A WALLBOARD PORTFOLIO THAT WORKS AS HARD AS YOU

SHEETROCK® BRAND   DUROCK® BRAND   FIBEROCK® BRAND

SECUROCK® BRAND
For over 100 years, we have led the building industry in drywall innovation. In that time, our Sheetrock®, Securock®, Durock® and Fiberock® Brands have become the standard for highest-quality and best-performing walls and ceilings.

Offering the nation’s largest-selling, broadest line of interior and exterior panels, all of our products exceed the essential requirements of performance, safety, efficiency, workability, strength and ease of decoration that are characteristic of quality construction.

Beyond outstanding products, we also offer expertise, technical support and nationwide distribution. All driven by a dedication to finding solutions for you.

We do all of this because we believe that our reputation is built on yours. When you succeed, we succeed. And your exceptional work—combined with our solutions—brings new levels of performance, enabling you to create the spaces where people live, work and play.
Gypsum products are manufactured from a mineral rock (gypsum) that is gray to white in color and is found in abundant deposits around the world or from recaptured gypsum. Basic gypsum consists of calcium sulfate chemically combined with water of crystallization (CaSO₄ + 2H₂O). The combined water makes up about 20% of gypsum rock’s weight (50% by volume) and gives the material its characteristic fire-resistive qualities and high adaptability to varied construction use.

The gypsum that ends up in gypsum wallboard can come from two sources. Gypsum rock can be mined from the ground, as sources are abundant. This mineral is the second most plentiful one found on earth. Recaptured gypsum is a byproduct that can be obtained from several processes, including flue gas desulfurization (FGD). Recaptured gypsum has the exact same chemical composition as gypsum mined from the earth. Wallboard made from recaptured gypsum is the same as wallboard made from mined gypsum rock.

USG and CGC gypsum boards are produced using a highly automated, continuous process. After the paper-sandwiched gypsum core has set, the boards are cut to length, dried and packaged for shipment. Rigorous quality control measures are applied throughout the manufacturing process.

The constant desire to improve our product line is representative of our many efforts to be a leader in the manufacture of the industry’s most specified and used gypsum panels.
SUSTAINABILITY BEST PRACTICES

For over 100 years, USG and CGC has led the building sector’s effort in developing and supplying sustainable construction materials. Today, sustainability is integrated into the design and manufacture of every wall, ceiling and flooring product.

Sustainable Supply Chain

We use recaptured gypsum, a byproduct of flue gas desulfurization (FGD)—a scrubbing technology utilized by many coal-fired power plants to reduce sulfur dioxide, which is the main cause of “acid rain.” Recaptured gypsum is chemically produced and recovered in processes that we helped to pioneer for its use as an alternative to naturally occurring gypsum. Recaptured gypsum provides the same chemical (calcium sulfate dihydrate) and physical properties as natural gypsum and diverts this material from overburdened landfills. Raw materials used in our products are carefully selected and go through a rigorous screening procedure. Incoming raw materials are tested for contaminants by internal and third-party labs for consideration of worker, environmental and end-user exposure.

In addition to the selection of raw materials, we are mindful of product transport. Freight transportation can be a large contributor to air pollution, which is why we continually consider the environmental footprint of our transportation activities and do our part to reduce environmental impact.

Carbon Reduction

Every product has an impact on the environment. Raw material extraction, manufacturing and use may contribute towards resource depletion, pollution and climate change. Part of creating more sustainable products is understanding the product’s embodied carbon, which is the quantity of greenhouse gas (GHG) emissions that are produced during the life cycle of the product. In our efforts to reduce these negative impacts and make products for a more sustainable future, Sheetrock® Brand EcoSmart Panels revolutionized wallboard manufacturing, significantly reducing the product’s global warming potential.

Product Transparency

USG and CGC lead the building industry in the development of high-performance products designed to meet specifications, construction and sustainability requirements. As a manufacturer, we have a responsibility to be transparent about the building materials that make up the indoor environment. Most USG and CGC gypsum panels have Health Product Declarations (HPDs) that disclose at least 1000 ppm of the chemical formulation. Other transparency tools include Declare Labels, Environmental Product Declarations (EPDs) and GREENGUARD Gold certification. Our products contribute to USGBC® LEED® v4.1 credits, contribute to multiple features found in the WELL Building Standard™ v3.0, and most products are free of Living Building Challenge™ v4.0 Red-List chemicals and can be used on Living Building Challenge Petal Certification projects. For more information on the sustainability attributes of USG and CGC gypsum panels, visit usg.ecomedes.com.

NOTE:
GREENGUARD Certified products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit ul.com/gg.
TYPICAL GYPSUM PANEL APPLICATIONS FOR COMMERCIAL SPACES

- **ABUSE-RESISTANT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Abuse-Resistant (AR)"
- **SHEATHING PANELS**: Any Securock® or Sheetrock® Brand gypsum panel labeled as "Sheathing"
- **FIRE-RESISTANT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Firecode®" or "Ultracode®"
- **IMPACT-RESISTANT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Very High Impact-Resistant (VHR)"
- **MOISTURE- AND MOLD-RESISTANT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Mold Tough®"
- **SHAFTLINER PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Liner"
- **TILE BACKERBOARD**: Any Durock® or Fiberock® Brand panel labeled as "Tile Backerboard" or "Underlayment"

TYPICAL GYPSUM PANEL APPLICATIONS FOR RESIDENTIAL SPACES

- **ABUSE-RESISTANT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Abuse-Resistant (AR)"
- **SAG-RESISTANT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Sag-Resistant", or has an accompanying ICC® ESR report
- **SHEATHING PANELS**: Any Securock® or Sheetrock® Brand gypsum panel labeled as "Sheathing"
- **FIRE-RESISTANT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Firecode®"
- **LIGHTWEIGHT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "UltraLight" or "EcoSmart"
- **MOISTURE- AND MOLD-RESISTANT PANELS**: Any Sheetrock® Brand gypsum panel labeled as "Mold Tough®"
- **TILE BACKERBOARD**: Any Durock® or Fiberock® Brand panel labeled as "Tile Backerboard" or "Underlayment"

**LIGHTWEIGHT AND SUSTAINABLE PANELS**

For more than 100 years, we have remained committed to manufacturing products that are in sync with the environment. As a leading manufacturer of gypsum panels, the world over, we have a responsibility to produce products that not only perform on the job site, but also perform with the planet.

**SHEETROCK® BRAND ECOSMART PANELS MOLD TOUGH**

- Highly sustainable and ultralightweight 5/8 in. (15.9 mm) wall and ceiling panels
- Meet Architecture 2030 Challenge for Products
- Living Building Challenge® "Red List Free"
- Contains 100% USDA certified biobased content
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA CSI 01)
- UL Classification as to fire resistance — 30-min. and 1-hr. fire-rated walls
- Strength and impact resistance comparable to standard 5/8 in. (15.9 mm) Type X
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and non-Type X gypsum panels
- Refer to product submittal sheet WB2855 (U.S.) for more information

**SHEETROCK® BRAND ULTRALIGHT PANELS**

- The lightest and most sustainable 5/8 in. (15.9 mm) enhanced proprietary Type X wall and ceiling panels
- Meet Architecture 2030 Challenge for Products
- Living Building Challenge® "Red List Free"
- Contains 100% USDA certified biobased content
- Achieved EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA CSI 01)
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and Type X gypsum board
- Offer comparable sound, strength, sag and impact resistance to standard 5/8 in. (15.9 mm) Type X
- Refer to product submittal sheet WB2859 (U.S.) for more information

**SHEETROCK® BRAND ULTRALIGHT PANELS FIBERCODE® X**

- The lightest and most sustainable 5/8 in. (15.9 mm) moisture- and mold-resistant, enhanced proprietary Type X wall and ceiling panels
- Meet Architecture 2030 Challenge for Products
- Contains 100% USDA certified biobased content
- Living Building Challenge® "Red List Free"
- Achieved EBGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA CSI 01)
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm), Type X, water-resistant gypsum wallboard and exterior gypsum soffit board
- When tested in accordance with ASTM D2273, the panels meet or exceed ASTM C1396 specifications
- Refer to product submittal sheet WB2895 (U.S.) for more information

**LIGHTWEIGHT PANELS**

The SHEETROCK® Brand has long stood for innovative, groundbreaking building solutions that set industry standards for productivity, efficiency and life safety. We’ve remained committed to the construction industry by making our wallboard lighter, easier, faster and safer to install.

**SHEETROCK® BRAND ULTRALIGHT 1/2 in. (12.7 mm) Gypsum Panel**

- The first lightweight 1/2 in. (12.7 mm) wall and ceiling panels
- Easier to lift, carry and install
- 20% lighter than standard 1/2 in. (12.7 mm) Type X
- Special multilayered laminated face paper controls water absorption, provides maximum panel strength and resists sag
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA CSI 01)
- Comply with ASTM C1366 specifications for 1/2 in. (12.7 mm) Type X gypsum wallboard
- Refer to product submittal sheet EWB2101 (U.S.) or EWB2501 (Canada) for more information

**SHEETROCK® BRAND ULTRA LIGHT GYPSUM BASE IMPERIAL**

- The first and lightest 1/2 in. (12.7 mm) gypsum base for veneer plaster
- Special multilayered laminated face paper controls water absorption, provides maximum panel strength and resists sag
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA CSI 01)
- Comply with ASTM C1366 specifications for 1/2 in. (12.7 mm) and gypsum base for veneer plaster
- Refer to product submittal sheet WB2713 (U.S.) for more information

**SHEETROCK® BRAND ULTRALIGHT PANELS FIBERCODE® 15E**

- Up to 30% lighter than standard 5/8 in. (15.9 mm) Type X
- Non-fire-rated single-layer wall and ceiling applications
- Parallel or perpendicular installation on ceilings with up to 24 in. (610 mm) OC framing when water-based texture is applied
- Wood or steel framing
- Refer to product submittal sheet EWB2507 (Canada) for more information

**NOTES:**

1. Measurements approximate. Weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or call the Customer Service Center.
2. All panels for residential and commercial construction. Actual performance may vary with application. molded-in panels and Spray-On panels are representatives of independent tests and the time of manufacture per ASTM E2713. This product may not be implemented in buildings or in the growth of mold. The brand and cost-effective strategy is to protect building products from water exposure during storage and installation and other components of the building. This is accomplished by using good design and construction practices.

**USG and CGC Interior & Exterior Panels**

- Noncombustible, moisture- and mold-resistant gypsum core
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm)

**REGIONAL AVAILABILITY**

- The first lightweight 5/8 in. (15.9 mm) Type X panels
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and Type X gypsum wallboard
- Offer comparable sound, strength and impact resistance
- ULX Classification as to fire resistance, surface-burning characteristics

**INTENDED FOR**

- Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels are required
- New or repair and remodel construction
- Load-bearing and non-load-bearing wood or steel-framed timber-walls
- Any UL design in which UL Type ULX panels are listed

**PRODUCT DATA**

- TAPERED
- WIDTH: 5/8 in. (15.9 mm)
- THICKNESS: 1/2 in. (12.7 mm)
- WEIGHT: 48 lb. (2209 kg)

**SHEETROCK® BRAND ULTRALIGHT PANELS FIRECODE® X**

**REGIONAL AVAILABILITY**

- The first and lightest 1/2 in. (12.7 mm) moisture- and mold-resistant panels
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm), water-resistant gypsum wallboard and exterior gypsum soffit board
- Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
- When tested in accordance with ASTM D32732, the panels meet or exceed ASTM C1396 specifications
- Score, snap, install and finish just like standard drywall
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- New residential or repair and remodel construction
- Non-fire-rated single-layer wall and ceiling applications
- Wood or steel framing
- Protected exterior soffit and ceiling applications
- Use as an interior tile substrate in dry locations or areas with limited water exposure
- Any UL design in which UL Type ULX panels are listed

Use a certified thermal break to help protect building products from water exposure during storage and installation and for use over old wall and ceiling surfaces with short radii.

**SHEETROCK® BRAND FLEXIBLE GYPSUM PANELS**

**REGIONAL AVAILABILITY**

- The first lightweight 1/2 in. (12.7 mm) interior tile substrate panel
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm) gypsum wallboard
- Designed to construct curved surfaces easily
- Quick installation and decoration
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- New residential or repair and remodel construction
- New residential or repair and remodel construction
- In double-layer steel- and wood-stud partitions
- Any UL design in which UL Type ULX panels are listed

**PRODUCT DATA**

- TAPERED
- WIDTH: 5/8 in. (15.9 mm)
- THICKNESS: 1/2 in. (12.7 mm)

**SHEETROCK® BRAND ULTRALIGHT PANELS MOLD TOUGH® FLEXIBLE**

**REGIONAL AVAILABILITY**

- The first lightweight 1/2 in. (12.7 mm) moisture- and mold-resistant Type X panels available
- Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
- When tested in accordance with ASTM D32737, the panels meet or exceed ASTM C1396 specifications
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- As an upgrade, this panel is available in a 5/8 in. (15.9 mm) lightweight and sustainable version: Sheetrock® Brand EcoSmart Lightweight and Sustainable Version
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- New residential or repair and remodel construction
- In double-layer steel- and wood-stud partitions
- Any UL design in which UL Type ULX panels are listed

- WEIGHT: 48 lb. (2209 kg)
- EDGE PROFILE: Tapered
- VOLUME: 1.2 lbs./sq. ft. (5.9 kg/sq. m.)

**ULX**

**NOTES:**

- Thickness, weight and surface area are representative of independent lab tests at the time of manufacture or as per ASTM E84, Standard Test Method for Surface Burning Characteristics of Building Materials. This test method is not necessarily representative of the performance of building materials in a house or building. Always consult your local Building Code Authority for the specific requirements relating to your local building codes. Use a certified thermal break to help protect building products from water exposure during storage and installation and for use over old wall and ceiling surfaces with short radii.

**INTENDED FOR**

- New residential or repair and remodel construction
- In double-layer steel- and wood-stud partitions
- Any UL design in which UL Type ULX panels are listed

**NOTES:**

- Thickness, weight and surface area are representative of independent lab tests at the time of manufacture or as per ASTM E84, Standard Test Method for Surface Burning Characteristics of Building Materials. This test method is not necessarily representative of the performance of building materials in a house or building. Always consult your local Building Code Authority for the specific requirements relating to your local building codes. Use a certified thermal break to help protect building products from water exposure during storage and installation and for use over old wall and ceiling surfaces with short radii.
FIRE-RESISTANT PANELS

The proper use of plaster bases with plasters provides a secure bond that is essential to surface strength and resistance to abuse and cracking. USG plaster-base panels ensure durability and strength in your walls and ceilings by featuring specially treated face paper for conventional and veneer plaster systems that control water absorption, provide a strong plaster bond and resist plaster slide.

USG and CGC have established all the most fire testing procedures currently used by Underwriters Laboratories Inc. (UL). USG and CGC are the undisputed leaders among building material manufacturers in providing products and systems designed to keep a structure safe and its occupants safer.

PLASTER-BASE PANELS

The use of plaster bases with plasters provides a secure bond that is essential to surface strength and resistance to abuse and cracking. USG plaster-base panels ensure durability and strength in your walls and ceilings by featuring specially treated face paper for conventional and veneer plaster systems that control water absorption, provide a strong plaster bond and resist plaster slide.

USG and CGC have established all the most fire testing procedures currently used by Underwriters Laboratories Inc. (UL). USG and CGC are the undisputed leaders among building material manufacturers in providing products and systems designed to keep a structure safe and its occupants safer.

**SHEETROCK® BRAND FIRECODE® X PANELS**

- The original, most trusted 5/8 in. (15.9 mm) Type X panels
- Provide additional fire resistance over Regular panels
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and Type X gypsum wallboard
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- As an upgrade, this panel is available in a 5/8 in. (15.9 mm) lightweight and sustainable version: SHEETROCK® Brand EcoSmart Panels Firecode® X (U.S. only) and SHEETROCK® Brand Ultralight Firecode® X Panels (Canada)
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2964 (U.S.) or EWB2100 (Canada) for more information

**SHEETROCK® BRAND FIRECODE® C PANELS**

- 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) enhanced proprietary Type X panels with specially formulated mineral core that provides superior fire resistance for ceiling applications
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm), 5/8 in. (15.9 mm) and Type X gypsum wallboard
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2965 (U.S.) or EWB2100 (Canada) for more information

**SHEETROCK® BRAND ULTRACODE® C PANELS**

- 5/8 in. (15.9 mm) enhanced fire-resistant panels that can achieve a 2-hr. fire rating in a single-layer assembly, or a 4-hr. fire rating in a double-layer assembly when used with mineral wool insulation in steel-framed walls
- Reduce labor and material costs by using less panels
- Comply with ASTM C1396 specifications for 5/8 in. (15.9 mm) and Type X gypsum wallboard
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet WB2167B (U.S.) for more information

**SHEETROCK® BRAND FIRECODE® IMPERIAL® C PANELS**

- 5/8 in. (15.9 mm) Type X rigid base for non- and fire-rated veneer plaster systems
- Achieved GREENGUARD Gold Certification and qualifies as low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet P782 (U.S.) for more information

**SHEETROCK® BRAND FIRECODE® IMPERIAL® C VENEER PLASTER PANELS**

- 5/8 in. (15.9 mm) Type X rigid base for veneer plaster systems
- Achieved GREENGUARD Gold Certification and qualifies as low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet P782 (U.S.) for more information

**REGIONAL AVAILABILITY**

- 1/2 in. (12.7 mm) enhanced proprietary Type X rigid base for fire-rated veneer plaster systems
- Specialized formulated mineral core that provides fire resistance superior to that offered by SHEETROCK® Brand Gypsum Base Impervious® Firecode® X
- Distinctive blue face paper controls water absorption, provides a strong plaster bond and resists plaster slide
- Comply with ASTM C1396 specifications for 1/2 in. (12.7 mm), Type X and gypsum base for veneer plaster
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
- Achieved GREENGUARD Gold Certification and qualifies as low VOC emitting material (meets CA 01350)
- Refer to product submittal sheet P782 (U.S.) for more information

**SHEETROCK® BRAND ULTRACODE® C PANELS**

- Commercial or residential applications where 1/2 in. (12.7 mm) Type X panels are required
- New or repair and remodel construction
- Load-bearing and nonload-bearing wood- or steel-framed fire-rated walls
- Direct or resilient attachment to wood or steel framing
- Any UL design in which UL Type IP-X2 panels are listed

**NOTE:**

1. Represents approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or call the Customer Service Center.
When risk of moisture exposure is present, choose products and systems that offer adequate resistance against mold growth. When tested in accordance with ASTM D3273, Standard Test Method for Resistance to Growth of Mold on the Surface of Interior Coatings in an Environmental Chamber, all USG and CGC moisture- and mold-resistant panels meet or exceed ASTM specifications.

### SHEETROCK® BRAND MOLD TOUGH® FIRECODE® X PANELS

- **1/2 in. (12.7 mm) Type X**: lightweight and sustainable version of SHEETROCK® Brand EcoSmart Panels Mold Tough® Firecode® X (U.S. only)
- **5/8 in. (15.9 mm)** moisture- and mold-resistant version with a fiberglass facer and back: SHEETROCK® Brand Glass-Mat Panels Mold Tough® Firecode® X
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)
  - As an upgrade, this panel is available in a 5/8 in. (15.9 mm) UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - Noncombustible, moisture- and mold-resistant gypsum core
  - Complies with ASTM C1658 specifications for 1/2 in. (12.7 mm) Type X panels
  - Guaranteed for three years against manufacturing defects and have a 20-month limited-use warranty
  - Suitable for use in pre-dry-in (fast track or pre-rock) and similar applications of wallboard before the building envelope is fully enclosed
  - Listed as a load-bearing and non-load-bearing wood-framed wall and ceiling application
  - Suitable for top-down construction
  - Load-bearing and non-load-bearing wood-or steel-framed fire-rated walls
  - Protected exterior soffit and ceiling applications
  - Any UL design in which UL Type SCX panels are listed
  - Refer to product submittal sheet WB2560 (U.S.) or EWB2560 (Canada) for more information

### SHEETROCK® BRAND MOLD TOUGH® ULTRACODE® CORE PANELS

- **1/2 in. (12.7 mm)**: Type X, moisture- and mold-resistant panels for use on walls and ceilings
  - Specially formulated mineral core that provides superior fire resistance and performance
  - Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
  - UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - Complies with ASTM C1658 specifications for 1/2 in. (12.7 mm), Type X, water-resistant gypsum wallboard and exterior gypsum soffit board
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 0350)
  - Suitable for top-down construction
  - Load-bearing and non-load-bearing wood-or steel-framed fire-rated walls
  - Protected exterior soffit and ceiling applications
  - Any UL design in which UL Type C panels are listed
  - Refer to product submittal sheet WB2380 (U.S.) for more information

### SHEETROCK® BRAND MOLD TOUGH® PRECORE® CORE PANELS

- **1/2 in. (12.7 mm)**: Type X, moisture- and mold-resistant panels for use on walls and ceilings
  - Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
  - UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - Complies with ASTM C1658 specifications for 1/2 in. (12.7 mm), Type X and water-resistant gypsum wallboard
  - UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 0350)
  - Refer to product submittal sheet WB2380 (U.S.) for more information

### SHEETROCK® BRAND MOLD TOUGH® ULTRACODE® ULTRACODE® PANELS

- **1/2 in. (12.7 mm) Type X**: lightweight and sustainable version of SHEETROCK® Brand EcoSmart Panels Mold Tough® Firecode® X (U.S. only)
  - Noncombustible, moisture- and mold-resistant gypsum core
  - Complies with ASTM C1658 specifications for 1/2 in. (12.7 mm) Type X panels
  - Suitable for use in pre-dry-in (fast track or pre-rock) and similar applications of wallboard before the building envelope is fully enclosed
  - Listed as a load-bearing and non-load-bearing wood-framed wall and ceiling application
  - Suitable for top-down construction
  - Load-bearing and non-load-bearing wood-or steel-framed fire-rated walls
  - Protected exterior soffit and ceiling applications
  - Any UL design in which UL Type SCX panels are listed

### MOISTURE- AND MOLD-RESISTANT PANELS

- **5/8 in. (15.9 mm)** Type X moisture- and mold-resistant panels for use on walls and ceilings
  - Noncombustible, moisture- and mold-resistant gypsum core encased in moisture- and mold-resistant paper
  - Comply with ASTM C1658 specifications for 5/8 in. (15.9 mm), Type X, water-resistant gypsum wallboard and exterior gypsum soffit board
  - UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - As an upgrade, this panel is available in a 5/8 in. (15.9 mm) UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - Noncombustible, moisture- and mold-resistant gypsum core
  - Comply with ASTM C1396 specifications for 3/4 in. (19.1 mm), Type X and glass mat water-resistant gypsum panel
  - UL Classification as to fire resistance, surface-burning characteristics and noncombustibility
  - Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 0350)
  - Suitable for top-down construction
  - 1/2 in. (12.7 mm) Type X can be used in any UL Design in which UL Type SGX panels are listed
  - Refer to product submittal sheet WB2560 (U.S.) or EWB2560 (Canada) for more information

- **5/8 in. (15.9 mm)**: Type X moisture- and mold-resistant panels for use on walls and ceilings
  - Noncombustible, moisture- and mold-resistant gypsum core
  - Complies with ASTM C1658 specifications for 5/8 in. (15.9 mm) Type X panels
  - Guaranteed for three years against manufacturing defects and have a 20-month limited-use warranty
  - Suitable for use in pre-dry-in (fast track or pre-rock) and similar applications of wallboard before the building envelope is fully enclosed
  - Listed as a load-bearing and non-load-bearing wood-framed wall and ceiling application
  - Suitable for top-down construction
  - 5/8 in. (15.9 mm) Type X can be used in any UL Design in which UL Type SGX panels are listed
  - Refer to product submittal sheet WB2560 (U.S.) or EWB2560 (Canada) for more information

### NOTES:
- This ASTM test may not accurately represent the mold performance of building materials in actual use. Given unavoidable project conditions during storage, installation or after completion, any building material can be overwhelmed by mold. To manage the growth of mold, consider the best and most cost-effective strategy. This product building materials from water exposure during storage and installation and after completion of the building.
- This can be accomplished by a good design and appropriate approaches, as your design and shaping strategies. For specific product weight is your area, contact your local USG or CGC representative, or call the customer service center.
ABUSE-RESISTANT PANELS

All commercial and institutional buildings have high-traffic areas prone to scraping and bumping. If the materials used aren’t more durable, building owners may be faced with under-performing surfaces, increased maintenance costs and potential safety issues. USG and CGC can help with our comprehensive portfolio of abuse-resistant solutions.

Before selecting materials for your project, be sure to check with your local building code authority. Many municipalities are now adopting International Building Code® (IBC®) standards that require greater levels of abuse resistance in a number of critical areas (such as exit and elevator hoistway enclosures), which ensures the safety of the property and its occupants.

**SHUTTERTON® BRAND AR FIRECODE® X PANELS**

- 1/2 in. (12.7 mm) paper-faced Type X panels with abuse resistance.
- Offer greater resistance to surface indentation and impact damage than 5/8 in. (15.9 mm) Shutterton® Brand Firecode® X Panels.
- Tested to ASTM C1629 for surface abrasion and indentation resistance, and soft- and hard-body impact.
- Comply with ASTM C1350 specifications for 5/8 in. (15.9 mm) and Type X gypsum wallboard.
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility.
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350).
- Refer to product submittal sheet WB2315 (U.S.) or EW2315 (Canada) for more information.

**UL PROPERTIES**

- **Product Data**
  - **Thicknes**: 5/8 in. (15.9 mm)
  - **Width**: 48 in. (1219 mm)
  - **Length**: Tapered
  - **Weight**: 2.8 lb./sq. ft. (127 kg/m²)

- **UL Type Classification**
  - **ABRASION RESISTANCE**: Level 1
  - **INDENTATION RESISTANCE**: Level 1
  - **SOFT-BODY IMPACT RESISTANCE**: Level 1
  - **HARD-BODY IMPACT RESISTANCE**: Level 1

**FIBEROCK® BRAND AR FIRECODE® X INTERIOR PANELS (REGULAR & TYPE X)**

- 1/2 in. (12.7 mm) reinforced proprietary Type X panels with abuse resistance.
- Offer greater resistance to surface indentation and impact damage than 5/8 in. (15.9 mm) Shutterton® Brand Firecode® X Panels.
- Tested to ASTM C1629 for surface abrasion and indentation resistance, and soft- and hard-body impact.
- Comply with ASTM C1350 specifications for 5/8 in. (15.9 mm) and Type X gypsum wallboard.
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility.
- Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350).
- Refer to product submittal sheet WB2315 (U.S.) or EW2315 (Canada) for more information.

**UL PROPERTIES**

- **Product Data**
  - **Thickness**: 5/8 in. (15.9 mm)
  - **Width**: 48 in. (1219 mm)
  - **Length**: Tapered
  - **Weight**: 2.8 lb./sq. ft. (127 kg/m²)

- **UL Type Classification**
  - **ABRASION RESISTANCE**: Level 2
  - **INDENTATION RESISTANCE**: Level 2
  - **SOFT-BODY IMPACT RESISTANCE**: Level 1
  - **HARD-BODY IMPACT RESISTANCE**: Level 3

**FIBEROCK® BRAND AQUA-TOUGH™ AR INTERIOR PANELS (REGULAR & TYPE X)**

- 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) Type X gypsum fiber panels engineered to provide increased resistance to abrasion, indentation and penetration.
- No face paper to scratch or tear.
- Certified 97% recycled content.
- Economical and aesthetically pleasing alternative to concrete block and plaster construction.
- Tested to ASTM C1629 for surface abrasion and indentation resistance, and soft- and hard-body impact.
- UL Classification as to fire resistance, surface-burning characteristics and noncombustibility.
- As an upgrade, this panel is available in 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) moisture- and mold-resistant version: USG Fiberock® Brand Aqua-Tough™ XAR Interior Panels (Regular and Type X).
- Refer to product submittal sheet F1032 (U.S.) for more information.

**UL PROPERTIES**

- **Product Data**
  - **Thicknes**: 1/2 in. (12.7 mm)
  - **Width**: 48 in. (1219 mm)
  - **Length**: Tapered
  - **Weight**: 2.4 lb./sq. ft. (11.7 kg/m²)

- **UL Type Classification**
  - **ABRASION RESISTANCE**: Level 1
  - **INDENTATION RESISTANCE**: Level 1
  - **SOFT-BODY IMPACT RESISTANCE**: Level 2
  - **HARD-BODY IMPACT RESISTANCE**: Level 1

**NOTES:**

1. Economically equivalent weight for design and display purposes. For specific product weight to your area, contact your local USG or CGC representative, or call the Customer Service Center.

2. Weight and Hard-Resistance: These values are a representation of independent testing at the time of manufacture per ASTM C1292 (1975), Standard Test Method for Resistance of Gypsum Board to the Forward Motion of a Standard Fire, and are not representative of all products manufactured.

3. This ASTM lab test may not accurately represent the real-world performance of building materials in actual use. Given unsuitable project conditions during storage, installation or after completion, any building material can be overwhelmed by mold. To manage the growth of mold, the best and most cost-effective strategy is to protect building products from water exposure during storage and installation and during and after completion of the building. This can be accomplished by using good design and construction practices.

4. See all testing data in table, which was generated with one coat of primer and two coats of latex paint; the abrasion resistance increases to Level 3.
ABUSE-RESISTANT PANELS Continued

** closed-cell, glass-mat Type X panels in their paper-faced (Type A) and glass-mat (Type C) configurations.**

** Intended For**
- Commercial or residential applications where 5/8 in. (15.9 mm) Type X panels with greater resistance to indentation and impact damage are desired.
- New or repair and remodeling application
- Load-bearing and non-load-bearing wood- or steel-framed fire-rated walls.
- Any UL design in which UL Type AR panels are listed.

**Product Data**
- Thickness: 5/8 in. (15.9 mm)
- Width: 48 in. (1219 mm)
- Edge Profile: Tapered
- Weight: 2.8 lb./sq. ft. (13.7 kg/m²)

**Abuse Resistance**
- Level 2: Indentation Resistance
- Level 3: Hard-body Impact Resistance

**UL Type Designation:** AR

** Notes:**
1. Represents approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or call the Customer Service Center.
2. Given unsuitable project conditions during storage, installation or after completion, any building material can be damaged. This ASTM lab test may not accurately represent the mold performance of building materials in actual use. Always evaluate project conditions during design, installation or after completion, any building material can be damaged. This test is intended to provide products from water exposure during storage and installation, and other conditions of the building. This test can be accomplished under project design or test conditions. USG/CGC testing demonstrates that walls painted with one coat of primer and two coats of latex paint, the abuse resistance increases to Level 3.
USG and CGC offer the most extensive portfolio of backerboard and underlayment panel technologies in the industry. No matter the product or material of choice, all of our products are backed by the reputation of the Durock® and Fibercor® Brands, and will provide you with a durable, moisture- and mold-resistant substrate for your tile project for years to come.

**PRODUCT DATA**

**USG and CGC Interior & Exterior Panels**

- When tested in accordance with ASTM D3273, the panels meet or exceed ASTM C1325 specifications.
- Water durable, mold-resistant for high moisture areas.
- Will not rot, warp, delaminate or disintegrate when exposed to water.
- Superior tile bond.
- Easy to cut and fasten for quick installation.
- Superior tile bond.
- Monolithic, core will not delaminate.
- Provides a smooth, flat, paintable surface for wall applications.
- For use in dry and limited wet areas throughout the home.
- Lifetime (30-year) limited warranty, 10-year limited exterior warranty.
- Made from 97% recycled material.

**TILE BACKERBOARD**

**DUROCK™ BRAND GLASS-MAT TILE BACKERBOARD**

- Aggregated Portland cement with polymer-coated, glass-fiber mesh completely encompassing edges, back and front surfaces.
- Enhanced proprietary edge performance prevents spinout and crumbling.
- Comply with ASTM C1125 specifications for 1/2 in. (12.7 mm), 5/8 in. (15.9 mm) and fiber-reinforced cementitious backer unit.
- When tested in accordance with ASTM D2273, the panels meet or exceed ASTM C1125 specifications.
- Water durable, mold-resistant for high moisture areas.
- Will not rot, warp, delaminate or disintegrate when exposed to water.
- Superior tile bond.
- Easy to cut and fasten for quick installation.
- Noncombustible.
- Lifetime (30-year) limited warranty, 10-year limited exterior warranty.

**INTENDED FOR**

- Areas where moisture and mold resistance is desired.
- Tile soundings, cuttings, floors and countertops in new construction and remodeling.
- Bathrooms, tubs, showers, garage showers, kitchens, laundry rooms, steam rooms, indoor pool areas and fireplaces.
- Base for directly applied finishes, tile, stone and thin brick used in building exteriors.
- 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) panels can be used in any UL design in which UL Type DCB panels are listed.

**NOTES**

1. Represents approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or visit the Customer Service Center.
3. This D1723 test may not accurately represent the mold performance of building materials in actual use. Given variable project conditions during storage, installation or other operations, any building material can be overwhelmed by mold. To minimize the growth of mold, the basic and most cost-effective strategy is to perform buildings products from water exposure during storage and installation and other operation of this building. This can be accomplished by using good design and construction practices.
USG was the first to innovate and commercialize shaftliner panels, which allow for cost-efficient and flexible shafts in tall buildings—and ultimately the construction of taller buildings. Walls that enclose elevator shafts, stairwells and other vertical shafts are the lifeblood of a structure. Should a fire occur, firefighters control the use of elevators, leaving shaftliners as the only means for occupants to egress or rescue. Since these walls are an important component, they must have the strength to withstand lateral loads and provide needed fire protection. High-performing Sheetrock® Brand shaftliner panels are tested and exceed even the most stringent standards, ensuring the safety of the property and its occupants.

### SHEATHLINER PANELS

**SHIETHAC® BRAND GYPSUM LINER PANELS**

- **1 in. (25.4 mm) paper-faced Type X liner panels with moisture and mold resistance**
- **Direct substitute for USG Sheetrock® Brand Gypsum Liner Panels**
- **Comply with ASTM C1658 specifications for 1 in. (25.4 mm), Type X**
- **Score and snap easily; no special handling required**
- **Refer to product submittal sheet WB2278 (U.S.) or EWB2278 (Canada) for more information**

**SHIETHAC® BRAND MOLD-TOUGH® GYPSUM LINER PANELS**

- **1 in. (25.4 mm) paper-faced Type X liner panels with moisture and mold resistance**
- **Direct substitute for USG Sheetrock® Brand Gypsum Liner Panels**
- **Comply with ASTM C1658 specifications for 1 in. (25.4 mm), Type X**
- **When tested in accordance with ASTM D11727, the panels meet or exceed ASTM C1658 specifications**
- **UL Classification as to fire resistance, surface-burning characteristics and noncombustibility**
- **Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)**
- **Can be exposed to weather for up to 12 months and are guaranteed five years against manufacturing defects**
- **Refer to product submittal sheet WB20483 (U.S.) or EWB20483 (Canada) for more information**

**SHIETHAC® BRAND GLASS-MAT LINER PANELS MOLD-Tough®**

- **1 in. (25.4 mm) glass-mat Type X liner panels with moisture and mold resistance**
- **Direct substitute for Sheetrock® Brand Gypsum Liner Panels and Sheetrock® Brand Mould Tough® Gypsum Liner Panels when prolonged weather exposure is anticipated**
- **Score and snap easily; no special handling required**
- **Comply with ASTM C1658 specifications for 1 in. (25.4 mm), Type X and glass mat shaftliner panel**
- **When tested in accordance with ASTM D11727, the panels meet or exceed ASTM C1658 specifications**
- **UL Classification as to fire resistance, surface-burning characteristics and noncombustibility**
- **Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)**
- **Can be exposed to weather for up to 12 months and are guaranteed five years against manufacturing defects**
- **Refer to product submittal sheet WB2483 (U.S.) or EWB2483 for more information**

### SHEATHING PANELS

- **Economical 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X shaftlining panels with moisture-resistant paper and core**
- **Treated gypsum core minimizes the amount of liquid water absorbed from stud space, protecting framing members from moisture build-up**
- **Comply with ASTM C1177 specifications for 1/2 in. (12.7 mm), Regular, 5/8 in. (15.9 mm) Type X gypsum shaftlining boards**
- **UL Classification as to fire resistance, surface-burning characteristics and noncombustibility**
- **Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)**
- **Can be exposed to weather for up to 12 months and are guaranteed five years against manufacturing defects**
- **Refer to product submittal sheet WB2360 (U.S.) for more information**

**SHEETHAC® BRAND GLASS-MAT SHEATHING (REGULAR & FIRECODE X)**

- **Regional availability**
  - **1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X glass-mat shaftlining panels with moisture and mold resistance**
  - **Direct substitute for Sheetrock® Brand Gypsum Shaftlining (Regular and Firecode X) when prolonged weather exposure is anticipated**
  - **Coated fiberglass face to maximize coverage of air barrier systems**
  - **Treated gypsum core combined with fiberglass face and back offers exceptional water resistance**
  - **Comply with ASTM C1177 specifications for 1/2 in. (12.7 mm), Regular, 5/8 in. (15.9 mm) Type X glass-mat shaftlining panels**
  - **When tested in accordance with ASTM D11727, the panels meet or exceed ASTM C1177 specifications**
  - **UL Classification as to fire resistance, surface-burning characteristics and noncombustibility**
  - **Can be exposed to weather for up to 12 months and are guaranteed five years against manufacturing defects**
  - **Refer to product submittal sheet WB2462 (U.S.) for more information**

**SECUROCK® BRAND GLASS-MAT SHEATHING (REGULAR & FIRECODE X)**

- **Regional availability**
  - **2.7 lb./sq. ft. (13.8 kg/sq. m.) EDGE PROFILE: Square**
  - **2.4 lb./sq. ft. (11.7 kg/sq. m.) EDGE PROFILE: Double-beveled**
  - **2.0 lb./sq. ft. (9.8 kg/sq. m.) EDGE PROFILE: Square**

### SHEATHING PANELS

- **Economical 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X shaftlining panels with moisture-resistant paper and core**
- **Treated gypsum core minimizes the amount of liquid water absorbed from stud space, protecting framing members from moisture build-up**
- **Comply with ASTM C1177 specifications for 1/2 in. (12.7 mm), Regular, 5/8 in. (15.9 mm) Type X shaftlining boards**
- **UL Classification as to fire resistance, surface-burning characteristics and noncombustibility**
- **Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01350)**
- **Can be exposed to weather for up to 12 months and are guaranteed five years against manufacturing defects**
- **Refer to product submittal sheet WB2360 (U.S.) for more information**

- **Commercial or residential applications where 1/2 in. (12.7 mm) or 5/8 in. (15.9 mm) Type X shaftlining panels are required**
- **Areas where additional moisture resistance is desired**
- **Under exterior claddings where conventional gypsum shaftlining products have traditionally been used, such as brick veneer, properly detailed Exterior Insulation Finish Systems (EIFS), clapboard siding, panel siding, single-siding, single-siding and conventional stucco**
- **1/2 in. (12.7 mm) Type X can be used in any UL design in which UL Type SHX panels are listed**

- **Commercial or residential applications where 1/2 in. (12.7 mm) or 5/8 in. (15.9 mm) Type X shaftlining panels are required**
- **Areas where additional moisture resistance is desired**
- **Under exterior claddings where conventional gypsum shaftlining products have traditionally been used, such as brick veneer, properly detailed Exterior Insulation Finish Systems (EIFS), clapboard siding, panel siding, single-siding, single-siding and conventional stucco**
- **1/2 in. (12.7 mm) Type X can be used in any UL design in which UL Type SHX panels are listed**

**NOTES:**
- **1** Documents represent approximate weight for design and shipping purposes. For specific product weight in your area, contact your local USG or CGC representative, or call the Customer Service Center.
- **2** All uses of the Sheetrock® Brand trademark, and all references to uses are representations of independent tests at the time of manufacture per ASTM D2735, Standard Test Method for Resistance to Moisture Absorption by Gypsum Plaster or Gypsum Plasterboard. This ASTM test method accurately represents the most performing of building materials in actual use. Given variable project conditions during storage installation or other completion of the building. This product accompanied by using good design and construction practices.
**SHEATHING PANELS Continued**

**SHEATHING® BRAND STRAIGHT GLASS-MAT SHEATHING REGULAR AND TYPE X**

• The lightest 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X glass-mat sheathing with moisture and mild resistance available—up to 55% lighter

• Direct substitute for Sheetrock® Brand Gypsum Sheathing (Regular and Firecode® X) when prolonged weather exposure is anticipated

• Cooled fiberglass face mat to maximize coverage of air/water barrier system

• Treated gypsum core combined with glass-mat face and back offers exceptional water resistance

• Comply with ASTM C757 specifications for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and glass-mat gypsum sheathing

• When tested in accordance with ASTM D227, the panels meet or exceed ASTM C757 specifications

• UL Classification as to fire resistance, surface-burning characteristics and noncombustibility

• Can be exposed to weather for up to 12 months and are guaranteed five years against manufacturing defects

• Refer to product submittal sheet WS2862 (U.S.) and EWS2862 (Canada) for more information

**SHEATHING® ESXAR®42 PANEL**

• 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) Type X glass-mat-faced, moisture- and mold-resistant gypsum panel with a noncombustible core integrated with a factory-applied synthetic vapor seal membrane

• Comply with ASTM C757 specifications for 1/2 in. (12.7 mm) Regular, 5/8 in. (15.9 mm) Type X and glass-mat gypsum sheathing

• When tested in accordance with ASTM D227, the panels meet or exceed ASTM C757 specifications

• High-strength application provides a uniform membrane with superior bond resulting in predictable air and water barrier performance and adhesion to the base panel

• The component is a component of the SecurIce® ESXAR® 420 A-Bar System to be installed using Procore® sealants and transition membranes to achieve air barrier continuity

• Membrane is not climate-dependent and not susceptible to washout

• Panel eliminates air exchange in the field

• U/V and weather resistance allows the panels to be installed, sealed and left exposed while interior construction begins

• UL Classification as to fire resistance, surface-burning characteristics and noncombustibility

• Refer to product submittal sheet BETO (U.S.) or BETO (Canada) for more information

**INTENDED FOR**

- Commercial or residential applications where 1/2 in. (12.7 mm) Regular or 5/8 in. (15.9 mm) Type X sheathing panels with moisture and mild resistance are required
- Areas where additional moisture and mild resistance are desired
- Areas where glass-mat panels are desired
- Common in most exterior systems when properly detailed by exterior finish manufacturer
- Under exterior claddings where conventional gypsum sheathing products have traditionally been used, such as brick veneer, properly detailed Exterior Insulation Finish Systems (EIFS), cladboard siding, panel siding, single siding, shake siding and conventional stucco
- 5/8 in. (15.9 mm) Type X can be used in any UL design in which UL Type USG panels are listed

**MANUFACTURED HOUSING PANELS**

USG offers a complete line of Sheetrock® Brand MH panels designed to meet the stringent needs of the Manufactured Housing Industry. Our solutions, however, are just one part of a time-tested family that includes wallboard, trimmed and finishing products. All of our MH products are backed by USG’s reputation and experience to ensure the highest performance required by the demanding environment of the assembly line.

**SHEETROCK® BRAND ULTRA-BASE® PANELS**

• The lightest 1/2 in. (12.7 mm) ceiling panels for industrialized construction

• Enclosed assembly independently tested by Progressive Engineering Inc. to ensure compliance with HUD Manufactured Home Construction and Safety Standards (see Product Evaluation Report PER-01146 for detailed designs)

• Meets UL Type USGX panels

• Beads seal, even with water-based texture and overlaid stucco

• Noncombustible gypsum core; Class A building material

• ICC Evaluation Service certified for ceiling installations, ESR-3585

• Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01330)

• Refer to product sheet MH1221 (U.S.) for more information

**INTENDED FOR**

- Industrialized construction
- Parallel or perpendicular installation on ceilings with up to 12 in. (305 mm) DC framing when water-based texture is applied
- May be fastened with a two-part polyurethane adhesive or mechanical fasteners

**SHEETROCK® BRAND ULTRA-BASE® PANELS TIP-BASE**

• The lightest 1/2 in. (12.7 mm) panels for manufactured housing

• System-tested to ensure compliance with HUD Manufactured Home Construction Standard

• Classified as to shear resistance by Progressive Engineering Inc., Product Evaluation Report PER-01146

• Composition provides low expansion and contraction to resist buckling and warping

• Noncombustible gypsum core; Class A building material

• Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01330)

• Refer to product sheet MH1224 (U.S.) for more information

- May be fastened with a two-part polyurethane adhesive, a one-part polyurethane adhesive, a one-part polyurethane adhesive, mechanical fasteners or a combination of adhesives and mechanical fasteners

**SHEETROCK® BRAND MH GYPSUM BASE BOARD**

• 5/16 in. (7.9 mm), 1/8 in. (5.5 mm) and 1/2 in. (12.7 mm) base boards designed to meet the need for time sensitivity and structural integrity

• Third-party system-tested to ensure compliance with HUD Manufactured Home Construction Standard

• Classified as to shear resistance by Progressive Engineering Inc., Product Evaluation Report PER-01146

• Designed to accept laminated finish film

• Composition provides low expansion and contraction to resist buckling and warping

• Square edges for tight-fitting panels to minimize batton width

• Noncombustible gypsum core; Class A building material

• Achieved GREENGUARD Gold Certification and qualifies as a low VOC emitting material (meets CA 01330)

• Refer to product sheet MH1214 (U.S.) for more information

3. The complete line of products is subject to availability at the time of publication. Additional product information may be obtained by contacting your local USG representative.

4. This ASTM test may not accurately represent the required performance of building materials in actual use. When considering product sampling for design, installation or other purposes, always consult your local building department, code enforcement office and your consulting architect or engineer. As with any selection, do not rely on this document to control your building system. Your architect or engineer should be consulted in designing or selecting building products for fire resistance during design and installation and for construction of the building. This can be accomplished using good design and construction practices.

USG and CGC Interior & Exterior Panels

**PATCH & REPAIR SOLUTIONS**

Finished interior walls are subject to abuse from time to time. USG and CGC offer a line of easy-to-install patch & repair products to deal with damage.

**SHEETROCK® BRAND PATCH & REPAIR PANELS**

- Available in 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) thicknesses, 2 ft. (610 mm) wide x 2 ft. (610 mm) long
- 5/8 in. (15.9 mm) panel not available in Canada
- Ideal for repairing damaged drywall
- For interior use only
- Easy to carry, transport and store
- Less waste than a full-size panel

**SHEETROCK® BRAND PATCH & REPAIR PANELS**

- For fast, easy drywall repair of large holes (over 2 in. [51 mm]) and areas damaged by water
- When used with fire-rated drywall, meet building code requirements for repairing 1-hour fire-rated drywall partitions
- Suitable for both 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thick panels
- 6 clips, 32 drywall screws

**FULL SHEET**

- 2 ft. x 2 ft. (610 mm x 610 mm)
- 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thicknesses
- Available in Regular and Firecode® X
- Ideal for large areas requiring repair

**PATCH & REPAIR PANELS**

- 12 x 24 in. (305 x 610 mm)
- 1/4 in. (6.4 mm) thickness
- Available in Regular and Firecode® X
- Ideal for patching holes, dents, and other minor damages

**PASTE PATCH**

- 1 pt. (0.47 liter)
- Apply directly to the wall
- Quick dry time
- No mix required

**NAIL-ON PATCH**

- 1/4 in. (6.4 mm) thickness
- Available in Regular and Firecode® X
- Ideal for small damage repair

**SHEETROCK® BRAND PATCH & REPAIR PANELS**

- 1/2 in. (12.7 mm) Regular and 5/8 in. (15.9 mm) thicknesses, 2 ft. (610 mm) wide x 2 ft. (610 mm) long
- 5/8 in. (15.9 mm) panel not available in Canada
- Ideal for repairing damaged drywall
- For interior use only
- Easy to carry, transport and store
- Less waste than a full-size panel

**SHEETROCK® BRAND PATCH & REPAIR PANELS**

- For fast, easy drywall repair of large holes (over 2 in. [51 mm]) and areas damaged by water
- When used with fire-rated drywall, meet building code requirements for repairing 1-hour fire-rated drywall partitions
- Suitable for both 1/2 in. (12.7 mm) and 5/8 in. (15.9 mm) thick panels

NOTE
Products described here may not be available in all geographic markets. Consult your USG or CGC sales office representative for information.

The information in this document is subject to change without notice. USG Corporation assumes no responsibility for any errors that may inadvertently appear in this document.

NOTICE
We shall not be liable for incidental and consequential damages, directly or indirectly sustained, nor for any loss caused by application of these goods not in accordance with current printed instructions or for other than the intended use. Our liability is expressly limited to replacement of defective goods. Any claim shall be deemed waived unless made in writing to us within thirty (30) days from date it was or reasonably should have been discovered.

SAFETY FIRST!
Follow good safety and industrial hygiene practices during handling and installation of all products and systems. Take necessary precautions and wear the appropriate personal protective equipment as needed. Read Safety Data Sheets and related literature on products before specification and/or installation.
