mold resistance
- Noncombustible, moisture-resistant gypsum core encased in moisture- and mold-resistant paper
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm), Type X, water-resistant gypsum wallboard and exterior gypsum soffit board
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB5094 (U.S.) for more information

**SHEETROCK® BRAND MOLD TOUGH® ULTRACODE® DESIGNATION PANELS**

- 5/8 in. (15.9 mm) Type X panels with moisture and mold resistance
- Noncombustible, moisture-resistant gypsum core encased in moisture- and mold-resistant paper
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm), Type X, water-resistant gypsum wallboard
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- As an upgrade, this panel is available in a 5/8 in. (15.9 mm) lightweight and sustainable version: SHEETROCK® Brand Glass-Mat Mold Tough® Firecode® X (U.S.)
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2390 (U.S.) or EWB2390 (Canada) for more information
## ABUSE-RESISTANT PANELS

All commercial and institutional buildings have high-traffic areas prone to scraping and bumping. If the materials used aren’t more durable, building owners may be faced with under-performing surfaces, increased maintenance costs and potential safety issues. USG and CGC can help with our comprehensive portfolio of abuse-resistant solutions.

Before selecting materials for your project, be sure to check with your local building code authority. Many municipalities are now adopting International Building Code® (IBC®) standards that require greater levels of abuse resistance in a number of critical areas (such as exit and elevator hoistway enclosures), which ensures the safety of the property and its occupants.

### SHEETROCK® BRAND AR INTERIOR PANELS (REGULAR & TYPE X)

#### INTENDED FOR
- Commercial or residential applications where 1/2 in. (12.7 mm) Type X panels with greater resistance to indentation and impact damage are required
- Areas where abuse resistance is desired
- New or repair and remodeling construction
- Load-bearing and non-load-bearing wood- or steel-frame framed-rated walls and columns
- Any USG Design in which UL Type AR panels are listed

#### PRODUCT DATA
- Thickness: 1/2 in. (12.7 mm)
- Weight: 4.8 lb/in² (2209 kg/m²)
- Edge Profile: Tapered
- Weight: 2.2 lb/in² (10.5 kg/m²)

#### ABUSE RESISTANCE
- Hard-body impact resistance: Level 1

#### DESIGNATION
- “AR”

#### TYPICAL USES
- Commercial or residential applications where 1/2 in. (12.7 mm) regular or 5/8 in. (15.9 mm) Type X gypsum fiber panels engineered to provide increased resistance to abrasion, indentation and penetration
- No face paper to scratch or tear
- Certified 97% recycled content
- Economical and aesthetically pleasing alternative to concrete block and plaster construction
- Tested to ASTM C6129 for surface abrasion and indentation resistance, and soft- and hard-body impact
- UL Classification of 1/2 in. (12.7 mm) panels as to surface-burning characteristics and noncombustibility
- UL Classification of 5/8 in. (15.9 mm) panels as to fire resistance, surface-burning characteristics and noncombustibility
- As an upgrade, these panels are available in 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) moisture- and mold-resistant versions
- BEABA® Brand Aqua-Tough™ AR Interior Panels (Regular and Type X)
- Refer to product submittal sheet FSD1 (U.S.) or FSD2 (Canada) for more information

### SHEETROCK® BRAND AR FIRECODE® INTERIOR PANELS (REGULAR & TYPE X)

#### INTENDED FOR
- Commercial or residential applications where 1/2 in. (12.7 mm) Type X panels with greater resistance to indentation and impact damage are required
- Areas where abuse resistance is desired
- New or repair and remodeling construction
- Load-bearing and non-load-bearing wood- or steel-frame framed-rated walls and columns
- Any USG Design in which UL Type AR panels are listed

#### PRODUCT DATA
- Thickness: 1/2 in. (12.7 mm)
- Weight: 4.8 lb/in² (2209 kg/m²)
- Edge Profile: Tapered
- Weight: 2.2 lb/in² (10.5 kg/m²)

#### ABUSE RESISTANCE
- Hard-body impact resistance: Level 1

#### DESIGNATION
- “FRX-G”

#### TYPICAL USES
- As an upgrade, these panels are available in 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) Type X panels with greater resistance to indentation and impact damage are required
- Areas where abuse resistance is desired
- Areas where moisture and mold resistance are desired
- 5/8 in. (15.9 mm) Type X panels can be used in any/UL Designs in which US Type FR-G panels are listed

### BLAK-Rock® BRAND AR FIRECODE® INTERIOR PANELS (REGULAR & TYPE X)

#### INTENDED FOR
- Commercial or residential applications where 1/2 in. (12.7 mm) regular or 5/8 in. (15.9 mm) Type X gypsum fiber panels engineered to provide increased resistance to abrasion, indentation and penetration
- No face paper to scratch or tear
- Certified 97% recycled content
- Economical and aesthetically pleasing alternative to concrete block and plaster construction
- Tested to ASTM C6129 for surface abrasion and indentation resistance, and soft- and hard-body impact
- UL Classification of 1/2 in. (12.7 mm) panels as to surface-burning characteristics and noncombustibility
- UL Classification of 5/8 in. (15.9 mm) panels as to fire resistance, surface-burning characteristics and noncombustibility
- As an upgrade, these panels are available in 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) moisture- and mold-resistant versions
- BlaK-Rock® Brand Aqua-Tough™ AR Interior Panels (Regular and Type X)
- Refer to product submittal sheet FSD1 (U.S.) or FSD2 (Canada) for more information

### NOTE

1. Represents approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or call the Customer Service Center. 2. USG/CGC testing demonstrates that when painted with one coat of primer and two coats of latex paint, the abrasion resistance increased to Level 5.

USG and CGC offer the most extensive portfolio of backerboard and underlayment panel technologies in the industry. No matter the product or material of choice, all of our products are backed by the reputation of the Durock® and Fiberock® Brands, and will provide you with a durable moisture- and mold-resistant substrate for your tile project for years to come.

**Durock® Brand Emsley Board with Glass Edges**
- Aggregated Portland cement with polymer-coated, glass-fiber mesh completely encompassing edges, back and front surfaces
- Enhanced proprietary edge performance prevents sprint and crumbling
- Comply with ASTM C1225 specifications for 1/2 in. (12.7 mm), 5/8 in. (15.9 mm) and fiber-reinforced cementitious backer board
- When tested in accordance with ASTM D2273, the panels meet or exceed ASTM C1225 specifications
- Water durable, mild-resistant for high moisture areas
- Will not rot, warp, delaminate or disintegrate when exposed to water
- Superior tile bond
- Easy to cut and fasten for quick installation
- Noncombustible
- Lifetime (30-year) limited warranty, 10-year limited exterior warranty
- Refer to product submittal sheet CB399 (U.S.), CB250 (U.S.) for more information

**Fibercrock® Brand Tile Backerboard**
- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X gypsum fiber panels that offer durability and exceptional tile bond
- Made from 97% recycled material
- Comply with ASTM C1278 for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and water-resistant fiber-reinforced gypsum backing panels
- When tested in accordance with ASTM D2273, the panels meet or exceed ASTM C1278 specifications
- Uniform composition provides strength plus moisture and mold resistance
- Monolithic core, will not delaminate
- Provides a smooth, flat, paintable surface for wall applications
- For use in dry and limited wet areas throughout the home
- Superior tile bond
- Free of resins, adhesives and solvents that might stain a vinyl floor
- Easy to cut, fasten and install
- 20-year limited warranty
- Refer to product submittal sheet F103 (U.S.) or F103 (Canada) for more information

**Fibercrock® Brand Underlayment**
- 1/4 in. (6.4 mm) Regular and 5/8 in. (9.5 mm) Regular gypsum fiber panels that offer durability and exceptional tile bond
- Made from 97% recycled material
- Comply with ASTM C1278 for 1/4 in. (6.4 mm) Regular, 5/8 in. (9.5 mm) Regular and interior fiber-reinforced underlayment panels
- When tested in accordance with ASTM D2273, the panels meet or exceed ASTM C1278 specifications
- Uniform composition provides strength plus moisture and mold resistance
- Monolithic core, will not delaminate
- Provides a smooth, flat, paintable surface for wall applications
- For use in dry and limited wet areas throughout the home
- Superior tile bond
- Free of resins, adhesives and solvents that might stain a vinyl floor
- Easy to cut, fasten and install
- 20-year limited warranty
- Refer to product submittal sheet F103 (U.S.) or F103 (Canada) for more information

**Notes**
1. Weights approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or call the Customer Service Center.
2. Pressure and Mold Resistance: List of new or improved products or representation of independent lab tests at the time of manufacture per ASTM D2273, Standard Test Method for Resistance to Growth of Mold on the Surface of Oriented Strand Board and Engineered Lumber
3. USG Emsley test results accurately represent the mold performance of building materials in actual use. Green-encased project case studies have shown no reports of growth, delamination or other complaints, and building material can be overwhelmed by mold. To manage the growth of mold, the best and most cost-effective strategy is to protect building products from water exposure during storage and installation and ensure completion of the building. This is accomplished by using great design and construction practices.
SHEATHLINER PANELS

USG was the first to innovate and commercialize shaftliner panels, which allowed for cost-efficient and flexible shafts in tall buildings—and ultimately the construction of taller buildings. Walls that enclose elevator shafts, stairwells and other vertical shafts are the lifeline of a structure. Should a fire occur, firefighters control the use of elevators, leaving stairwells as the only means for occupant egress or rescue. Since these walls are an important component, they must have the strength to withstand wildland loads and provide needed fire protection. High-performing Securock® Brand shaftliner panels are tested and exceed even the most stringent standards, ensuring the safety of the property and its occupants.

SHAFFLINER PANELS

USG was the first to innovate and commercialize shaftliner panels, which allowed for cost-efficient and flexible shafts in tall buildings—and ultimately the construction of taller buildings. Walls that enclose elevator shafts, stairwells and other vertical shafts are the lifeline of a structure. Should a fire occur, firefighters control the use of elevators, leaving stairwells as the only means for occupant egress or rescue. Since these walls are an important component, they must have the strength to withstand wildland loads and provide needed fire protection. High-performing Securock® Brand shaftliner panels are tested and exceed even the most stringent standards, ensuring the safety of the property and its occupants.

Securock® Brand Ultralight Glass-Mat Sheathing

Securock® Brand Ultralight Glass-Mat Sheathing is a light weight, strong and durable panel. It is designed to be used in exterior applications, providing a stable, non-combustible, fire-rated barrier that helps protect the building from the elements. It is also an ideal choice for retrofit applications, where existing walls need to be retrofitted for fire resistance.

Securock® Exulair® 453 Panel (Regular & Firecode X®)

Securock® Exulair® 453 Panel (Regular & Firecode X®) is a lightweight, high-performance exterior sheathing panel. It is designed for use in low-slope roof applications, providing superior water resistance and vapor control. The panel is made of a lightweight, high-strength face material, combined with a lightweight, high-strength back material, providing a high level of structural integrity and a long service life.

Securock® Exulair® 453 Panel (Regular & Firecode X®)

Securock® Exulair® 453 Panel (Regular & Firecode X®) is a lightweight, high-performance exterior sheathing panel. It is designed for use in low-slope roof applications, providing superior water resistance and vapor control. The panel is made of a lightweight, high-strength face material, combined with a lightweight, high-strength back material, providing a high level of structural integrity and a long service life.
USG offers a complete line of Sheetrock® Brand MH panels designed to meet the stringent needs of the Manufactured Housing industry. Our solutions, however, are just one part of a time-tested family that includes wallboard, trims and finishing products. All of our MH products are backed by USG’s reputation and experience to ensure the highest performance required by the demanding environment of the assembly line.

**MANUFACTURED HOUSING PANELS** Continued

**SHEETROCK® BRAND MH GYPSUM BASE BOARD FIRECODE® X**

- 1/2 in. (12.7 mm) enhanced proprietary Type X gypsum base board designed to meet the need for time sensitivity and structural integrity.
- Specially formulated mineral core that provides fire resistance superior to that offered by 5/8 in. (15.9 mm) SHEETROCK® Brand MH Gypsum Base Board Firecode® X.
- Third-party system-tested to ensure compliance with HUD Manufactured Home Construction Standard.
- Designed to accept laminated vinyl film.
- Composition provides low expansion and contraction to resist buckling and warping.
- May be fastened with a two-part polyurethane adhesive, a one-part polyurethane adhesive, PVA adhesive, mechanical fasteners or a combination of adhesive and mechanical fasteners.
- Square edges for tight-fitting panels to minimize batten width.
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility.
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350).
- Refer to product submittal sheet MH1174 (U.S.) for more information.

**SHEETROCK® BRAND PATCH & REPAIR PANELS**

- Available in 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thicknesses, 23-5/8 in. (600 mm) wide by 23-5/8 in. (600 mm) long.
- 5/8 in. (15.9 mm) panel not available in Canada.
- Ideal for repairing damaged drywall.
- For interior use only.
- Easy to carry, transport and store.
- Less waste than a full-size panel.

**SHEETROCK® BRAND DRYWALL REPAIR CLIPS**

- For fast, easy drywall repair of large holes (over 2 in. [51 mm]) and areas damaged by water.
- When used with fire-rated drywall, meet building code requirements for repairing 1-hr. fire-rated drywall partitions.
- Suitable for both 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thick panels.
- 6 clips, 12 drywall screws.

**NOTE:**

1. Represents approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or call the Customer Service Center.

**PATCH & REPAIR SOLUTIONS**

Finished interior walls are subject to abuse from time to time. USG and CGC offer a line of easy-to-install patch & repair products to deal with damage.

**SHEETROCK® BRAND PATCH & REPAIR PANELS**

- For fast, easy drywall repair of large holes (over 2 in. [51 mm]) and areas damaged by water.
- When used with fire-rated drywall, meet building code requirements for repairing 1-hr. fire-rated drywall partitions.
- Suitable for both 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thick panels.
- 6 clips, 12 drywall screws.
